

INCIDENT MANAGEMENT SITUATION REPORT

WEDNESDAY, JULY 22, 1998 - 0530 MDT

NATIONAL PREPAREDNESS LEVEL III

CURRENT SITUATION:

Initial attack fire activity continues to increase in the West as the monsoon moisture generates lightning activity. Heavy initial attack activity is continuing in west Texas. Louisiana, Oklahoma and Arkansas are also experiencing increased initial attack activity. The National Interagency Coordination Center processed orders for overhead, crews, aircraft and engines. Very high and extreme fire indices were reported in Florida, Georgia, Texas, Oklahoma, New Mexico, Arizona, Wyoming, Nebraska, South Dakota, Colorado, Utah, Nevada, California and Washington.

SOUTHERN AREA LARGE FIRES:

HENSLEYS RIDGE, Pisgah NF. A Type II Incident Management Team (Joki) is assigned. Water sources are close and ample, but concerns for local residents and recreationists will determine dip site locations. Resource damage from siltation of lakes and streams is also a concern, limiting the number and type of equipment to be used. Steep and rocky terrain may hamper suppression efforts.

BACK CREEK, Pisgah NF. This fire is also being managed by Joki's Type II Incident Management Team. Steep and rocky terrain is also a concern. Helicopter operations will be the focus for suppression of this fire.

NORTH BAYOU, Sabine NWR. The fire is contained on the east and west flanks. Ten to fifteen foot flame lengths were reported at the head of the fire. Hot temperatures and heavy fuel loading are causing some control problems.

WESTERN GREAT BASIN LARGE FIRES:

CEDAR RIDGE, Elko District BLM. This lighting fire is burning in pinyon- juniper thirty miles south of Elko. The fire is burning with multiple fingers in a Wilderness study area. Steep terrain and high temperatures are hindering control efforts. A medical situation occurred requiring a medivac yesterday. The individual was treated and released at a hospital for dehydration and heat exhaustion.

CALIENTE COMPLEX, Ely District BLM. A Type II Incident Management Team (Butler) is assigned. This complex is burning in the vicinity of Caliente. The complex consists of seven fires; Sam, Summit, Crestline, Randy, White Rock, Brown s Well and Wildhorse. Fanned by winds from approaching thunderstorms, the Sam fire was running and spotting prior to receiving heavy precipitation as the storm passed. Good progress was made on the other fires, where firefighters were aided by higher humidities and scattered precipitation. Three new fires were successfully initial attacked. Some resources will be available for release or reassignment today.

SAND, Carson City District, BLM. This fire is located approximately twenty miles northeast of Doyle, CA. Current threats are to cultural resources and grazing allotments. Control problems include high winds and difficult terrain. Full containment was expected yesterday, no new information was received.

EASTERN GREAT BASIN LARGE FIRES:

SALT LAKE COMPLEX, Salt Lake District BLM. A Type II Incident Management Team (Shive) is assigned. The Team is managing initial attack and control of the fires for Tooele County. The complex consists of the White Rock, Topliff, Dry Canyon, Eight Mile, Junction, Judd Creek, Wildcat, Hellhole, Mill Creek and Rocky Canyon fires. Fire activity increased mid-day with the influence of thunderstorm winds. A rail line was closed down due to the Topliff fire.

MILFORD EAST, Cedar City District BLM. This fire is located fifteen miles west of Beaver. This short event fire should be demobilized late today.

HOVENWEEP	MOD	UT	2,510	100	----	0	0	0	0	0	87K	UNK

ROCKY MOUNTAIN LARGE FIRES:

PEEKABOO, Craig District BLM. This fire is thirty-six miles northwest of Maybell. No major fire activity occurred due to lower wind speeds and higher relative humidity. Mop-up is being concentrated on the western flank to lessen the threat to structures located one and a half miles from the fire. Helicopters were used for personnel shuttle.

OUTLOOK:

FIRE WEATHER WATCHES ARE POSTED IN NEVADA, SOUTHEAST OREGON, SOUTHERN IDAHO AND WESTERN WYOMING FOR DRY THUNDERSTORMS ALONG WITH VERY HOT AND DRY CONDITIONS. Scattered mostly dry thunderstorms will form from Arizona, New Mexico and west Texas and move north through Nevada, southern Idaho, Wyoming and eastern Montana. Isolated dry thunderstorms will form in central and southern California. High temperatures will be in the 80's in the mountains to 115 in the valleys and deserts.

North Carolina will be remain hot with scattered afternoon wet thunderstorms as a slow weak trough moves through the state. High temperatures will be 90 to 100.
