

**INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY, AUGUST 7, 2002 0530 MDT
NATIONAL PREPAREDNESS LEVEL 5**

CURRENT SITUATION:

Initial attack activity was light across the nation. Nationally, 203 new fires were reported. Two of these became large fires, one each in the Alaska and Eastern Areas. Three large fires were contained, one each in the Northwest, Rocky Mountain and Southern Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Idaho, Kansas, Montana, Nebraska, Nevada, North Dakota, Oregon, South Dakota, Utah, Washington and Wyoming.

NORTHWEST AREA LARGE FIRES:

Priorities are being established by the Northwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Ribar) is assigned to manage large fires in southwestern Oregon and northern California.

FLORENCE, Siskiyou National Forest. Two Type 1 Incident Management Teams (Lohrey and Martin) are assigned. This fire is 26 miles southwest of Grants Pass, OR. Moderate fire behavior with interior burning and creeping was observed in mixed conifer forest and brush. Crews are constructing direct and indirect fireline and preparing roads in preparation for a burn out. The Illinois River Valley remains under an evacuation advisory; 3,429 residences and 250 commercial properties are threatened; structure protection is in place.

SOUR BISCUIT, Siskiyou and Six Rivers National Forests. Two Type 1 Incident Management Teams (Bennett and Lohrey) are assigned. This fire is burning on both sides of the California-Oregon border, 17 miles southwest of Cave Junction, OR. Low to moderate fire behavior was observed in mixed conifer forest and brush. Crews have successfully completed indirect fireline to the California-Oregon border with the aid of dozers and fireline explosives. Reduction in acreage was due to better mapping.

TIMBERED ROCK, Southwest Oregon District, Oregon Department of Forestry. An Oregon Department of Forestry Incident Management Team (Thorpe) is assigned. This fire is 15 miles north of Shady Cove, OR. Minimal fire behavior with isolated torching was observed in old growth timber and heavy slash. Heavy fuels are making mop up slow and difficult.

TILLER COMPLEX, Umpqua National Forest. A Type 1 Incident Management Team (Stutler) and US Army Task Force Destroyer (1st Battalion, 5th Field Artillery Regiment) commanded by Lt. Col. David R. Byrn Sr., at Ft. Riley, KS are assigned. A Type 1 Incident Management Team (Hart) has been ordered. This complex, consisting of eight large and numerous small fires, is on the Tiller Ranger District and in the Rogue-Umpqua Divide Wilderness Area, 25 miles east of Canyonville, OR. Low intensity fire behavior with occasional torching and crowning was observed in grass, brush and timber. Crews are burning out where appropriate and building indirect and direct fireline. Structure protection is in place in Ash Valley.

DEER POINT, Wenatchee National Forest. A Washington Interagency Incident Management Team (Furlong/Gormley) is assigned. This fire is seven miles northwest of Chelan, WA and is burning in sagebrush, ponderosa pine and lodgepole pine. Fire behavior included creeping and smouldering, with some group torching in unburned islands in the interior and in the Grade Creek drainage. Crews are mopping up, improving and rehabilitating fireline.

MONUMENT, Malheur National Forest. A Type 2 Incident Management Team (Morcom) is assigned. This fire is nine miles southwest of Unity, OR. Minimal fire activity was observed in mixed conifer forest, ponderosa pine and sagebrush. Crews are gridding for hot spots.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

Priorities are being established by the California Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

PINES, San Diego Unit, California Department of Forestry and Fire Protection (CDF). A CDF Type 1 Incident Command Team (Ristow) is assigned. This fire is burning one half mile southeast of Julian, CA in chaparral and bug kill timber. Extreme fire behavior with fire whirls and running was observed. Personnel are building indirect attack fireline. The Ranchita subdivision, a Boy Scout camp in Lost Valley and the Los Coyotes Indian Reservation remain evacuated; structure protection is in place. Six additional residences and 31 outbuildings are confirmed lost. Local road closures are in effect.

MCNALLY, Sequoia National Forest. A Type 1 Incident Management Team (Studebaker) is assigned. This fire is burning in heavy brush and mixed conifer forest, nine miles north of Kernville, CA. Active fire behavior with short runs and spotting was observed. Crews are improving fireline and mopping up with assistance from aerial resources. Twelve residences remain threatened.

