

INCIDENT MANAGEMENT SITUATION REPORT
SUNDAY, AUGUST 8, 1999 - 0900 MDT
NATIONAL PREPAREDNESS LEVEL III

CURRENT SITUATION:

Fire activity in the Western Great Basin has moderated. Acreage gains on most large fires were minimal with few new starts being reported. The Northern Rockies and Northwest Areas continue to pick up new lightning starts, as well as hold over fires from the previous days thunderstorms. Moderate initial attack activity was reported in the Eastern Great Basin and California Areas. Resource mobilization through the National Interagency Coordination Center was moderate. Very high to extreme fire indices were reported in Oregon, Washington, Montana, North Dakota, Idaho, Utah, Nevada, South Dakota, Delaware, Massachusetts, New Hampshire, Rhode Island, Maine, Maryland, Connecticut, New Jersey, New York, Pennsylvania, West Virginia and Oklahoma.

WESTERN GREAT BASIN LARGE FIRES:

An Area Command Team (Meuchel) is assigned to support large fires within the Western Great Basin.

DRY CANYON, Elko Field Office, BLM. This fire is 35 miles southeast of Jackpot, NV. Control problems include access and remote location.

SADLER COMPLEX, Elko Field Office, BLM. A Type II Incident Management Team (Hefner) is assigned. This fire is 45 miles south of Elko, NV. There were hot spots along perimeters and rates of spread of 40-60 chains an hour were observed.

ROSE, Elko Field Office, BLM. This fire is southeast of Beowawe, NV. Slop- overs on the north side of Interstate 80 were caught.

DUN GLENN COMPLEX, Winnemucca Field Office, BLM. A Type II Incident Management Team (Vorce) is assigned. The complex consists of 20 fires. The Cyanco, Cosgrave, Unionville, Poker Brown, Eugene, Rodchester 1 and 2 and Grass Valley 1 and 2 are included in the complex.

JUNGO COMPLEX, Winnemucca Field Office, BLM. A Type II Incident Management Team (Suwyn) is assigned. This fire is 20 miles northwest of Winnemucca, NV. Minimal rates of spread were observed. The complex received wetting rain yesterday.

BAXTER, Humboldt National Forest. This fire near Ruby Valley is burning in grass, sage, pinon pine, juniper, aspen and service berry. No new information was reported.

RUBY, Humboldt National Forest. This fire is in the Ruby Valley. No new information was received.

BATTLE MOUNTAIN COMPLEX, Battle Mountain Field Office, BLM. A Type II Incident Management Team (Burdick) is assigned. This complex consists of thirteen fires. Fires within the complex burned very intensely, due to

strong winds.

CORRIDOR COMPLEX, Winnemucca Field Office, BLM. A Type I Incident Management Team (Richer) is assigned. This complex is approximately 30 miles northeast of Winnemucca, NV. This complex includes the Chimney, Slumbering Hills and Lone Butte fires. Higher humidity allowed for quick containment of the Lone Butte and Slumbering Hills fires.

NEW PASS COMPLEX, Carson City Field Office, BLM. A Type II Team (Williams) is assigned. This fire is 60 miles east of Fallon, NV. This complex includes the Poco, Shirtail, Shoeshone, and New pass fires. Cooler temperatures have aided fire suppression.

EUREKA COMPLEX, Battle Mountain Field Office, BLM. This complex includes the Trail Canyon fire. No other information was reported.

EDEN VALLEY, Winnemucca Field Office, BLM. No new information was reported.

FIRST CREEK, Winnemucca Field Office, BLM. No new information was reported.

OZGOOD, Winnemucca Field Office, BLM. No new information was reported.

NORTHWEST LARGE FIRES:

LAKE WENATCHEE COMPLEX, Wenatchee National Forest. A Type II Incident Management Team (Furlong) is assigned. This fire is fifteen miles northwest of Leavenworth, WA. Higher humidities and light rain showers aided suppression efforts.

EASTERN GREAT BASIN LARGE FIRES:

DEER CREEK, Lower Snake District, BLM. This fire is 16 miles southeast of Jordan Valley, OR. Suppression resources were successful with the assistance of a dozer. Current threats are to Red Band Trout habitat.

SOLDIER, Salmon/Challis National Forest. A Fire Use Team (Johnson) is assigned. Fire activity decreased yesterday and minimal growth occurred within the perimeter. A second Fire Use Team (Lentz) has arrived on the incident. Team transition is planned for 8/9.

OUTLOOK:

An upper level trough will continue to affect Oregon, Washington and Idaho with a moist air mass, especially west of the Cascades. Cloudy and showery conditions will persist over coastal Washington and Oregon with high temperatures in the 70's. East of the Cascades and over Idaho, drying will begin with only a chance of showers and wet thunderstorms in the mountains. Temperatures will range from the 70's to 80's. The lowest minimum relative humidities will be found over southeast Oregon and southern Idaho.

Nevada, Utah and northern California will be affected by the southern fringe of the northwest trough. It will bring mostly cloudy skies and a slight chance of showers and wet thunderstorms to northern California and northwest Nevada. Elsewhere, partly cloudy to mostly sunny conditions will

prevail with high temperatures generally in the 80's. High temperatures in the southernmost deserts will be in the 90's to near 105 degrees. A slight chance of thunderstorms exists over the eastern Utah mountains. The lowest minimum relative humidities will be found in the Utah deserts where they will range from 8 to 15 percent.
