

**INCIDENT MANAGEMENT SITUATION REPORT
SUNDAY, AUGUST 4, 2002 0530 MDT
NATIONAL PREPAREDNESS LEVEL 5**

CURRENT SITUATION:

Initial attack activity was moderate in the Northwest Area and light elsewhere. Nationally, 163 new fires were reported. Eight of these became large fires, six in the Alaska Area and two in the Southern Area. Two large fires were contained, one each in the Rocky Mountain and Northwest Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Idaho, Kansas, Montana, Nevada, Oregon, Utah, Washington and Wyoming.

NORTHWEST AREA LARGE FIRES:

Priorities are being established by the Northwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Williams-Rhodes) is assigned to manage large fires on the Malheur and Ochoco National Forests. An Area Command Team (Ribar) is assigned to manage large fires in southwestern Oregon and northern California.

FLORENCE, Siskiyou National Forest. Two Type 1 Incident Management Teams (Lohrey and Martin) are assigned. This fire is 26 miles southwest of Grants Pass, OR. Plume dominated fire behavior was observed in mixed conifer forest and brush as the fire advanced north to the top of Fish Hook Peak and into the Indigo Creek drainage. Six miles of fireline were successfully burned out on the east flank. The Illinois River Valley is under a 24 hour evacuation advisory; 3,619 residences and 250 commercial properties are threatened. One additional residence was confirmed lost during the initial phases of the fire.

SOUR BISCUIT, Siskiyou and Six Rivers National Forests. A Type 1 Incident Management Team (Bennett) and a Type 2 Incident Management Team (Broyles) are assigned. This fire is burning on both sides of the California-Oregon border, 17 miles southwest of Cave Junction, OR. Active fire behavior was observed in mixed conifer forest and brush. Dozer and handline construction is underway in the foothills west of the Illinois River Valley. Crews are improving and constructing fireline, mopping up and cold trailing on several divisions.

TIMBERED ROCK, Southwest Oregon District, Oregon Department of Forestry. An Oregon Department of Forestry Incident Management Team (Thorpe) is assigned. This fire is 15 miles north of Shady Cove, OR. Torching and spotting were observed in old growth timber and heavy dead and down slash. A burn out operation was successfully completed on the west flank and is underway on the north and northeast perimeters. Residents of Upper Elk Creek and along Sugar Pine Road were allowed to return to their homes. Several residences and outbuildings are threatened; structure protection is in place.

TILLER COMPLEX, Umpqua National Forest. A Type 2 Incident Management Team (Walker) is assigned. A Type 1 Incident Management Team (Stutler) has been ordered. US Army Task Force Destroyer (1st Battalion, 5th Field Artillery Regiment) commanded by Lt. Col. David R. Byrn Sr., at Ft. Riley, KS is assigned. This complex, consisting of eight large and numerous small fires, is on the Tiller Ranger District and in the Rogue-Umpqua Divide Wilderness Area, east of Tiller, OR. Moderate fire behavior with short crown runs was observed in grass, brush and timber. Crews are building indirect and direct fireline, burning out where appropriate, and scouting for new fire starts.

DEER POINT, Wenatchee National Forest. A Washington Interagency Incident Management Team (Furlong/Gormley) is assigned. This fire is seven miles northwest of Chelan, WA. Low intensity runs were observed in sagebrush, ponderosa pine and lodgepole pine. Burn out operations on the northeast flank near Parrish Peak and Cooper Ridge are underway. Crews are mopping up, improving handline and rehabilitating dozer line. The communities of Manson and Chelan remain threatened.

TOOL BOX COMPLEX, Fremont National Forest. A Type 1 Incident Management Team (Hefner) is assigned. This complex, comprised of the Tool Box, Silver, Lava and Winter fires, is approximately ten miles south of Silver Lake, OR. Smouldering, creeping and isolated interior torching were observed in sagebrush, juniper, fir and ponderosa pine. Crews made good progress rehabilitating containment lines and mopping up.

