INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY, APRIL 30, 2002 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 1

CURRENT SITUATION:

Initial attack activity was light across the nation. Three new large fires were reported, one each in the Southwest, Rocky Mountain and Northern California Areas. One large fire was contained in the Northern California Area. Prescribed burn projects are underway in Southern, Eastern, Northwest and Southern California Areas. Very high to extreme fire indices were reported in Arizona, California, Colorado, New Mexico and Texas.

SOUTHWEST AREA LARGE FIRES:

RYAN, Coronado National Forest. A Type 2 Incident Management Team (Kvale) is assigned. This fire is 16 miles east of Patagonia, AZ. Rapid rate of spread in light fuels forced the closure of Highways 83 and 82. Burnout operations were conducted along Road 799 to Highway 83.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
RYAN	AZ	CNF	3,000	5	UNK	140	5	13	5	0	150K

ROCKY MOUNTAIN AREA LARGE FIRES:

BREEN, Colorado State Forest Service. This fire is 25 miles southeast of Durango, CO. Erratic fire behavior and low relative humidity was observed yesterday. Structures and outbuildings are threatened.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
BREEN	CO	DRX	180	0	4/30	130	2	13	1	0	NR

DRX = Durango Dispatch Center

NORTHERN CALIFORNIA AREA LARGE FIRES:

HUU = California Department of Forestry and Fire Protection, Humboldt-Del Norte RU

SOUTHERN AREA LARGE FIRES:

DEERFLY FIRE, Florida Division of Forestry. This fire is near Florida City, FL. No new information was reported. This will be the last report unless new information is received.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
DEERFLY FIRE	FL	FLS	100	95	UNK	8	0	5	0	0	NR

OUTLOOK:

*****A RED FLAG WARNING HAS BEEN ISSUED FOR WIDESPREAD PORTIONS OF THE SOUTHWEST AREA FOR STRONG WINDS AND LOW RELATIVE HUMIDITY*****

*****A FIRE WEATHER WATCH HAS BEEN ISSUED IN THE SOUTHERN AND WESTERN PORTIONS OF COLORADO FOR HIGH WINDS*****

The Southwest Area can expect partly to mostly sunny skies with dry, warm and windy conditions. High temperatures will be in the 60's at higher elevations and near 100 at lower elevations. Minimum relative humidity will be below 15 percent and in single digits for large portions of New Mexico and Arizona. Winds will be 15 to 30 mph, gusting to 50 mph.

An approaching low pressure system will bring mostly sunny skies with a chance of isolated afternoon thunderstorms to the Rocky Mountain Area. High temperatures will be in the mid 50's to upper 60's at higher elevations and in the upper 60's to upper 70's over the foothills and plateaus. Minimum relative humidity will range from the low teens to single digits in southern and western Colorado. Winds will be westerly, gusting to 30 mph at lower elevations and 40 mph over mountain ridges.

A low pressure system over the Northern California Area will bring rain and widespread thundershowers. High temperatures will be in the 40's and 50's at higher elevations and 60's in the valleys. Minimum relative humidity will be above 80 percent and winds will be from the southwest at 8 to 12 mph.

A warm front developing over Texas and a high pressure system over the Carolinas will bring rain to the western portion of the Southern Area, and warm, dry conditions to the east. High temperatures will be in the 90's in Texas, 80's for the Gulf Coast states and 70's elsewhere. Minimum relative humidity will range from 30 to 40 percent. Winds will be from the south at 12 to 20 mph in Texas and Oklahoma, and 8 to 12 mph throughout the rest of the area.

SMOKE EXPOSU RE

Exposure
to smoke
during fire
operation
s can be
a
significant
safety
concern.
Research
has
shown
that
smoke
exposure
on
prescribe
d fires,
especially
in the
holding
and
ignition
positions,
often
exceeds
that on
wildfires.
There are
many
precautio
ns that
can be
taken to
reduce
personnel
exposure
to smoke.

- Planning: Smoke exposure needs to be considered when planning suppression tactics

and prescribed fires. Simple actions can mitigate smoke exposures, such as:

- θ Altering line locations can have a significant impact on smoke exposure.
- θ Placing firelines in areas of lighter fuels or moving lines to roads or other barriers that will require less holding, patrol and mopup will significantly reduce the smoke exposure to personnel.
- θ Use flanking attack as opposed to head attack (where appropriate) in heavy smoke situations.
- θ Check fire behavior forecasts for smoke and inversion potential.
- θ In heavy smoke, give up acres to gain control.

Implementation: Many techniques can help reduce the exposure of personnel to heavy smoke, such as:

- θ Rotating people out of the heaviest smoke area may be the single most effective method.
- θ Locate camps and incident command posts in areas that are not prone to inversions.
- θ Minimize snag falling, consistent with safety concerns, to avoid putting heavy fuels on the ground that will require mopup.
- θ Changing firing patterns and pre-burning (black lining) during less severe conditions can greatly reduce exposure to smoke.
- θ The use of retardant, foam or sprinklers can also significantly reduce the workload and exposure time for holding crews.
