

INCIDENT MANAGEMENT SITUATION REPORT
SATURDAY, MAY 19, 2001 - 0900 MDT
NATIONAL PREPAREDNESS LEVEL 1

CURRENT SITUATION:

Initial attack activity was moderate in the Southern Area and light elsewhere. One new fire was reported in the Southern Area, and one large fire was contained in Montana. High pressure will begin to weaken across the southeastern states as a cold front approaches the area. Florida, southeast Georgia and South Carolina will remain dry while other portions of the Southeast will see showers and thunderstorms develop. Very high to extreme fire indices were reported in Arizona, Florida, New Mexico and Texas.

SOUTHERN AREA LARGE FIRES:

BEAR ISLAND, Big Cypress National Park. This fire is 45 miles east of Naples, FL. Crews, engines, and air support are making good progress. This fire is backing towards Interstate 75.

BAY TOP/HARTSOG, Florida Division of Forestry. This fire is four miles west of Orlando, FL. Smoke drift toward Disney World and Interstate 4 is a potential problem.

HURST HAMMOCK, Florida Division of Forestry. Crews continue with mopup in all divisions and improve the containment line on the right flank.

VICTOR ROAD, Florida Division of Forestry. This fire is 20 miles south of Chipley, FL. Highway 77 was closed for a short time due to smoke. Crews continue to mopup the fire.

MALLORY SWAMP, Florida Division of Forestry. This fire is approximately 20 miles east of Perry, FL. The fire is in remote, boggy terrain. Winds have impeded containment efforts.

GOLF COURSE, Florida Division of Forestry. This fire is one-and-a-half miles north of Sea Grove Beach, FL. Crews continue with mopup operations. Reduction in acreage due to better mapping.

SEAGROVE, Florida Division of Forestry. This fire is one mile from Sea Grove Beach, FL. Crews continue with containment operations. Reduction in acreage due to better mapping. VORTEX, Florida Division of Forestry. No new information reported. This will be the last report unless new information is received.

LOPEZ, Everglades National Park. No new information reported. This will be the last report unless new information is received.

OUTLOOK:

*** A WEATHER WATCH HAS BEEN POSTED IN THE MAJORITY OF FLORIDA AND SOUTHEAST GEORGIA FOR LOW AFTERNOON RELATIVE HUMIDITY ***

High pressure will begin to weaken across the southeastern states as a cold front approaches the area. Florida, southeast Georgia and South Carolina will remain dry while other portions of the Southeast will see showers and thunderstorms develop. High temperatures will be mostly in the 80's, except for a few low 90's along the Gulf Coast and in parts of Florida and Georgia. Minimum relative humidity will range from 25 percent to 45 percent. Winds will be west to southwest at 5 to 15 mph.

Another cold front will move into Montana late in the day bringing a chance of showers and thunderstorms. High temperatures will be in the 60's and 70's with minimum relative humidity ranging from 25 to 35 percent. Winds will be west to northwest at 15 to 30 mph, and 30 to 40 mph over the ridges.

Low pressure over Baja California will move east across the Southwest bringing scattered showers and thunderstorms. High temperatures will be in the 70's and 80's in the mountains, and in the 90's to around 105 in the deserts. Minimum relative humidity will range from 10 to 20 percent in the deserts and 15 to 30 percent elsewhere. Winds will be west to northwest at 10 to 20 mph in the afternoon.