ALASKA AREA LARGE FIRES:

Priorities are being established by the Alaska Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

KETCHEM CREEK, Upper Yukon Zone, Bureau of Land Management. A Type 2 Incident Management Team (McKnight) is assigned. This fire is three miles northeast of Circle Hot Springs, AK. Strong winds resulted in active fire behavior with intermittent torching in black spruce, taiga and hardwood forest. Aerial resources and personnel are securing the south and west flanks.

NORTH FORK, Southwest Area Forestry, Alaska Division of Forestry. A Type 2 Incident Management Team (Kurth) is assigned. This fire is two miles north-northwest of Medfra, AK. The fire is burning in black spruce, muskeg and hardwood forest. Crews are constructing direct attack handline along the west flank. An evacuation plan has been completed for the community of Medfra; structure protection is in place. Heavy smoke impeded aerial operations.

GESKAMINA LAKE, Tanana Zone, Bureau of Land Management. This fire is 70 miles west of Fairbanks, AK near the community of Lake Minchumina. Gusty winds produced a significant run to the east in black spruce, taiga, muskeg and hardwood forest. Heavy smoke is hampering accurate fire mapping and limiting aerial operations. Structure protection is in place along the Kantishna River.

MINCHUMINA GROUP, Tanana Zone, Bureau of Land Management. This group of fires, consisting of the Sischu, John Hansen Lake, John Hansen Creek and Moose Lake fires, is northwest of Lake Minchumina, AK. Torching and creeping fire activity was observed in black spruce, taiga, muskeg and hardwood forest. Personnel are providing structure protection to threatened cabins along the northwest and north sides of Lake Minchumina. Heavy smoke is impeding fire mapping.

KOCACHO #2, Upper Yukon Zone, Bureau of Land Management. This fire is 20 miles northeast of Venetie, AK in black spruce and tussock tundra. Very active fire behavior was observed on the northeast flank with moderate activity observed elsewhere.

REINDEER, State of Alaska Division of Forestry. Active fire behavior was observed in black spruce, tussock tundra and hardwood 40 miles east of the town of Holy Cross, AK. Smokejumpers are setting up structure protection around several residences and outbuildings.

GOBLET CREEK, Galena Zone, Bureau of Land Management. This fire is eight miles west of Grayling, AK. Observed fire behavior included occasional torching and short runs in black spruce. Crews are constructing direct attack fireline. Steep terrain is hampering containment efforts.

EASTERN GREAT BASIN AREA LARGE FIRES:

GARDEN VALLEY COMPLEX, Boise National Forest. A Type 2 Incident Management Team (Murphy) is assigned. This complex consists of 23 fires northeast of Garden Valley, ID. Minimal fire behavior was observed in sagebrush, lodgepole pine and subalpine fir. Crews made good progress constructing fireline and mopping up with assistance from aerial resources.

KING HILL, Payette National Forest. A Type 2 Incident Management Team (Suwyn) is assigned. This fire is burning in grass and sagebrush, five miles southeast of Indian Valley, ID. Fire behavior was moderated by good relative humidity recovery. Crews are patrolling and mopping up. Reduction in acreage was due to better mapping.

CATHEDRAL ROCK, Salmon-Challis National Forest. A Type 2 Incident Management Team (Saleen) is assigned. This fire is burning on both sides of the Continental Divide, 35 miles north-northwest of Salmon, ID. Creeping and smouldering fire activity was observed in lodgepole pine, spruce and fir. Crews are constructing direct attack handline, gridding for hot spots and mopping up.

SEQUOIA, Dixie National Forest. This fire is 26 miles southwest of Cedar City, UT. Short runs, creeping and smouldering fire activity was observed in chaparral and ponderosa pine. Crews are improving and patrolling fireline.

HORSE BUTTE, Upper Snake River District, Southern Idaho Area, Bureau of Land Management. This fire is 14 miles east of Burley, ID in grass, brush, juniper and pinyon pine. Torching was observed in pockets of juniper. Personnel are rehabilitating fireline and mopping up.

