

INCIDENT MANAGEMENT SITUATION REPORT  
SATURDAY, JULY 21, 2001 - 0900 MDT  
NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Initial attack activity was minimal nationwide. Two new large fires were reported in Nevada. One new large fire was reported in Oregon. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Nevada, Oregon, Utah and Wyoming.

NORTHWEST AREA LARGE FIRES:

THIRTY MILE, Okanagan National Forest. A Type 1 Incident Management Team (Stutler) is assigned. This human-caused fire is burning in logging slash and continuous stands of timber 20 miles north of Winthrop, WA. Significant progress has been made with mopup. A wilderness containment strategy continues to be implemented. An aerial patrol of the fire is planned for today.

DOG CREEK, Wenatchee National Forest. A Type 2 Incident Management Team (Johnson) is assigned. This fire is 11 miles southwest of Cliffdell, WA. Steep terrain and heavy fuels are control problems. Spotted owl habitat and Yakima city watershed are threatened.

INDIAN CREEK, Burns District BLM. This lightning caused fire is located near French Glen, Oregon. It is burning in the Steens Mt. Wilderness Area.

EASTERN GREAT BASIN AREA LARGE FIRES:

FORT RANCH, Northwest State, Utah State. This fire is north of Promontory Mountain, UT. Hot, dry and windy conditions have been experienced on the fire. Burn out operations along the southwestern side of the fire were completed overnight.

KEG MOUNTAIN, Richfield Field Office, BLM. This fire is burning in cheatgrass, pinyon pine and juniper is 35 miles northwest of Delta, UT. No new information was received.

MEADOW 2, Richfield Field Office, BLM. Most of this incident is located on the Fishlake National Forest. No major increase in size was observed and good progress was made with engine and helicopter support.

SANDY, Northwest State, Utah State. This fire is west of the North Promontory Mountains, UT. Mopup of hot spots along the fires perimeter continues.

#### WESTERN GREAT BASIN AREA LARGE FIRES:

WEST LITTLE HUMBOLDT, Elko Field Office, BLM. This fire is located in the Little Humboldt Wilderness Study Area, 8 miles NW of Midas. This area has had large fire activity over the past 5 years. The fire is running to the north and south and jumped the Little Humboldt River yesterday. It is burning in light fuels.

#### ROCKY MOUNTAIN AREA LARGE FIRES:

ECKLUND COMPLEX, Little Snake Field Office, BLM. A Fire Use Management Team (Cook) has been assigned. This complex of lightning caused Wildland Fire Use fires are 50 miles east of Vernal, UT. The complex consists of the Ecklund, Davis Draw and Outlaw fires. A small burnout was planned for last night on Davis Draw to help protect mature cottonwood trees along the Green river. No significant fire behavior was observed yesterday.

#### SOUTHWEST AREA LARGE FIRES:

CAPULIN, Santa Fe National Forest. This fire is 23 miles northwest of Las Vegas, NM, and is in a confine strategy with no significant activity

occurring. The fire received a good amount of precipitation on 7/18.

O REAR COMPLEX	TX	TXS	14350	90	7/21	25	0	8	2	0	NR

#### EASTERN AREA LARGE INCIDENTS:

NEW RIVER FLOOD, New River Gorge National River. A National Park Service All-Risk Incident Management Team (Panko) is assigned to assist with recovery operations. Heavy equipment teams began debris removal and mitigation of safety hazards on NPS lands in Thayer. Technical specialists for the Resource Assessment Team performed aerial surveys of the park and began identifying serious hazards, assessing cultural sites and began compliance examinations to enable construction of a temporary road at the Cunard site. A FHWA team completed assessments at the Cunard and Thurmond Depot. Trail crews continued emergency trail repairs on the Stone Cliff and Thurmond-Minden trails.

#### OUTLOOK:

\*\*\* A FIRE WEATHER WATCH HAS BEEN POSTED FOR PARTS OF SOUTHERN AND CENTRAL WYOMING FOR DRY FUELS, HIGH TEMPERATURES, STRONG WINDS AND A DRY UNSTABLE AIRMASS \*\*\*

An upper level high continues over the plains with a trough over the Pacific Northwest. The Rocky Mountain Region will continue to experience a southwest flow with some mid and high level moisture moving across

southeastern Colorado. This will bring widely scattered afternoon thunderstorms along the front range of Colorado with possible dry lightning in the north. Western Colorado will have isolated mainly dry afternoon thunderstorms. Wyoming and South Dakota will be mostly sunny except for an isolated afternoon thunderstorm possible in the Black Hills and northwest mountains. High temperatures will be in the 80's to mid 90's at lower elevation and in the upper 60's to lower 80's in the mountains. Minimum relative humidity will range from 10 to 20 percent at lower elevations and 15 to 25 percent on the front range of Colorado and the northwest mountains of Wyoming. Winds will be west to southwest at 15 to 25 mph in western Colorado and 6 to 12 mph with gusts to 20 on the front range. Southern and central Wyoming will have afternoon winds from the southwest at 15 to 25 mph except near 25 to 40 on mountain ridges. Northern Wyoming will have southwest winds at 10 to 20 mph with gusts to 35 mph over the mountain ridges.

Low pressure continues over the Pacific Northwest and high pressure centered over the plains will continue to produce a dry southwest flow over Utah and eastern Idaho. Southwestern Idaho will continue to experience cool temperatures and scattered afternoon thunderstorms. Utah will be hot and breezy in the afternoon. High temperatures for Utah will be 85 to 95 in the valleys, and 75 to 85 in the mountains. Idaho high temperatures will be 75 to 90 in the valleys, and 65 to 80 in the mountains. Minimum relative humidity will range from 5 to 15 percent in valleys of Utah, with 12 to 22 percent in the mountains. In Idaho, minimum relative humidity will range from 20 to 30 percent in the southwest and 10 to 25 percent in the east. Afternoon winds will be southwest at 10 to 20 mph in Utah with gusts up to 15 to 25 mph over the ridgetops. Idaho will have winds from the southwest at 15 to 25 mph, with gusts up to 40 mph in eastern Idaho.

An upper level trough continues to maintain a moist and unstable airmass over the Pacific Northwest, bringing showers and scattered wet thunderstorms east of the Cascades especially in Washington. High temperatures will be in the 70's to low 80's east of the Cascades and southwest Oregon. Minimum relative humidity will range from 25 to 35 percent east of the Cascades and southwest Oregon and 45 percent or higher in western Washington and northwest Oregon. Winds will be generally west or northwest at 5 to 15 mph.
