OUTLOOK

Surface high pressure will replace the dry cold front that has been influencing the Northern Rockies area. Weather will be partly cloudy with less winds. Temperatures will range from the 70s to 80s and minimum relative humidity will be 15 to 30 percent. Winds will be southwest to west at 10 to 20 mph.

A dry air mass remains over the Eastern Great Basin area as upper level high pressure persists over the region. Isolated dry thunderstorms are possible over the mountains of Utah and southeast Idaho. Temperatures will be 85 to 100 in Utah and mid 80s to 90s in Idaho, with minimum relative humidity at 8 to 20 percent. Winds will be variable 5 to 20 mph, but gusty near thunderstorms.

In Northern California a dry westerly flow will dominate the region. Weather will be sunny with some high thin clouds with temperatures in to 60s to low 70s along the coast and lower 80s to mid 90s inland. Minimum relative humidity will be 15 to 25 percent and winds southeast to southwest at 5 to 15 mph.

Moisture from the remains of tropical storm Flossie will continue to bring a slight chance of afternoon thunderstorms to the Western Great Basin area. Weather will be partly cloudy with scattered afternoon

thunderstorms in the south and isolated thunderstorms to the north, mainly over the mountains. Temperatures will be 85 to 95 in north and central portions of the region with 90 to 105 in the south. Minimum relative humidity will be 10 to 15 percent in the north and 20 to 30 percent in the south, with winds south to southwest at 10 to 15 mph.
