

INCIDENT MANAGEMENT SITUATION REPORT
 FRIDAY, APRIL 13, 2001 - 1000 MDT
 NATIONAL PREPAREDNESS LEVEL 1

CURRENT SITUATION:

A total of nine new large fires were reported this past week in the Southern, Southwest, Eastern and Rocky Mountain Areas. Initial attack activity is moderate in the Southern Area and light elsewhere in the nation. Major flooding is occurring in Minnesota and the Dakotas along the Mississippi, Red, Big Sioux, and James rivers due to heavy rainfall combined with melting snow.

SOUTHERN AREA LARGE FIRES:

RED GRANGE COMMAND, Florida Division of Forestry. This fire is in Polk County, FL. Evacuations are in place, though some residents have been allowed to return to their homes.

POINSETTIA, Florida Division of Forestry. The fire is located in Martin County, FL. No other information was reported.

CORBETT, Florida Division of Forestry. The fire is in Palm Beach County, FL.

BIG BUCK, Florida Division of Forestry. The fire is burning in Bradford County, FL.

OUTLOOK:

A weak weather system should bring showers to the Pacific Northwest. High pressure will dominate the remainder of the region resulting in dry and warm conditions from California to the Rockies and over the desert Southwest. High temperatures will range from the 30's to 40's across the northern Rockies, 50's across most of the Pacific Northwest, and 60's in California to the 80's in the Southwest.

Showers and thunderstorms are expected over the north and central Plains as a weak storm system moves through the area. High pressure will settle over the Mississippi Valley and up to the Great Lakes. The daytime high temperatures will be in the 30's for the northern portion of the region, 60's to 70's across much of the Ohio Valley, and in the 80's across Texas.

High pressure over Tennessee will push a weather front over northern Florida throughout the day. This will bring cooler temperatures to most of the Southern Area, with 70's to the north of the cold front and 80's to the south.

The heavy rains in the Northeast should end today, though some showers may persist across Maine. Conditions will become breezy and cooler as the low pressure system moves east. Daytime high temperatures will range from the mid 40's over northern Maine, to the 50's and 60's over the rest of the New England states, and in the 70's from New York to Washington DC.
