

**INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, AUGUST 16, 2002 0530 MDT
NATIONAL PREPAREDNESS LEVEL 4**

CURRENT SITUATION:

Initial attack activity was light nationwide. Nationally, 242 new fires were reported. Six of these became large fires, three in the Northern Rockies Area, two in the Eastern Great Basin Area and one Western Great Basin Area. Two large fires were contained, one each in the Western Great Basin and Northwest Areas. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Kansas, Massachusetts, Montana, Nebraska, Nevada, North Dakota, Rhode Island, Oregon, South Dakota, Utah, Washington and Wyoming.

US Army Task Force Destroyer (1st Battalion, 5th Field Artillery Regiment), command by Lt. Col. David R. Byrn Sr., and military support elements have demobilized from the Tiller Complex in Oregon and are redeploying to Ft. Riley, KS.

NORTHWEST AREA LARGE FIRES:

Priorities are being established by the Northwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Mann) is assigned to manage large fires in southwest Oregon and northern California. The Oregon State Fire Marshall's Office is assisting the Area Command Team with contingency planning.

BISCUIT, Siskiyou and Six Rivers National Forests. A Unified Command between three Type 1 Incident Management Teams (Bateman, Martin, Frye), a Type 2 Incident Management Team (Bright), and the Oregon Department of Forestry (Sifford, Spichart, Oman) is in place. A transfer of command from Martin's Type 1 Incident Management Team to Frye's Type 1 Incident Management Team will occur at 0600 PDT. The fire is burning in mixed conifer forest and brush, 26 miles southwest of Grants Pass, OR. Fire behavior was extreme on the northwest flank and active on the northeast, east and west flanks. Burn out operations are underway from Long Ridge Road to the Devil's Backbone on the west flank. Personnel are constructing fireline in preparation for a burn out, and scouting for contingency lines on the northwest perimeter. Crews are constructing indirect attack fireline and burning out on the north and northeast flanks. An evacuation notice was issued to residents on Spud Road and in the Oak Flats area yesterday. The Illinois River Valley, the upper Pistol River drainage, Agness and areas southwest of Quail Prairie remain under an evacuation advisory. Galice, O Brian, Cave Junction, Brookings, Kerby, Selma and Agness are threatened; structure protection is in place.

TILLER COMPLEX, Umpqua National Forest. A Type 1 Incident Management Team (Hart) is assigned. This complex, consisting of eight large and numerous small fires, is on the Tiller Ranger District and in the Rogue-Umpqua Divide Wilderness Area, 25 miles east of Canyonville, OR. Short crown runs, torching and spotting were observed in grass, brush and timber. Crews are building indirect and direct attack fireline and conducting burn out operations. Sixty seven homes

are threatened; structure protection is in place.

EAST ANTELOPE, Southwest Oregon District, Oregon Department of Forestry. An Oregon Department of Forestry Incident Management Team (Keith) is assigned. This fire is seven miles northeast of Ashland, OR. Active fire behavior with running, torching and spotting was observed in oak, timber and brush. Crews are constructing fireline in steep, rugged terrain. Forty nine homes are threatened; structure protection is in place. One outbuilding was confirmed lost.

MT. MARION, Willamette National Forest. A Type 2 Incident Management Team (Jackson) is assigned. This fire is in the Mt. Jefferson Wilderness Area, 14 miles southeast of Idanha, OR. Active fire behavior with short crown runs, torching and spotting was observed in mountain hemlock, subalpine fir and brush. Crews are constructing direct and indirect attack fireline with support from aerial resources.

DEER POINT, Wenatchee National Forest. This fire is burning seven miles northwest of Chelan, WA in sagebrush, ponderosa pine and lodgepole pine. Torching and running were observed in the Grade Creek drainage and in unburned interior islands. Crews are burning out the higher elevations of the Grade Creek drainage and mopping up other divisions.

MONUMENT-MALHEUR COMPLEX, Malheur National Forest. A Type 2 Incident Management Team (Swope) is assigned. This complex is southwest of Unity, OR. Minimal fire activity was observed in mixed conifer forest, ponderosa pine and sagebrush. Crews continue to make good progress mopping up and rehabilitating firelines.