MONUMENT, Malheur National Forest. A Type 2 Incident Management Team (Morcom) is assigned. This fire is nine miles southwest of Unity, OR. Smouldering and creeping were observed in mixed conifer forest, ponderosa pine and sagebrush. Crews are mopping up and rehabilitating firelines.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

PINES, San Diego Unit, California Department of Forestry and Fire Protection (CDF). A CDF Type 1 Incident Command Team (Ristow) is assigned. This fire is one half mile southeast of Julian, CA. Extreme fire behavior with flame lengths exceeding 200 feet, strong downhill runs, and long range spotting was observed in chaparral and bug kill timber. The fire jumped containment lines on the north flank and has burned onto the Anza-Borrego Desert State Park. Burn out operations have been completed on the south flank. Crews and dozers are building fireline with support from aerial resources. Evacuations are underway in areas of the San Felipe Valley, eastern Volcan

Mountains and Matagual Valley. An advisory evacuation has been issued to residents in the Ranchita and Montezuma Valley areas. Whispering Pines, Julian and Kentwood-in-the-Pines remain evacuated. Three additional residences and one outbuilding were confirmed lost. Highway 78 is closed.

MCNALLY, Sequoia National Forest. A Type 1 Incident Management Team (Humphrey) is assigned. A Type 1 Incident Management Team (Studebaker) has been ordered. This fire is burning in heavy brush and mixed conifer forest nine miles north of Kernville, CA. A significant easterly run into the Domeland Wilderness Area was observed. Crews initiated fireline construction on a slopover at the head of Rattlesnake Drainage and secondary line to Baker Point in preparation for a burn out. Twelve residences remain threatened; structure protection is in place.

EASTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

CATHEDRAL ROCK, Salmon-Challis National Forest. A Type 2 Incident Management Team (Saleen) will assume command today. This fire is burning on both sides of the Continental Divide, 35 miles north-northwest of Salmon, ID. Moderate fire behavior with group tree torching and medium range spotting was observed in lodgepole pine, spruce and fir. Crews are building direct attack fireline with support from hose lays and aerial resources.

GARDEN VALLEY COMPLEX, Boise National Forest. A Type 2 Incident Management Team (Brunner) is assigned. This complex consists of 17 fires northeast of Garden Valley, ID. Smouldering, creeping, intermittent torching and short range spotting were observed in sagebrush, lodgepole pine and subalpine fir. Crews made good progress constructing fireline on two of the newest fires in the complex. Mop-up is underway on the remaining fires.

SEQUOIA, Dixie National Forest. This fire is 26 miles southwest of Cedar City, UT. Creeping and smouldering were observed in chaparral and ponderosa pine. Crews are gridding for hot spots and monitoring inaccessible areas.

ROCKY MOUNTAIN AREA LARGE FIRES:

TOLLMAN, Niobrara County. This fire is burning on both sides of the Wyoming-Nebraska border, 18 miles northeast of Lusk, WY. Running, torching and crowning were observed in grass, sagebrush and ponderosa pine as the fire advanced south and east. Engine crews are burning out a large section of fireline on the west flank. Seven residences and associated outbuildings are threatened; structure protection is in place.

LONG MESA, Mesa Verde National Park. A Type 2 Incident Management Team (Sisk) is assigned. This fire is nine miles southeast of Cortez, CO. Precipitation limited fire behavior to smoldering in pinyon pine and juniper. Crews are completing handline construction, mopping up and rehabilitating firelines. Mesa Verde National Park remains evacuated and is closed to the public. Eighty residences and several National Park buildings are threatened; structure protection is in place.

HENSEL, Medicine Bow National Forest. This fire is burning in bug kill ponderosa pine 20 miles northwest of Wheatland, WY. Personnel are mopping up hot spots.

HORSE LOOKING, Rosebud Agency, Bureau of Indian Affairs. This fire is burning in grass and ponderosa pine northwest of St. Francis, SD. No new information was reported. This will be the last report unless new information is received.

CRD = Craig District, Bureau of Land Management

ALASKA AREA LARGE FIRES:

NORTH FORK, Southwest Area Forestry, Alaska Division of Forestry. A Type 2 Incident Management Team (Kurth) is assigned. This fire is two miles north-northwest of Medfra, AK. Running, intermittent spotting and crowning were observed in black spruce, muskeg and hardwood forest. Gusty north-northwest winds and heavy smoke impeded aerial operations, necessitating the use of water borne craft to access the fire area. Crews are providing structure protection to the community of Medfra.

GESKAMINA LAKE, Tanana Zone, Bureau of Land Management. This fire is 70 miles west of Fairbanks, AK near the community of Lake Minchumina. Running and crowning were observed in black spruce, taiga, muskeg and hardwood forest. Heavy ash fall and smoke are hampering accurate fire mapping and limiting aerial operations. Personnel are providing structure protection.

