

INCIDENT MANAGEMENT SITUATION REPORT

THURSDAY, JULY 23, 1998 - 0530 MDT

NATIONAL PREPAREDNESS LEVEL III

CURRENT SITUATION:

Fire activity increased in west Texas, Arkansas and Michigan. Twenty-six counties in Texas reported initial attack activity yesterday. A state of emergency was declared in 36 counties of Oklahoma due to fire activity. Containment objectives were achieved on the large fires in Nevada. The National Interagency Coordination Center processed orders for overhead, crews, aircraft and engines. Very high and extreme fire indices were reported in Florida, Georgia, Texas, Oklahoma, New Mexico, Arizona, Wyoming, Nebraska, South Dakota, Colorado, Utah, Idaho, Nevada, California and Washington.

SOUTHERN AREA LARGE FIRES:

GRANDFATHER COMPLEX, Pisgah NF. A Type II Incident Management Team (Joki) is assigned. This complex includes the Hensleys Ridge, Back Creek, and three smaller fires. Light rain showers decreased fire activity yesterday. Numerous spot fires within the control lines remain a concern. Control problems include steep terrain and unfavorable weather conditions. The resources on this complex are assisting the Forest with initial attack responsibilities.

LONE WILLOW, Texas State, Johnson County. The fire threatened 200 homes in the Pat Cleburne area. Crews are experiencing control problems due to high winds, low relative humidity and difficult terrain. Containment was anticipated last evening.

EASTERN GREAT BASIN LARGE FIRES:

SALT LAKE COMPLEX, Salt Lake District BLM. A Type II Incident Management Team (Shive) is assigned. This complex is 10 miles east of Dugway. The Team is managing initial attack and control of the fires for Tooele County. The complex consists of the White Rock, Topliff, Dry Canyon, Eight Mile, Junction, Judd Creek, Wildcat, Hellhole, Mill Creek and Rocky Canyon fires. Higher relative humidity decreased fire activity yesterday. Firefighters are making good progress toward suppression objectives.

ROCKY MOUNTAIN LARGE FIRES:

DEVILS CANYON, Worland District, BLM. This fire is 20 miles northeast of Lovell. The steep, inaccessible terrain in the Porcupine Canyon has made suppression efforts difficult. Fire behavior has moderated and some demobilization has begun.

OUTLOOK:

Scattered wet thunderstorms will form from Arizona, New Mexico, and western Texas through Nevada, Utah, Wyoming, and eastern Montana. Isolated dry thunderstorms are predicted in eastern Oregon and portions of southwest and central Idaho. Afternoon temperatures will continue to be hot, with highs reaching from 80 in the mountains to 115 in the deserts.

North Carolina will have scattered afternoon thunderstorms with afternoon temperatures between 90 and 100.
