

**INCIDENT MANAGEMENT SITUATION REPORT**  
**FRIDAY, AUGUST 2, 2002 0530 MDT**  
**NATIONAL PREPAREDNESS LEVEL 5**

**CURRENT SITUATION:**

Initial attack activity was light across the nation. Nationally, 145 new fires were reported. No new large fires were reported. Four large fires were contained, three in the Northwest Area and one in the Eastern Great Basin Area. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington and Wyoming.

**NORTHWEST AREA LARGE FIRES:**

Priorities are being established by the Northwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Mann) is assigned to manage large fires in southeast Oregon. An Area Command Team (Williams-Rhodes) is assigned to manage large fires on the Malheur and Ochoco National Forests. An Area Command Team (Ribar) is assigned to manage large fires in southwest Oregon.

FLORENCE, Siskiyou National Forest. A Type 1 Incident Management Team (Lohrey) is assigned. A Type 1 Incident Management Team (Martin) has been ordered. This fire is 26 miles west of Grants Pass, OR in mixed conifer and brush. Fire behavior was limited to minor uphill runs. Crews and engines made good progress with a burnout on the east flank. Steep, inaccessible terrain is hampering containment efforts. The Illinois River Valley is under a 24 hour evacuation notice. Structure protection is in place; 3400 residences, 250 commercial properties and 2200 outbuildings are threatened.

TIMBERED ROCK, Southwest Oregon District, Oregon Department of Forestry. An Oregon Department of Forestry Incident Management Team (Thorpe) is assigned. This fire is 15 miles north of Shady Cove, OR. No new information was reported.

SOUR BISCUIT, Siskiyou National Forest. A Type 1 Incident Management Team (Bennett) and a Type 2 Incident Management Team (Broyles) are assigned. This fire is 17 miles southwest of Cave Junction, OR. Creeping and occasional torching was observed in mixed conifer and brush. Difficult terrain and dry fuels are hampering containment efforts. Helicopters are assisting as dozers and crews construct fireline on the east flank and around spot fires.

TILLER COMPLEX, Umpqua National Forest. A Type 2 Incident Management Team (Walker) is assigned. This complex is comprised of 94 reported fires on the Tiller Ranger District and in the Rogue-Umpqua Divide Wilderness Area, east of Tiller, OR in grass, brush and timber. Crews are constructing fireline and mopping up. Fifteen residences are threatened.

FLAGTAIL-MALHEUR COMPLEX, Malheur National Forest. A Type 1 Incident Management Team (Wood) is assigned. This complex, consisting of the Flagtail, Roberts, Easy and several smaller fires, is burning in mixed conifer forest, eight to 25 miles south of Prairie City, OR. Wind shifts contributed to torching and spotting. Crews are constructing fireline and mopping up.

DEER POINT, Wenatchee National Forest. A transfer of command from Vail's Type 1 Incident Management Team to Furlong's Type 2 Incident Management Team will occur at 0600 PDT today. This fire is 27 miles north of Chelan, WA. Torching and low intensity running was observed in mixed brush, ponderosa pine and lodgepole pine. Crews are burning out and mopping up. Steep, rugged terrain and spotting are impeding containment efforts. Seventy-five residences are threatened in and surrounding the communities of Manson and Chelan.

TOOL BOX COMPLEX, Fremont National Forest. A transfer of command from Gelobter's Type 1 Incident Management Team to Hefner's Type 1 Incident Management Team will occur at 0600 PDT today. This complex consists of the Tool Box, Silver and Lava fires which are approximately ten miles south of Silver Lake, OR in sage, ceanothus and mixed conifer. Interior burning was observed. Crews are mopping up. Sixty residences, a major power line and an extensive communications site are threatened; structure protection is in place.

MONUMENT, Malheur National Forest. A Type 2 Incident Management Team (Morcom) is assigned. U.S. Army Task Force Destroyer (1/5 FA 1<sup>st</sup> Battalion, 5<sup>th</sup> Regiment) commanded by Lt. Col. David R. Byrn Sr., at Ft. Riley, KS, is assigned. This fire is nine miles southwest of Unity, OR in mixed conifer forest, ponderosa pine and grass. Crews are rehabilitating established fireline and mopping up.

