

**INCIDENT MANAGEMENT SITUATION REPORT  
FRIDAY, AUGUST 9, 2002 0530 MDT  
NATIONAL PREPAREDNESS LEVEL 5**

**CURRENT SITUATION:**

Initial attack activity was moderate in the Southern California and Rocky Mountain Areas and light elsewhere. Nationally, 210 new fires were reported. No new large fires were reported and one large fire was contained in the Eastern Area. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Idaho, Kansas, Massachusetts, Montana, Nebraska, Nevada, North Dakota, Oregon, South Dakota, Utah, Washington and Wyoming.

**NORTHWEST AREA LARGE FIRES:**

Priorities are being established by the Northwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Ribar) is assigned to manage large fires in southwestern Oregon and northern California. An Area Command Team (Mann) has been ordered.

FLORENCE, Siskiyou and Six Rivers National Forests. A Unified Command between three Type 1 Incident Management Teams (Lohrey, Martin, Bennett) and the Oregon Department of Forestry (Sifford, Spichart, Oman) is in place. Command of the northwest portion will transfer from Martin's Type 1 Incident Management Team to Bright's Type 2 Incident Management Team at 0600 PDT. This fire is burning on both sides of the California-Oregon border in mixed conifer forest and brush, 26 miles southwest of Grants Pass, OR. Strong winds and low relative humidity increased fire behavior with running and spotting observed. Crews are suppressing a slopover in Periodtite Canyon on the south flank in California. Burnout operations are nearing completion on the east flank in Oregon and have been initiated on the northwest perimeter. Crews are constructing direct and indirect fireline and burning out on the west flank. The Illinois River Valley remains under an evacuation advisory; structure protection is in place. Cave Junction, Kerby, Selma, Agness, Gardner Ranch and McCaleb Ranch are threatened.

TILLER COMPLEX, Umpqua National Forest. A transfer of command from Stutler's Type 1 Incident Management Team to Hart's Type 1 Incident Management Team will occur on August 10<sup>th</sup>. US Army Task Force Destroyer (1<sup>st</sup> Battalion, 5<sup>th</sup> Field Artillery Regiment) commanded by Lt. Col. David R. Byrn Sr., at Ft. Riley, KS is assigned. This complex, consisting of eight large and numerous small fires, is on the Tiller Ranger District and in the Rogue-Umpqua Divide Wilderness Area, 25 miles east of Canyonville, OR. Active fire behavior with increased spotting, torching and running was observed in grass, brush and timber. Crews are building indirect and direct attack fireline and burning out where appropriate. Structure protection is in place in Ash Valley.

TIMBERED ROCK, Southwest Oregon District, Oregon Department of Forestry. This fire is 15 miles north of Shady Cove, OR. Active fire behavior was observed in the interior in old growth timber and heavy slash. Crews are mopping up.

DEER POINT, Wenatchee National Forest. A Washington Interagency Incident Management Team (Furlong/Gormley) is assigned. This fire is seven miles northwest of Chelan, WA and is burning in sagebrush, ponderosa pine and lodgepole pine. Fire behavior included creeping and smouldering, with torching and short runs observed in the interior and in the Grade Creek drainage. Crews are mopping up and rehabilitating fireline.

MONUMENT, Malheur National Forest. A Type 2 Incident Management Team (Morcom) is assigned. This fire is nine miles southwest of Unity, OR. Low to moderate fire behavior was observed in mixed conifer forest, ponderosa pine and sagebrush. Engine crews are mopping up containment lines.

### SOUTHERN CALIFORNIA AREA LARGE FIRES:

Priorities are being established by the California Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

PINES, San Diego Unit, California Department of Forestry and Fire Protection (CDF). A CDF Type 1 Incident Command Team (Ristow) is assigned. This fire is burning one half mile southeast of Julian, CA in chaparral and bug kill timber. Extreme fire behavior with fire whirls, 150 foot flame lengths and long range spotting was observed as the fire advanced north-northwest, jumping containment lines. Crews are building indirect attack fireline and burning out in Indian Canyon. Residents of the Los Coyotes Indian Reservation have been allowed to return to their homes but remain under a one hour evacuation advisory. A one hour evacuation advisory has been issued to residents of the Warner Springs Area. The Ranchita subdivision and a Boy Scout camp in Lost Valley remain evacuated. Five additional residences and 14 outbuildings have been confirmed lost.

