

INCIDENT MANAGEMENT SITUATION REPORT
 FRIDAY, DECEMBER 21, 2001- 1000 MST
 NATIONAL PREPAREDNESS LEVEL 1

CURRENT SITUATION:

Initial attack activity was light in the Eastern, Southern, Northwest, and Southwest Areas. Very high fire indices were reported in Texas.

OUTLOOK:

*** A RED FLAG WARNING HAS BEEN POSTED FOR THE INTERIOR SECTIONS OF SOUTH FLORIDA FOR LOW RELATIVE HUMIDITIES ***

*** A FIRE WEATHER WATCH HAS BEEN POSTED FOR THE EVERGLADES IN SOUTH FLORIDA FOR LOW RELATIVE HUMIDITIES ***

A high pressure system will move through Georgia over the next few days bringing a chance of showers through the first part of the week. Decreasing temperatures will bring a chance of snow flurries over Christmas to northern Georgia, and portions of Tennessee, Kentucky, the Appalachian Mountains, and surrounding higher elevation areas. High temperatures will generally be upper 30s to lower 60s over much of the Southern Area through the holidays. The high pressure system will bring northerly winds and cool temperatures with low relative humidities to Florida. High temperatures will be upper 70s, and winds will generally be northeast to 15 mph. Minimum relative humidities will be 25 to 40 percent in Florida, Texas, and South Carolina.
