

INCIDENT MANAGEMENT SITUATION REPORT
 FRIDAY, DECEMBER 15, 2000 - 1000 MST
 NATIONAL PREPAREDNESS LEVEL I

CURRENT SITUATION:

The Southern Area reported three new large fires in the past week. Initial attack was light in most areas with the Southern Area reporting daily activity.

 MNF = National Forests in Mississippi
 RGR = Lower Rio Grande Valley National Wildlife Refuge

OUTLOOK:

A vigorous area of low pressure will push east across the Pacific Northwest bringing gusty winds to Idaho, Montana, Wyoming, Colorado and Utah. Precipitation will gradually diminish in Washington and Oregon as the front passes. High temperatures are expected to range from the 20 s in the northern portion of the region to the 40 s throughout Oregon.

High pressure should bring mild, dry conditions to California and the Southwest. Mostly sunny skies are expected with daytime high temperatures ranging from the 50 s over central California and in the 60 s over the Los Angeles basin.

Low pressure will move into the Great Plains today spreading a mix of rain and snow to the region. An unstable air mass will remain over portions of the Great Lakes resulting in isolated snow flurries mainly across northern Wisconsin and northern Michigan.

Arkansas and Louisiana should experience widespread precipitation today due to the high pressure shifting northeastward. The Carolina s and northeastern Florida will also have occasional showers. The remaining southeastern states will see partly cloudy skies. Daytime high temperatures will range from the 40 s to 60 s and in the 70 s in the Florida panhandle.

The Northeast will be sunny and dry throughout the region. High temperatures will be in the 40 s in the Virginia s, in the 30 s in

Pennsylvania and in the 20 s in Maine.