## **SOUTHERN CALIFORNIA AREA LARGE FIRES:**

PINES, San Diego Unit, California Department of Forestry and Fire Protection. A California Department of Forestry and Fire Protection Type 1 Incident Command Team (Ristow) is assigned. This fire is near the town of Julian, CA in sage, chaparral, manzanita and timber. Extreme fire behavior was observed. Crews and dozers are constructing fireline, engines are providing structure protection. Hwy 78 is closed in the vicinity of the fire. Evacuations are in effect for several communities; 350 residences, numerous commercial properties and 100 outbuildings are threatened. Three residences and six additional structures were confirmed lost.

MCNALLEY, Sequoia National Forest. A Type 1 Incident Management Team (Humphrey) is assigned. This fire is burning in heavy brush and mixed conifer forest 12 miles north of Kernville, CA. Crews are mopping up and patrolling. The Giant Sequoia National Monument and 12 residences are threatened; structure protection is in place.

## **ROCKY MOUNTAIN AREA LARGE FIRES:**

PANORAMA, Garfield County. This fire is five miles north of El Jebel, CO in sage, oakbrush, pinyon pine and juniper. Fire activity was limited to smouldering and occasional spotting. Structure protection is in place. Two residences and one additional structure were confirmed lost.

LONG MESA, Mesa Verde National Park. A Type 2 Incident Management Team (Sisk) is assigned. This fire is nine miles southeast of Cortez, CO in pinyon pine and juniper. Isolated torching was observed. The Mesa Verde National Park has been closed and evacuated. Eighty residences and several of the National Park's offices and management buildings are threatened; structure protection is in place.

HORSE LOOKING, Rosebud Agency, Bureau of Indian Affairs. This fire is northwest of St. Francis, SD in grass and ponderosa pine. Creeping and occasional torching fire behavior was observed. Evacuated residents of St. Francis were allowed to return to their homes. Crews are constructing fireline. Engines are providing structure protection for 20 threatened residences, one commercial property and several other structures.

NORTH BARCUS, Craig District, Bureau of Land Management. This fire is 20 miles east of Rangely, CO in sage, pinyon pine and juniper. Personnel are patrolling and mopping up.

HENSEL, Medicine Bow National Forest. This fire is burning in bug kill ponderosa pine 20 miles northwest of Wheatland, WY. Interior burning was observed.

#### **NORTHERN CALIFORNIA AREA LARGE FIRES:**

STANZA, Klamath National Forest. A Type 1 Incident Management Team (Raley) is assigned. This fire is burning in mixed conifer old growth ten miles south of Happy Camp, CA. Creeping and isolated torching was observed. Personnel are performing burn out operations and mopping up.

SHELLY CREEK, Six Rivers National Forest. A Type 2 Incident Management Team (Szczepanik) is assigned. This fire is ten miles east of Gasquet, CA in heavy brush and mixed conifer forest. Lower temperatures and higher relative humidity minimized fire behavior. Crews are patrolling and mopping up. Highway 199 has been reopened.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

SHELLY CREEK	CA	SRF	850	95	8/2	573	13	18	5	0	1.5M

#### **EASTERN GREAT BASIN AREA LARGE FIRES:**

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

GARDEN VALLEY COMPLEX, Boise National Forest. A Type 2 Incident Management Team (Brunner) is assigned. This complex, burning in sage, lodgepole pine and subalpine fir, consists of four major and several smaller fires northeast of Garden Valley, ID. Crews are mopping up.

SEQUOIA, Dixie National Forest. This fire is 26 miles southwest of Cedar City, UT in chaparral and ponderosa pine. Fire activity was limited to smouldering and creeping. Helicopters are mopping up.

UOA = Uintah and Ouray Agency, Bureau of Indian Affairs

## WESTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

BUSTER, Ely Field Office, Bureau of Land Management. This fire is 15 miles northeast of Pioche, NV in sage, pinyon pine and juniper. Extreme fire behavior with torching, spotting and running was observed on the southwest flank. Difficult terrain and limited access are hampering containment efforts. Reduction in acreage was due to better mapping.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
BUSTER	NV	ELD	4,750	5	8/20	183	7	4	1	0	NR

## NORTHERN ROCKIES AREA LARGE FIRES:

RED WAFFLE, Custer National Forest. This fire is 35 miles southeast of Bridger, MT in ponderosa pine, brush and grass. Occasional flare-ups with spotting was observed. Personnel are mopping up.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
RED WAFFLE	MT	CNF	6,000	95	8/15	13	0	2	1	0	1.7M