NORTHERN CALIFORNIA AREA LARGE FIRES:

SUPPLY CREEK #13, Hoopa Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Szczepanik) is assigned. This fire is burning in mixed conifer forest and brush, two miles southwest of Hoopa, CA. Crews are constructing direct attack handline and building contingency lines. Steep, rocky terrain, heavy fuel loading, snags and limited access are hampering containment efforts. Four hundred fifty homes and one hundred commercial properties are threatened; structure protection is in place.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

MCNALLY, Sequoia and Inyo National Forests. A transfer of command from Studebaker s Type 1 Incident Management Team to Raley s Type 1 Incident Management Team will occur on 8/16. This fire is burning in heavy brush and mixed conifer forest, nine miles north of Kernville, CA. Short runs and minor torching were observed in the Cold Creek drainage and on the northwest flank. Crews completed indirect attack fireline construction from Osa Meadow to Long Valley and burn out operations are underway. Good progress was made mopping up portions of the west flank near Hockett Peak. Fire Use Modules are providing structure protection for remote cabins in the Golden Trout Wilderness Area.

EASTERN GREAT BASIN AREA LARGE FIRES:

HUFF, Northwest State, Utah Division of Forestry, Fire and State Lands. This fire is nine miles east of Coalville, UT. A Type 2 Incident Management Team (Suwyn) has been ordered. Extreme fire behavior was observed in sagebrush, grass, gambel oak, juniper and timber. Dozers have completed fireline on the west flank. Crews are constructing direct and indirect attack handline on the east and south flanks. Two residences are threatened; structure protection is in place.

LITTLE HORSE, Salmon-Challis National Forest. A Type 2 Incident Management Team (Saleen) will assume command today. This fire is 30 miles northwest of Salmon, ID. Torching and spotting were observed in subalpine fir, spruce and lodgepole pine. Heavy fuel loading, very steep terrain and unfavorable winds are hampering containment efforts. Structure protection is in place at Gattin Ranch.

LITTLE SOLDIER, Salmon-Challis National Forest. This fire is 36 miles west of Challis, ID. Minimal fire activity was observed in subalpine fir and heavy downed timber. Personnel are providing structure protection for a commercial lodge.

BROWNIE, Ashley National Forest. This fire is 22 miles northwest of Vernal, UT. Minimal fire behavior was observed in bug kill lodgepole pine. Crews are mopping up.

DIVIDE, Bridger-Teton National Forest. This lightning-caused Wildland Fire Use Incident is nine miles east of Pinedale, WY. The fire is burning in the Bridger Wilderness Area and is being managed for resource benefit. Torching and spotting was observed as the fire moved east.

SEQUOIA, Dixie National Forest. This fire is burning 26 miles southwest of Cedar City, UT in mixed conifer forest and brush. Crews are patrolling and monitoring fire behavior on the west flank.

LATE, Southwest State, Utah Division of Forestry, Fire and State Lands. This wind driven grass

fire is 12 miles north of Lyndyll, UT. Engine crews are wet lining the fire, patrolling and mopping up.

NORTHERN ROCKIES AREA LARGE FIRES:

SHEEP CREEK, Beaverhead-Deerlodge National Forest. A Type 2 Incident Management Team (Benes) has been ordered. This fire is 16 miles west of Wisdom, MT. Long range spotting was observed in heavy dead and down timber. No further information was reported.

PHLOX, Yellowstone National Park. This lightning-caused Wildland Fire Use Incident is 25 miles south-southeast of Lake Junction, WY. The fire is being managed for resource benefit and is in monitor status. Torching, running and spotting were observed in whitebark pine, lodgepole pine and spruce. This will be the last report unless significant activity occurs.

KEY CREEK, Bitterroot National Forest. This lightning-caused Wildland Fire Use Incident is near Sula, MT. The fire is being managed for resource benefit. Moderate fire behavior was observed in timber. This will be the last report unless significant activity occurs.