MCNALLY, Sequoia National Forest. A Type 1 Incident Management Team (Studebaker) is assigned. This fire is burning in heavy brush and mixed conifer forest, nine miles north of Kernville, CA. Active fire behavior with short runs and spotting was observed on the northwest flank. The fire has crossed the Kern River and is spreading toward Hockett Peak and into the Golden Trout Wilderness Area. Crews are constructing indirect and direct attack fireline. Twelve residences remain threatened.

### ALASKA AREA LARGE FIRES:

Priorities are being established by the Alaska Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

KETCHUM CREEK, Upper Yukon Zone, Bureau of Land Management. A Type 2 Incident Management Team (McKnight) is assigned. This fire is four miles northeast of Circle Hot Springs, AK. Higher relative humidity and showers resulted in low fire activity in black spruce, taiga and hardwood forest. Crews made good progress on the northwest and south flanks.

GESKAMINA LAKE, Tanana Zone, Bureau of Land Management. A Type 2 Incident Management Team (Wilcock) is assigned. This fire is 70 miles west of Fairbanks, AK near the community of Lake Minchumina. Precipitation reduced fire activity in black spruce, taiga, muskeg and hardwood forest. Structure protection is in place along the Kantishna River. Heavy smoke hampered aerial operations.

NORTH FORK, Southwest Area Forestry, Alaska Division of Forestry. A Type 2 Incident Management Team (Kurth) is assigned. This fire is two miles north-northwest of Medfra, AK. Moderate fire behavior was observed in black spruce, muskeg and hardwood forest. Crews are constructing direct attack handline on the southwest flank. The community of Medfra is threatened; structure protection is in place.

MINCHUMINA GROUP, Tanana Zone, Bureau of Land Management. This group of fires, consisting of the Sischu, John Hansen Lake, John Hansen Creek and Moose Lake fires, is five miles northwest of Lake Minchumina, AK. Torching and creeping fire activity was observed in black spruce, taiga, muskeg and hardwood forest. Personnel are providing structure protection to threatened cabins along the northwest and north sides of Lake Minchumina. Heavy smoke is impeding aerial operations.

REINDEER, Southwest Area Forestry, Alaska Division of Forestry. This fire is 29 miles northeast of Holycross, AK. Plume dominated fire behavior was observed in black spruce, tussock tundra and hardwood forest on the west flank. Smokejumpers and crews are providing structure protection.

KOCACHO #2, Upper Yukon Zone, Bureau of Land Management. This fire is 20 miles northeast of Venetie, AK in black spruce and tussock tundra. Observed fire behavior included torching, running and creeping as the fire advanced north. Personnel contained a slopover west of Kocacho Creek. GOBLET CREEK, Galena Zone, Bureau of Land Management. This fire is eight miles west of Grayling, AK. Occasional torching, short runs, and smouldering fire activity was observed in black spruce. Crews are constructing direct attack fireline and providing structure protection.

#### **EASTERN GREAT BASIN AREA LARGE FIRES:**

GARDEN VALLEY COMPLEX, Boise National Forest. A Type 2 Incident Management Team (Murphy) is assigned. This complex consists of 23 fires northeast of Garden Valley, ID. Minimal fire behavior was observed in sagebrush, lodgepole pine and subalpine fir. Crews made good progress mopping up the No Man, East Fork, Danskin and Middle Fork fires; the remaining fires in the complex are in monitor status.

SEQUOIA, Dixie National Forest. This fire is 26 miles southwest of Cedar City, UT. Short runs, creeping and smoldering fire activity was observed in chaparral and ponderosa pine.

#### **SOUTHERN AREA LARGE FIRES:**

STUMPHOLE, George Washington and Jefferson National Forests. This fire is two miles southeast of Edinburg, VA. Moderate fire activity was observed in heavy bug kill timber. Crews are burning out and mopping up in steep, rocky terrain.

SAMPSON, Cherokee National Forest. This fire is seven miles southwest of Erwin, TN. Minimal fire behavior was observed in bug kill timber and hardwood litter. Personnel are holding and mopping up.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

SAMPSON	TN	CNF	360	95	8/9	41	2	1	1	0	82K

#### **EASTERN AREA LARGE FIRES:**

BLUE MOUNTAIN, Pennsylvania State Forestry. This fire is burning in oak woodland, six miles east of Palmerton, PA. Minimal fire activity was observed. Very steep terrain and heavy fuel loading are hampering containment efforts. The Appalachian Trail is closed.