## OUTLOOK:

**\*\*\*A RED FLAG WARNING HAS BEEN POSTED IN CENTRAL AND NORTHEAST OREGON FOR STRONG WINDS AND LOW RELATIVE HUMIDITY\*\*\***

**\*\*\*A FIRE WEATHER WATCH HAS BEEN ISSUED FOR SOUTH CENTRAL AND SOUTHEAST MONTANA FOR HIGH WINDS, LOW RELATIVE HUMIDITY AND THUNDERSTORMS\*\*\***

The Northwest Area can expect partly sunny skies with a chance of showers in Washington. High temperatures will be in the 60's along the coast, 70's and 80's inland except near 90 in southwest Oregon. Minimum relative humidity will be above 50 percent in western Washington and will range from 10 to 25 percent elsewhere. Winds will be southwest to west at 10 to 20 mph with gusts to 30 mph on the east slopes of the Cascade Mountains.

Mostly sunny skies are expected over the Southern California Area. High temperatures will be in the 70's to 80's in the mountains and coastal areas, 90's to 100 in inland valleys and deserts. Minimum relative humidity will range from 15 to 45 percent in the mountains and inland valleys, 10 to 20 percent in the deserts and 40 to 70 percent in coastal areas. Winds will be onshore at 8 to 18 mph on the coast, southwest to northwest at 10 to 20 mph elsewhere.

The Rocky Mountain Area can expect isolated to scattered wet thunderstorms. High temperatures will be from the mid 60's to near 90 and minimum relative humidity will range from 15 to 35 percent. Winds will be light and variable, gusting near thunderstorms.

High pressure will bring mostly sunny skies to the Northern California Area. High temperatures will be in the mid 60's and 70's along the coast and 80's to 90's inland. Minimum relative humidity will range from 14 to 22 percent inland and above 50 percent near the coast. Winds will be southwest to northwest at 8 to 18 mph.

The Western Great Basin Area can expect partly sunny skies with isolated thunderstorms in the east. Temperatures will be in the mid 80's to 103. Minimum relative humidity will range from 8 to 15 percent. Winds will be southwest to west at 5 to 15 mph.

Partly sunny skies and widely scattered thunderstorms are forecast for the Eastern Great Basin Area. Temperatures will be in the mid 70s to mid 90's in the north and 90s to 105 in the south. Minimum relative humidity will range from 12 to 25 percent in the mountains and 5 to 18 percent at lower elevations. Winds will be southwest to west at 10 to 20 mph, gusting to 35 mph.

The Northern Rockies Area can expect partly sunny skies with isolated dry thunderstorms. High temperatures will be in the 70's in North Dakota, mid 90's in northern Idaho and 80's elsewhere. Minimum relative humidity will range from 25 to 35 percent in the east to 15 to 25 percent in the west. Winds will be northwest at 15 to 25 mph in North Dakota, southeast at 5 to 15 mph in eastern Montana and variable elsewhere.

## **FALLING SNAGS**

Falling snags (dead, standing trees without leaves or needles in the crowns) present a significant hazard to wildland firefighters. Snags typically have much lower fuel moisture than live, green trees; and they burn more readily. In the process, they often throw spot fires far in advance of the main fire and often burn through more quickly than green trees, falling with little or no warning.

- ! The risk of injuries from falling snags increases during the night operational period when visibility is greatly reduced.
- ! While the cooler, nighttime period is generally a more effective time to gain control of wildfires, the increased risk from unseen falling snags may limit the widespread use of crews at night in areas of dead and dying timber.
- ! Environmental conditions that increase risk from falling snags:
  - Strong winds
  - Night operations
  - Steep slopes
  - Diseased or bug-killed areas
- ! Things to consider when assessing the potential hazards of both snags and green trees:
  - Trees have been burning for an extended period.
  - High-risk tree species (those that are known for rot and shallow root systems) are in the area.
  - Numerous downed trees
  - Dead or broken tips and limbs overhead
  - Accumulation of downed limbs
  - Absence of needles, bark or limbs
  - Leaning or hung-up trees
- ! Mitigation measures to take:
  - Identify and flag all high-risk snags and green trees.
  - Keep personnel out of the high-risk areas until the hazard has been removed.

- Establish lookouts.
