OUTLOOK:

High pressure will dominate over Florida and the Gulf of Mexico through next week. Scattered showers and thunderstorms are forecast for today, with generally drying conditions expected Saturday through Thursday.

Temperatures will be warm, with highs in the 80's.

A series of cold upper troughs will be dropping down from the Gulf of Alaska over the Southwestern U.S. California will be on the back side of these troughs resulting in cool temperatures, breezy conditions and limited moisture. There will be a slight chance of showers today, Sunday and again on Tuesday. The remainder of the week will be mostly sunny and dry. Temperatures will be cool, with highs in the 40's in the mountains and 60's in the Southern deserts. Most days will be breezy.
