

INCIDENT MANAGEMENT SITUATION REPORT
SATURDAY, APRIL 28, 2001 - 0930 MDT
NATIONAL PREPAREDNESS LEVEL 1

CURRENT SITUATION:

The Southern Area reported one new large fire. Initial attack activity was moderate in the Eastern and Southern Areas and light elsewhere. Very high to extreme fire danger was reported in Arizona, Colorado, New Mexico, North Dakota, Texas and Wisconsin. The southeastern states will have mostly sunny and dry conditions. The southwest will continue to be warm with a few mainly dry thunderstorms over the mountains of New Mexico.

SOUTHERN AREA LARGE FIRES:

FRANKLIN CREEK, Mississippi Sandhill Crane National Wildlife Refuge. This fire is near Moss Point, MS. Torching and crowning were observed, with spot fires occurring up to one mile ahead of the main fire.

LITTLE CAESAR, Florida Division of Forestry. This fire is near Homestead, FL. Daily reconnaissance flights are being done to monitor the status of the fire.

CARLTON 01, Florida Division of Forestry. The fire is burning near Northport, FL. No new information received. This will be the last report unless new information is received.

HORIZON, Florida Division of Forestry. This fire is in Highlands County, FL. No new information received. This will be the last report unless new information is received.

OUTLOOK:

*** A RED FLAG WARNING HAS BEEN POSTED FOR PORTIONS OF NORTHERN AND CENTRAL FLORIDA FOR LOW RELATIVE HUMIDITY ***

*** A FIRE WEATHER WATCH HAS BEEN POSTED FOR PORTIONS OF CENTRAL FLORIDA TO SOUTHEAST GEORGIA FOR LOW AFTERNOON HUMIDITY ***

*** A FIRE WEATHER WATCH HAS BEEN POSTED FOR PORTIONS OF KENTUCKY FOR LOW RELATIVE HUMIDITY ***

*** A FIRE WEATHER WATCH HAS BEEN POSTED FOR NORTHERN MINNESOTA FOR LOW RELATIVE HUMIDITY ***

An upper level ridge will slowly move off to the east as low pressure pushes toward the coast keeping the southwest warm. Moisture will start to move east producing a few mainly dry thunderstorms over the mountains of New Mexico. High temperatures will range from the mid 60's in the mountains to near 100 in the deserts. Minimum relative humidity will be in the single digits in the hottest deserts to around 25 percent in the mountains. Winds will be southeast to southwest at 5 to 15 mph except gusty near thunderstorm activity. Over the ridges winds will be southwest to 20 mph.

High pressure will bring mostly sunny and dry conditions to much of the southeastern states. Only south Florida will have scattered shower activity from a stationary front. Temperatures will warm into the mid 70's and 80's. Minimum relative humidity will lower to 25 to 35 percent, with 35 to 50 percent along the coastal areas. Winds will be northeast to southeast 5 to 15 mph.

A weak disturbance over Minnesota will bring scattered light showers early, but humidity will still drop significantly in the afternoon as a strong southeast to southwest flow develops. High temperatures will range from the mid 60's to around 80 degrees. Minimum relative humidity will be 20 to 30 percent. Wind will be southeast at 15 to 25 mph with gusts to 30 mph.