ROCKY MOUNTAIN AREA LARGE FIRES:

BIG FISH, White River National Forest. A Fire Use Management Team (Cook) is assigned. This lightning-caused Wildland Fire Use Incident is 34 miles southwest of Steamboat Springs, CO. The fire is being managed for resource benefit and a confinement strategy is in place. Torching, spotting and crowning were observed as the fire advanced northeast in spruce, fir and aspen. A precautionary evacuation advisory was issued to several residents and business owners.

BURN RIDGE, Routt National Forest. A Fire Use Management Team (Zimmerman) has been ordered. This fire is burning into the Mt. Zirkel Wilderness Area, 25 miles north of Steamboat

Springs, CO. Extreme fire behavior with torching, crowning and spotting was observed in aspen, fir and spruce. Crews made good progress improving fireline on the west flank. Dry fuels, heavy fuel loading and gusty winds are hampering confinement efforts.

ALASKA AREA LARGE FIRES:

GESKAKMINA LAKE, Tanana Zone, Bureau of Land Management. A Type 2 Incident Management Team (Wilcock) is assigned. This fire is 70 miles west of Fairbanks, AK. Observed fire behavior included creeping, smouldering and isolated flare-ups in black spruce, muskeg and hardwood forest. Crews are mopping up around structures along the Kantishna River and at West Twin Lake, Kindanina Lake and Mucha Lake.

REINDEER, Southwest Area Forestry, Alaska Division of Forestry. A Type 2 Incident Management Team (Kurth) has been ordered. This fire is 29 miles northeast of Holycross, AK. Running and torching were observed on the east flank in black spruce, tussock tundra and hardwood forest. The fire has crossed Reindeer River on the southeast flank. Crews successfully burned out around structures at Reindeer Lake.

OUTLOOK:

*****A RED FLAG WARNING HAS BEEN POSTED IN THE UINTA BASIN AND THE MOUNTAINS OF NORTHEASTERN UTAH FOR STRONG WEST TO NORTHWEST WINDS, LOW RELATIVE HUMIDITY AND HIGH HAINES INDEX*****

*****A RED FLAG WARNING HAS BEEN POSTED IN EASTERN WASHINGTON, NORTHEAST OREGON AND THE IDAHO PANHANDLE FOR INCREASING WINDS, LOW RELATIVE HUMIDITY AND POOR OVERNIGHT RELATIVE HUMIDITY RECOVERY*****

*****A RED FLAG WARNING HAS BEEN POSTED IN SOUTHERN IDAHO FOR STRONG WINDS, LOW RELATIVE HUMIDITY AND POOR OVERNIGHT RELATIVE HUMIDITY RECOVERY*****

*****A RED FLAG WARNING HAS BEEN POSTED IN WESTERN WYOMING FOR DRY FUELS, HIGH TEMPERATURES, LOW RELATIVE HUMIDITY AND STRONG WEST WINDS*****

*****A RED FLAG WARNING HAS BEEN POSTED IN NORTHEASTERN WYOMING AND IN THE BLACK HILLS AND BADLANDS OF SOUTH DAKOTA FOR HIGH TEMPERATURES, LOW RELATIVE HUMIDITY AND STRONG NORTHWEST WINDS*****

*****A FIRE WEATHER WATCH HAS BEEN ISSUED IN NORTHWESTERN COLORADO FOR STRONG WINDS, HIGH TEMPERATURES, LOW RELATIVE HUMIDITY AND HIGH HAINES INDEX*****

*****A FIRE WEATHER WATCH HAS BEEN ISSUED IN WESTERN MONTANA FOR LOW RELATIVE HUMIDITY AND HIGH WINDS*****

*****A FIRE WEATHER WATCH HAS BEEN ISSUED IN SOUTH-CENTRAL AND SOUTHEASTERN MONTANA FOR VERY STRONG WINDS, LOW RELATIVE HUMIDITY AND HIGH FIRE DANGER*****

*****A FIRE WEATHER WATCH HAS BEEN ISSUED IN SOUTHEASTERN WYOMING FOR STRONG WEST WINDS, LOW RELATIVE HUMIDITY AND HIGH TEMPERATURES*****

A very dry northwesterly flow over the Northwest Area will bring sunny skies. High temperatures will be in the 80's and 90's with some 100 degree readings in the valleys of southwestern Oregon. Minimum relative humidity will range from the single digits to teens. Winds will be west to northwest at 10 to 20 mph, gusting to 50 mph in eastern Washington and to 25 mph in

northeastern Oregon.

