

INCIDENT MANAGEMENT SITUATION REPORT
 FRIDAY, DECEMBER 28, 2001- 1000 MST
 NATIONAL PREPAREDNESS LEVEL 1

CURRENT SITUATION:

Initial attack activity was light in the Eastern, Southwest and Southern Areas. Very high fire indices were reported in Texas.

OUTLOOK:

A cold and dry period will continue for portions of the Southern Area bringing below normal temperatures. The South will be mostly dry except for showers along the Gulf coast from Texas to Florida, while the central Appalachian mountains will continue to experience isolated snow showers. Another resurgence of cold air is expected to move through the southeast later in the week. High temperatures will generally be in the 30s to 40s in Tennessee and Virginia, and in the 50s from Oklahoma to the Carolinas, including northern Mississippi, Alabama and Georgia. Texas to Florida can expect temperatures in the 60s and 70s. Minimum humidities will range from 35 to 50 percent. Winds will be west to northwest at 8 to 12 mph in Oklahoma and Texas, and west to southwest at 10 mph elsewhere, with gusts to 20 mph from Virginia through the Carolinas.
