

INCIDENT MANAGEMENT SITUATION REPORT
 FRIDAY, APRIL 23, 1999 - 1000 MDT
 NATIONAL PREPAREDNESS LEVEL II

CURRENT SITUATION:

The Southern Geographical Area continued making good progress on their large fires, but initial attack activity increased in most areas. Mobilization continues to be moderate. The National Coordination Center processed orders for aircraft, equipment, and miscellaneous overhead.

SOUTHERN AREA LARGE FIRES:

HICKORY ISLAND, Okefenokee NWR. This fire is burning near Folkston, GA. The fire continues to grow to the northeast. Inaccessible terrain and heavy fuels are contributing to control problems.

APALACHICOLA COMPLEX, National Forests in Florida. A Type I team (Melton) is assigned. This complex includes the Owl Creek (2,436 acres) and Cow House (6,863 acres) fires. Both fires continue to burn actively in the afternoon due to low humidities, wind, and persisting drought conditions. Interior swamp areas are burning out, causing spotting and hampering control efforts.

PIGSKIN, Daniel Boone National Forest. This fire is burning near Whitley city, KY. Low relative humidities and high temperatures are hampering containment efforts.
