

INCIDENT MANAGEMENT SITUATION REPORT
THURSDAY, MAY 10, 2001 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 1

CURRENT SITUATION:

New large fires were reported in Northern California, Florida and Pennsylvania. Initial attack activity was moderate in the Southern Area and light elsewhere. Increased humidity will assist in moderating fire activity in Florida. Isolated thunderstorms may produce some initial attack activity in New Mexico and Arizona. Very high to extreme fire indices were reported in Florida, Arizona, New Mexico, Texas, and Connecticut.

NORTHERN CALIFORNIA LARGE FIRES

JONES, Klamath National Forest. A Type 2 Incident Management Team (McElwain) is assigned. The fire is located near Happy Camp, CA. The fire burned actively throughout the night. Aircraft resources consisting of an airtanker and a helicopter supported the suppression effort. Low relative humidity and spotting are hampering control efforts.

JONES	CA	KNF	800	NR	NR	NR	NR	NR	NR	NR	NR	

SOUTHERN AREA LARGE FIRES:

LOPEZ, Everglades National Park. This fire started on 5/8 in Dade County, FL. Strong winds and rough terrain are impeding containment efforts. Endangered species habitat is being threatened.

BURNS, Big Cypress National Preserve. This human-caused fire is in southern Florida near Everglades National Park. The fire is being monitored by aircraft. Conditions continue to be extremely dry.

LONGINO RANCH COMMAND, Florida Division of Forestry. The fire is eight miles east of North Port, FL. The current threat is to Interstate 75 and timber resources. Airtanker retardant drops are supporting suppression efforts.

NO BUSINESS, Cherokee National Forest. This fire is four miles southwest of Erwin, TN. No new information was reported. This will be the last report unless new information is received.

NORTHERN ROCKIES LARGE FIRES:

CORRAL CREEK 2, Crow Agency, Bureau of Indian Affairs. This fire is four miles east of Lodge Grass, MT. Creeping fire behavior has been observed with flare-ups in the interior. Three structures are threatened.

OUTLOOK:

*** A FIRE WEATHER WATCH IS POSTED IN MOST OF WEST AND CENTRAL FLORIDA FOR LOW RELATIVE HUMIDITY ***

High pressure over the southeast states will dominate the weather pattern. Isolated showers and thunderstorms are possible mainly along the coastal areas. High temperatures will be in the 70's and 80's. An onshore flow across Florida will help to keep afternoon humidity up from past days into the 35 to 45 percent range. At locations to the west of Florida, relative humidity will be 45 to 55 percent. Light south winds are expected across the area, except Florida will have east to northeast winds at 10 to 15 mph.

High pressure will continue over the southwest with only lingering moisture across the region. This may help to produce isolated thunderstorms over the higher terrain. Skies will be partly cloudy across the area. High temperatures will range from the 70's in the mountains to 110 in the hottest deserts of Arizona. Minimum relative humidity will be

five to 15 percent in Arizona and 10 to 25 percent in New Mexico. Winds will be from the west to southwest at 10 to 20 mph.