SOUTHERN AREA LARGE FIRES:

PARCHED CORN BAY, Alligator River National Wildlife Refuge. This fire is four miles south of Stumpy Point, NC. Moderate fire behavior was observed in scrub pine, pocosin and marsh grass. Personnel are constructing and improving fireline. Due to heavy smoke, Highway 264 is open during daylight hours only.

SAMPSON, Cherokee National Forest. This fire is burning seven miles southwest of Erwin, TN in bug kill timber and hardwood litter. Minimal fire behavior with creeping was observed. Personnel are improving handline and mopping up.

EASTERN AREA LARGE FIRES:

BLUE MOUNTAIN, Pennsylvania State Forestry. This fire is burning in oak woodland, six miles east of Palmerton, PA. Crews are constructing and holding fireline in steep, rocky terrain.

SOMERSET COMPLEX, Maryland Department of Natural Resources Forest Service. This complex consists of five fires burning in pine near the town of Shelltown, MD. High winds and lower relative humidity are hampering containment.

OUTLOOK:

A low pressure system lingering over the Northwest Area will bring partly to mostly cloudy skies with showers in western Washington and northwest Oregon.

The Southern California Area can expect sunny skies with morning low clouds and fog along the coast and in the coastal valleys. High temperatures will be in the 70's near the coast, in the 70's to mid 90's in the mountains and inland valleys, and in the 90's to 112 in the deserts. Minimum relative humidity will range from 8 to 23 percent in the mountains and deserts, 15 to 25 percent inland, and above 30 percent in coastal areas. Winds will be onshore at 7 to 15 mph along the coast and southwest to west at 8 to 18 mph elsewhere.

A southwest flow over the Eastern Great Basin Area will bring mostly sunny skies with widely scattered thunderstorms over eastern Utah and central Idaho. High temperatures will be 70 to 85 in southern Idaho and 85 to 100 in Utah. Minimum relative humidity will range from 5 to 15 percent in western Utah and 15 to 35 percent elsewhere. Winds will be southwest at 10 to 20 mph with gusts to 35 mph at higher elevations.

The Western Great Basin Area can expect partly sunny skies. High temperatures will be near 100 in the south and in the 80's elsewhere. Minimum relative humidity will range from the single digits to teens and winds will be north to northeast at 5 to 15 mph.

Monsoonal moisture moving into the Rocky Mountain Area will bring partly sunny skies with isolated to scattered wet thunderstorm activity in Colorado and eastern Wyoming. High temperatures will be in the 60's and 70's in the mountains and mid 80's to low 90's at lower elevations. Minimum relative humidity will range from 15 to 30 percent at lower elevations and 30 to 40 percent in the mountains. Winds will be southwest at 10 to 25 mph in western Wyoming, and variable at 10 to 20 mph elsewhere.

A weakening cold front moving south across the Appalachian Mountains will bring scattered showers to the central portion of the Southern Area and remnants of tropical storm Bertha will bring showers to the lower Mississippi River Valley region. A slight chance of thunderstorms are forecast in southern Florida with mostly sunny skies predicted elsewhere. High temperatures will be in the 80's and 90's and minimum relative humidity will generally be above 30 percent. Winds will be north or east at 10 to 15 mph.

www.nifc.gov/sixminutes/index_j.asp

RETARDANT DROP SAFETY

Having retardant dropped on a fire should be a routine event. However, there are risks associated with retardant drops that can pose serious threats to personnel and equipment. Consider the following for all drops:

Be aware of the location of lead planes and airtankers during retardant drop operations.

Be sure you have positive contact with the lead plane or airtanker before the drop.

Personnel can be injured by the impact of retardant drops. Clear personnel out of the target area when the drop is conducted. If an individual is unable to retreat to a safe place, the best method for minimizing injury from the drop is to:

Hold your handtool away from your body.

Lie face down with hardhat in place and head toward the oncoming aircraft.

Grasp something firm to prevent being carried or rolled about by the retardant.

Do not run unless escape is ensured.

Get clear of dead snags and tops.

Be aware of rolling debris below the drop site in steep terrain.

Working in an area covered by retardant should be done with caution due to slippery surfaces.

If possible, wash the retardant off your skin to prevent irritation.
