

INCIDENT MANAGEMENT SITUATION REPORT  
WEDNESDAY, SEPTEMBER 19, 2001 - 0530 MDT  
NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

One new large fire was reported in the Northwest Area. Initial attack activity was light in the Northern California and Northwest Areas. Very high to extreme fire indices were reported in California, Idaho, Montana, Nevada, Utah, Oregon and Washington.

EASTERN AREA SUPPORT:

NEW YORK CITY SUPPORT, Federal Emergency Management Agency. A Type 1 Incident Management Team (Bateman) is assigned. The incident command post is at Jacob Javits Convention Center in Manhattan, New York City, NY. The team is operating a mobilization, receiving and distribution center from a warehouse adjacent to the convention center. The planning section is working with the New York City Fire Department (FDNY), and will be relocating closer to ground zero. The team is providing detailed GIS maps for the search and rescue efforts.

EDISON SUPPORT, Federal Emergency Management Agency. A Type 1 Incident Management Team (Stutler) is assigned. The Incident Management Team is located in the warehouse district in Edison, NJ, and is fully operational. The team is also preparing a strategic plan for long-term offsite logistics operations in support of the WTC incident. The main objective is to assist with the movement of supplies, equipment and personnel to support the Disaster Field Office (DFO). They are also preparing a strategic plan for long term offsite logistics support operations.

SOUTHERN AREA SUPPORT:

PENTAGON SUPPORT, Federal Emergency Management Agency. A Type 1 Incident Management Team (Gage) is assigned. The incident command post is located at the Pentagon in Arlington, VA. The primary objective of the team is to support Pentagon rescue operations. The team has merged with California Interagency Incident Management Team 3 (CIIMT3). The team continues to provide coordination and logistical support to Federal Emergency Management Agency's (FEMA) Urban Search and Rescue (USAR) Task Forces.

NORTHWEST AREA LARGE FIRES:

REX CREEK COMPLEX, Wenatchee National Forest. A Type 2 Incident Management Team (Jennings) is assigned. This complex, comprised of the Rex Creek, Glory Mountain, and four other fires, is 34 miles northwest of Lake Chelan, WA in the Sawtooth Wilderness Area. The planned burnout operation was postponed due to westerly winds. Reduction in acreage is due to better mapping.

SALT CREEK COMPLEX, Gifford Pinchot National Forest. A Washington Interagency Incident Management Team (Furlong/Gromley) is assigned. This complex, comprised of the Salt Creek (470 acres) and Aiken Lava fires (2 acres), is 12 miles northwest of Trout Lake, WA. Steep terrain and heavy fuels are hampering containment efforts. Nearby trail closures are in effect.

TOMMY CREEK, Wenatchee National Forest. A Washington Interagency Incident Management Team (Dunton/Holloway) is assigned. This fire is 22 miles northwest of Entiat, WA. Nearby trail closures are in effect. Nineteen summer cabins were evacuated.

CRAGGIE, Siskiyou National Forest. This fire is 20 miles northwest of Cave Junction, OR. The fire made short runs, and spotting was observed.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTAL PERS	CRW	ENG	HELI	STRC	\$\$\$ LOSS	C-T-D

## OUTLOOK:

High pressure and a dry westerly flow will dominate the Northwest. A weak upper level disturbance might cause a few showers in extreme northeast Washington. High temperatures will be in the 60s and 70s, with some readings in the 80s in southern Oregon. Minimum relative humidity will be 15 to 25 percent. Winds will be west to northwest at 5 to 12 mph, with gusts to 30 mph.

High pressure over Northern California will bring sunny skies with morning fog and low clouds in coastal regions. High temperatures will be in the 60s along the coast, and in the 80s to mid 90s in the inland valleys. Minimum relative humidity will be 12 to 28 percent. Winds will be southwest to northwest at 6 to 14 mph.

A dry cold front will move through the Northern Rockies, bringing isolated mountain thunderstorms and gusty winds. West of the continental divide, high temperatures will be 65 to 75, with mid 80s in the valleys of northern Idaho. Minimum relative humidity will be 15 to 25 percent, with winds west to north at 10 to 20 mph. East of the continental divide, high temperatures will be 60 to 70. Minimum relative humidity will be 25 to 35 percent, and winds will be gusty northwest at 15 to 30 mph.
