**INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY, APRIL 10, 2002 - 1000 MDT
NATIONAL PREPAREDNESS LEVEL 1**

CURRENT SITUATION:

Initial attack activity was light across the nation. Two new large fires were reported in the Eastern Area. One large fire was contained in the Eastern Area and two were contained in the Southern Area. Prescribed burning projects continued in the Rocky Mountain, Eastern and Southern Areas. Very high to extreme fire indices were reported in Arizona, New Mexico, Oklahoma, Texas and Colorado.

SOUTHWEST AREA LARGE FIRES:

MIDDLE, Gila National Forest. A Type 1 Incident Management Team (Humphrey) is assigned. This fire is in the Gila Wilderness 25 miles southeast of Reserve, NM. Crews in wilderness divisions began to cold trail and construct line where possible.

REILEY, Coronado National Forest. This fire is 20 miles northwest of Wilcox, AZ. Crews made good progress towards containment goals. No other information was reported.

LITTLE BLACK HILLS, Arizona State Land Department. This fire is east of San Manuel, AZ. Demobilization of resources began yesterday.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
MIDDLE	NM	GNF	37,600	75	4/12	267	6	0	3	0	2.7M

LITTLE BLACK HILLS	AZ	AZS	150	95	4/10	91	1	1	0	0	75K

EASTERN AREA LARGE FIRES:

RED LAKE 39, Red Lake Agency, BIA. This fire is 35 miles northwest of Red Lake, MN. No other information was received.

RED LAKE 33, Red Lake Agency, BIA. This fire is 17 miles northwest of Red Lake MN. No other information was received.

SHAVER S MTN., Monongahela National Forest. This fire is 15 miles northeast of Elkins, WV. The fire received good precipitation yesterday. No other information was reported.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
RED LAKE 39	MN	RLA	1,749	80	4/10	3	0	1	0	0	1.5K

CANE CREEK	KY	DBF	2,100	100	---	8	0	1	0	0	NR

CHF = Chattahoochee-Oconee National Forest

DBF = Daniel Boone National Forest

OUTLOOK:

The Southwest will be partly to mostly cloudy with breezy conditions. Winds will be 10 to 25 mph across most of the area, except for northern Arizona where winds will be stronger at 15 to 30 mph. Relative humidities will generally range from 10 to 25 percent, except for central Arizona where they will be as low as 5 to 15 percent.

The Southern Area can expect a cold front to become nearly stationary from eastern North Carolina to the Florida Panhandle and Gulf Coast region, resulting in the possibility of afternoon showers and thunderstorms in those areas. High temperatures will be 65 to 70 degrees in northern Kentucky and Virginia and in the mid 70's to around 80 degrees elsewhere. Texas and south Florida may see high temperatures in the low 80's. Winds will range from 5 to 10 mph, except for Oklahoma and Texas where they may reach 10 to 15 mph. Relative humidities will range from 25 to 30 percent in eastern Kentucky and 40 to 50 percent elsewhere west of the Appalachian Mountains. East of the Appalachian Mountains relative humidities will generally be above 60 percent.

The Eastern Area can expect rain to continue through today in Minnesota and Wisconsin and little change from yesterday across the remainder of the area. High temperatures will remain generally in the 50's and 60's but cooler in the northern tier of the Great Lakes and New England regions. Low temperatures will be in the 30's and 40's across the area. Relative humidities will range from 35 to 60 percent across the area with good recovery at night.

REFUSING RISK (TURNDOWN PROTOCOL)

Every firefighter has the right and obligation to report safety problems and contribute ideas regarding their safety. Supervisors are expected to give these concerns and ideas serious consideration. When an individual feels an assignment is unsafe, they also have the obligation to identify, to the degree possible, safe alternatives for completing that assignment. Turning down an assignment is one possible outcome of managing risk.

A turndown is a situation where an individual has determined an assignment cannot be undertaken as given, and they are unable to negotiate an alternative solution.

A turndown must be based on an assessment of risks and the ability of an individual or organization to control those risks.

A situation may be a candidate for a turndown if:

- θ There is a violation of safe work practices.
- θ Environmental conditions make the work unsafe.
- θ The forces lack the necessary qualifications or experience.
- θ Defective equipment is being used.

The following steps will be used when turning down an assignment:

- θ The individual will directly inform their supervisor that they are turning down the assignment as given. (Document using criteria outlined in the risk management process.)
- θ Supervisor will notify the Safety Officer immediately upon being informed. In the absence of a Safety Officer, the appropriate Section Chief or Incident Commander will be notified. This step provides accountability for decisions and initiates communication of safety concerns.
- θ If the supervisor requests another resource to perform the assignment, he/she is responsible for informing that resource that the assignment has previously been refused and the reason(s) why.
- θ The safety hazard should be documented by the submission of a SAFENET or SAFECOM.

These actions do not stop an operation from being carried out. This protocol is integral to the effective management of risk as it provides timely identification of hazards to the chain

of command, raises risk awareness for both leaders and subordinates, and promotes accountability.
