

INCIDENT MANAGEMENT SITUATION REPORT
 THURSDAY, APRIL 26, 2001 - 0530 MDT
 NATIONAL PREPAREDNESS LEVEL 1

CURRENT SITUATION:

The Southern Area reported no new large fires. Initial attack activity was moderate in the Southern Area and light elsewhere. Very high to extreme fire danger was reported in New Mexico, Michigan and Wisconsin. Florida will have increased moisture with showers and thunderstorms as a passing cold front trails through. The Southwest will continue to be warm and dry with enough instability for some afternoon cumulus over higher terrain.

SOUTHERN AREA LARGE FIRES:

LITTLE CAESAR, Florida Division of Forestry. This fire is near Homestead, FL. No other information received.

CARLTON 01, Florida Division of Forestry. The fire is burning near Northport, FL. No other information received.

HORIZON, Florida Division of Forestry. This fire is in Highlands County, FL. Continuing to monitor the status of this fire.

COUNTY LINE, Florida Division of Forestry. This fire is burning in a dry lake bed. No new information received.

OUTLOOK:

An upper level ridge will keep the Southwest states warm and dry with light winds. There will be just enough moisture and instability for some afternoon cumulus over the higher terrain. High temperatures will range from the 60's in the mountains to the upper 90's in the deserts. Minimum relative humidity will be in the single digits in the deserts to around 20 percent in the mountains. Winds will be of the typical diurnal valley and slope variety, from the south at 10 to 20 mph on the ridges as the high pressure builds aloft.

A passing cold front trailing across central Florida will bring increased moisture as well as showers and thunderstorms as it passes. Much drier air will move into the area with high pressure behind the front. High temperatures will be mostly in the 60's to around 70 behind the front and in the 80's ahead of the front. Minimum relative humidity will be as low as 25 to 35 percent throughout much of the southeast behind the front,

while ahead of the front relative humidity will be 50 to 60 percent in South Florida. Winds will be out of the north at 10 to 15 mph behind the front and southeast to southwest around 10 mph ahead of it.