The Northern California Area can expect sunny skies with fog and low clouds near the coast. High temperatures will be in the 60's and 70's along the coast and in the 80's to 102 inland. Minimum relative humidity will range from 15 to 25 percent and winds will be west to north at 5 to 15 mph.

A high pressure system over the Southern California Area will bring sunny skies with morning low clouds and fog along the coast and afternoon cumulus build up over the crest of the Sierra Nevada Mountains. High temperatures will be in the 70's to low 80's near the coast, in the 80's and 90's in the mountains and inland valleys, and 100 to 115 in the deserts. Minimum relative humidity will range from 10 to 20 percent in the mountains and deserts, 15 to 25 percent in the inland valleys, 20 to 35 percent in the coastal valleys, and above 50 along the coast. Winds will be southwest to northwest at 15 to 25 mph in the deserts of Los Angeles and Kern Counties, on shore at 6 to 12 mph near the coast, and southwest to northwest at 8 to 18 mph in the mountains.

The Eastern Great Basin Area can expect sunny skies. High temperatures will be 70 to 90 in Idaho and Wyoming, and 90 to 110 in Utah. Minimum relative humidity will range from 3 to 20 percent and winds will be northwest at 15 to 30 mph with gusts to 40 mph.

A cold front moving east across the Northern Rockies Area will bring partly cloudy skies with scattered showers across the northern portion of the region. High temperatures will be 70 to 80 ahead of the front and 55 to 65 after the front's passage. Minimum relative humidity will range from 15 to 25 percent, increasing to 40 to 55 percent as the afternoon progresses. Winds will be west to northwest at 20 to 35 mph, gusting from 40 to 60 mph east of the Continental Divide. Elsewhere, winds will be west at 15 to 30 mph.

A dry, northwest flow over the Rocky Mountain Area will bring sunny skies. High temperatures will be in the 70's to 80's in the mountains and in the 80's to 90's at lower elevations. Minimum relative humidity will range from 15 to 25 percent in northern Wyoming, 10 to 20 percent in the mountains, and 8 to 16 percent elsewhere. Winds will be west to northwest at 15 to 40 mph, with stronger gusts in southern Wyoming.

Partly to mostly cloudy skies are forecast for the Alaska Area with widespread showers north of the Alaska Range. High temperatures will be upper 50's to 60's. Minimum relative humidity will be above 40 percent and winds will be west to southwest at 10 to 20 mph.

The Western Great Basin Area can expect sunny skies. High temperatures will be in the mid 80's to upper 90's in the north and mid 90's to 107 in the south. Minimum relative humidity will range from 4 to 11 percent and winds will be west to northwest at 10 to 20 mph in the afternoon.

THUNDERSTORM SAFETY

Thunderstorms cause significant hazards for wildland firefighters, including downbursts that can cause extreme fire behavior and lightning. When thunderstorm development is likely, lookouts should be posted and aware of signs of a developing storm. A sudden reversal in wind direction, a noticeable rise in wind speed, and a sharp drop in temperature may note the mature stage of a storm. Heavy rain, hail and lightning occur only in the mature stage of a thunderstorm. During a storm, use the following guidelines:

Do not lie down. The best position is sitting on your pack or crouching with feet close together.

Avoid sitting directly on the ground, if possible; but, if necessary, keep feet and butt close together.

Crouching for extended periods is not easily done, so sit on the pack.

Sitting on or covering up with a ground cloth is okay.

Removing caulk boots to allow stocking-covered or bare feet to make contact with the ground will not provide safety. Handheld radios (with short rubber antennas) or cell phones are safe to use. Communication is vital to crew safety. Wide, open spaces are better than trees or clumps of trees in the vicinity. Ridge tops, etc., should be avoided. If you feel the hair on your arms or head stand up, there is a high probability of a strike in the vicinity. Crouch or sit on a pack.
