*** RED FLAG WARNING IN KENTUCKY, CENTRAL AND NORTHERN FLORIDA FOR LOW RELATIVE HUMIDITY. ****

A dry ridge will build over central and northern Florida, with a moist flow over southern Florida. Minimum relative humidity will be near 30 percent. High temperatures will be in the 70's, with an east wind at 10 to 15 mph.

An upper level trough from the west will bring a dry southwest wind over the Midwest causing the relative humidity to drop to 20 percent. The skies will be partly cloudy with high temperatures from 75 to 85, except for near the lakes where the high temperature will be in the 60's. A south wind is forecasted at 20 to 25 mph, with gusts to 35.

The Southwest has a slight chance of afternoon thunderstorms predicted in eastern New Mexico. Warmer, drier air will move into Arizona and southern New Mexico. High temperatures will range from the 60's and 70's in the mountains, upper 70's and 80's for the rest of the area, and in the 90's in the deserts. Minimum relative humidity will range from 25 percent in the mountains to 10 percent in the deserts. The wind will be from the southwest at 10 to 20 mph.
