INCIDENT MANAGEMENT SITUATION REPORT
SUNDAY, APRIL 7, 2002- 1000 MDT
NATIONAL PREPAREDNESS LEVEL 1

CURRENT SITUATION:

Initial attack activity was moderate in the Southwest Area and light elsewhere. Two new large fires were reported yesterday, one each in the Southwest and Southern Areas. Prescribed burning projects continued in the Northwest, Eastern and the Southern Areas. Very high to extreme fire indices were reported in Arizona, New Mexico, Oklahoma and Texas.

SOUTHWEST AREA LARGE FIRES:

MIDDLE, Gila National Forest. A Type 1 Incident Management Team (Humphreys) is assigned. This fire is in the Gila Wilderness 25 miles southeast of Reserve, NM. Fire activity was moderated due to lower temperatures and higher humidity. Crews continue to make progress along the northwest and northeast portions of the fire.

REILEY PEAK, Coronado National Forest. This fire is 20 miles northwest of Wilcox, AZ. The fire is burning in grass, oak brush and mesquite. High rates of spread were observed due to strong winds. Because of the steep and rugged terrain, airtankers were utilized to check the fires spread on both flanks.

REILEY PEAK	AZ	CNF	150	NR	UNK	18	1	0	0	0	NR

SOUTHERN AREA LARGE FIRES:

NUMBER ONE ISLAND, Okefenokee National Wildlife Refuge, FWS. This fire is being managed by a Fire Use Management Team (Cones). The fire is 14 miles southwest of Folkston, GA. Personnel conducted burnout operations and continue to prepare fireline along the eastern boundary of the swamp.

OUTLOOK:

*****A FIRE WEATHER WATCH IS IN EFFECT FOR LOW MINIMUM RELATIVE HUMIDITY FOR NORTHERN FLORIDA*****

In the Southern Area, cool high pressure is entrenched over the area bringing cooler and dryer conditions to much of the region, including northern Florida. It will be warmer in Texas and Oklahoma where a southerly flow ahead of an advancing cold front will set the stage for rain beginning in the morning hours. Rain will spread north and east into Kentucky, Arkansas and western Tennessee by evening.

In the Southwest Area, a moist Pacific storm system will continue to move across Arizona, bringing numerous showers and thunderstorms, mixed with snow over the higher elevations. In northern New Mexico, expect decreasing clouds with much cooler temperatures. In southern New Mexico expect a chance of lingering showers in the morning with decreasing cloudiness and breezy conditions by mid afternoon. Winds will range from 5 to 25 mph in Arizona and 15 to 30 mph in New Mexico. Minimum relative humidity will range from 15 to 38 percent in Arizona and 17 to 40 percent in New Mexico.