MINCHUMINA GROUP, Tanana Zone, Bureau of Land Management. This group of fires, consisting of the Sischu, John Hansen Lake, John Hansen Creek and Moose Lake fires, is northwest of Lake Minchumina, AK. Running, crowning and torching were observed in black spruce, taiga, muskeg and hardwood forest. All fires in the area are very active, some with flaming fronts in excess of ten miles wide. Smokejumpers and crews are providing structure protection to threatened cabins along the northwest and north sides of Lake Minchumina.

WESTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

BUSTER, Ely Field Office, Bureau of Land Management. This fire is 15 miles northeast of Pioche, NV. Torching was observed on the southwest perimeter in sagebrush, pinyon pine and juniper. Crews are constructing fireline and mopping up on the north, south and west flanks. Difficult terrain, limited access and gusty winds are hampering containment efforts.

BUSTER	NV	ELD	4,214	40	8/20	209	5	4	1	0	NR

SOUTHERN AREA LARGE FIRES:

PARCHED CORN BAY, Alligator River National Wildlife Refuge. This fire is two miles south of Stumpy Point, NC. Moderate fire behavior with 30 foot flame lengths and spotting up to 1/2 mile ahead of the front was observed in scrub pine and marsh grass.

JR, Texas State Forest Service. This fire is 78 miles north of Houston, TX. Several crown runs were observed in a pine plantation. The fire jumped containment lines due to gusty winds from a passing thunder cell. Dozers are building fireline and personnel are mopping up.

OUTLOOK:

*****A RED FLAG WARNING HAS BEEN POSTED IN SOUTHERN, CENTRAL AND EASTERN NEVADA FOR STRONG SOUTHWEST WINDS AND LOW RELATIVE HUMIDITY*****

*****A RED FLAG WARNING HAS BEEN POSTED IN THE MOUNTAINS AND WESTERN VALLEYS OF UTAH FOR GUSTY SOUTH-SOUTHWEST WINDS, LOW RELATIVE HUMIDITY AND HIGH HAINES INDEX*****

A deepening upper level trough over the Northwest Area will bring mostly sunny skies east of the Cascade Mountains and scattered showers to the west. High temperatures will be in the 60's, 70's and 80's. Minimum relative humidity will be in the upper teens in eastern Oregon and eastern Washington, 25 to 35 percent in southwestern Oregon and along the east slopes of the Cascade Mountains, and above 70 percent in western Washington. Winds will be southwest to northwest at 8 to 16 mph with gusts to 35 mph.

The Southern California Area can expect mostly sunny skies with morning low clouds and fog along the coast. High temperatures will be upper 60's to mid 70's near the coast, mid 70's to low 90's in the mountains and inland, and in the 90's to 110 in the deserts. Minimum relative humidity will range from 8 to 25 percent in the mountains and deserts, 35 to 55 percent in the valleys, and above 50 percent in coastal areas. Winds will be onshore at 8 to 18 mph along the coast and southwest to west at 12 to 22 mph elsewhere.

A drier airmass moving into the Rocky Mountain Area will bring partly to mostly sunny skies with isolated to widely scattered thunderstorm activity. High temperatures will be in the 60's and 70's in the mountains and 85 to 95 at lower elevations. Minimum relative humidity will range from 15 to 30 percent at lower elevations and 25 to 35 percent in the mountains. Winds will be variable at 10 to 20 mph with gusts to 45 mph near thunderstorms.

The Eastern Great Basin Area can expect mostly sunny skies in Utah and partly cloudy skies with a chance of afternoon thunderstorms in southern Idaho. High temperatures will be in the 80's to 100 at lower elevations and upper 60's to mid 80's in the mountains. Minimum relative humidity will range from 5 to 19 percent in Utah and 9 to 32 percent in the remainder of the area. Winds will be south to southwest at 20 to 30 mph with gusts to 40 mph in Utah, and 10 to 20 mph elsewhere.

The Western Great Basin Area can expect mostly sunny skies and high temperatures in the upper 70's to upper 90's. Minimum relative humidity will range from 12 to 18 percent and winds will be southwest at 15 to 35 mph with stronger gusts at higher elevations.

Low pressure along the Gulf of Mexico will bring scattered afternoon showers as far north as South Carolina in the Southern Area. High temperatures will be in the 80's and 90's and minimum relative humidity will be generally above 40 percent. Winds will be light and variable.