### ROCKY MOUNTAIN AREA LARGE FIRES:

CABIN CREEK, Sheridan and Clearmont Counties. This fire is burning in juniper, grass and sagebrush, 13 miles north of Leiter, WY. No further information was reported.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
CABIN CREEK	WY	SH1X	2,600	80	8/9	0	0	0	0	0	NR

### OUTLOOK:

**\*\*\*A RED FLAG WARNING HAS BEEN POSTED IN SOUTHWEST OREGON AND NORTHERN CALIFORNIA FOR POOR RELATIVE HUMIDITY RECOVERY AND GUSTY NORTHEAST WINDS\*\*\***

**\*\*\*A FIRE WEATHER WATCH HAS BEEN ISSUED IN THE INLAND COUNTIES OF NORTHWEST FLORIDA FROM NOON UNTIL SUNSET FOR LOW RELATIVE HUMIDITY AND HIGH DISPERSION INDICES\*\*\***

The Southern California Area can expect sunny skies. High temperatures will be in the 80's and 90's near the coast, in the 80's to near 100 in the mountains, 100 to 108 in the inland valleys, and 103 to 115 in the deserts. Minimum relative humidity will range from 5 to 18 percent in the mountains, inland valleys and deserts, 15 to 25 percent in the coastal valleys, and above 40 along the coast. Winds will be south to west at 5 to 15 mph inland.

The Alaska Area can expect partly cloudy skies in the western portion of the state and mostly cloudy skies with scattered showers elsewhere. High temperatures will be in the 50's and 60's and minimum relative humidity will be in the mid 30 to mid 40 percent range. Winds will be 5 to 15 mph.

A dry, northwest flow over the Eastern Great Basin Area will bring sunny skies. High temperatures will be 80 to 95 at lower elevations and 65 to 80 in the mountains. Minimum relative humidity will range from 7 to 20 percent in the valleys and 9 to 25 percent in the mountains. Winds will be north at 10 to 25 mph in western Wyoming and variable at 5 to 15 mph in the remainder of the area.

High pressure over the Southern Area will bring sunny skies with scattered showers and thunderstorms in southwest interior Texas. High temperatures will be in the mid 80's and 90's.

Minimum relative humidity will range from 25 to 33 percent in North and South Carolina and generally above 40 percent elsewhere. Winds will be east to southeast at 10 to 15 mph across the western portion of the region, and north to northeast at 8 to 10 mph elsewhere.

The Rocky Mountain Area can expect mostly sunny skies with isolated thunderstorms along the east slopes of the Rocky Mountains in southern Colorado. High temperatures will be in the 70's and 80's at lower elevations and in the 60's to low 70's in the mountains. Minimum relative humidity will range from 10 to 18 percent in southwestern Wyoming and western Colorado, 20 to 30 percent at lower elevations, and 30 to 40 percent in the mountains. Winds will be northwest to northeast at 15 to 30 mph in northeastern Wyoming and western South Dakota and 10 to 20 mph elsewhere.

<b><u>VEHICLE ENTRAPMENT</u></b>	
<u>If you find yourself in a fire entrapment situation where a shelter deployment is not possible, using a vehicle for refuge may be an option. The following are some considerations for a vehicle entrapment:</u>	
	<u>Park the vehicle in an area void of vegetation.</u>
	<u>Fire out around the vehicle if there is time.</u>
	<u>Park behind a natural barrier or structure.</u>
	<u>Do not park on the downhill side of a road or under power lines or over hanging vegetation.</u>
	<u>Stay out of saddles or draws.</u>
	<u>Position the vehicle in a direction that provides the area occupied by crew personnel the maximum protection from an approaching flame front.</u>
	<u>Set the parking break, leave the motor running at high RPM, and keep the vehicle lights on.</u>
	<u>Roll up the windows and do not lock the doors since someone else might need to get in.</u>
	<u>Cover windows with fire shelters with reflective material placed against window.</u>
	<u>You must protect your airway, remain as low in the vehicle as possible, and use a dry bandana to cover your nose and mouth.</u>
	<u>Expect the following conditions if you are trapped inside the vehicle:</u>
	<u>Temperatures may reach over 200 degrees Fahrenheit.</u>
	<u>Smoke and sparks may enter the vehicle.</u>

	<u>Plastic parts may start to melt and give off toxic gases.</u>
	<u>Windows may start to crack.</u>
	<u>Exposed skin may receive radiant heat burns.</u>
	<u>If the vehicle catches fire, or windows blow out, and you must exit the vehicle before the fire has passed, then:</u>
	<u>Each crewmember should cover himself/herself with a fire shelter.</u>
	<u>Exit the vehicle from the side away from the greatest heat.</u>
	<u>Stay together and get as low to the ground as possible, moving away from the vehicle.</u>
	<u>Deploy your shelter in a safe area.</u>
