

**INCIDENT MANAGEMENT SITUATION REPORT
SATURDAY, AUGUST 17, 2002 0530 MDT
NATIONAL PREPAREDNESS LEVEL 4**

CURRENT SITUATION:

Initial attack activity was moderate in the Northwest Area and light elsewhere. Nationally, 233 new fires were reported. Eight of these became large fires, three in the Northwest Area, two in the Northern Rockies Area, and one each in the Eastern Great Basin, Rocky Mountain and Southwest Areas. Two large fires were contained in the Eastern Great Basin Area. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Kansas, Massachusetts, Montana, Nebraska, Nevada, North Dakota, Oregon, Pennsylvania, South Dakota, Utah, Washington and Wyoming.

NORTHWEST AREA LARGE FIRES:

Priorities are being established by the Northwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Mann) is assigned to manage large fires in southwest Oregon and northern California. The Oregon State Fire Marshall's Office is assisting the Area Command Team with contingency planning.

BISCUIT, Siskiyou and Six Rivers National Forests. A Unified Command between two Type 1 Incident Management Teams (Bateman and Frye), a Type 2 Incident Management Team (Bright), and the Oregon Department of Forestry is in place. An additional Type 1 Incident Management Team (Vail) has been ordered. The fire is burning in mixed conifer forest and brush, 26 miles southwest of Grants Pass, OR. Fire behavior was extreme on the northwest and northeast flanks and moderate on the west flank. Crews are constructing indirect and direct attack fireline and burning out on the north and west perimeters. Evacuations remain in place for residents on Spud Road and in the Oak Flats area south of Agness. The Illinois River Valley, the upper Pistol River drainage and Agness remain under an evacuation advisory. Galice, O Brian, Cave Junction, Brookings, Kerby, Selma and Agness are threatened; structure protection is in place.

TILLER COMPLEX, Umpqua National Forest. A Type 1 Incident Management Team (Hart) is assigned. This complex, consisting of eight large and numerous small fires, is on the Tiller Ranger District and in the Rogue-Umpqua Divide Wilderness Area, 25 miles east of Canyonville, OR. Short crown runs, torching and spotting were observed in grass, brush and timber on the north and west flanks. Crews are building indirect and direct attack fireline and conducting burn out operations. Sixty seven homes are threatened; structure protection is in place.

EAST ANTELOPE, Southwest Oregon District, Oregon Department of Forestry. An Oregon Department of Forestry Incident Management Team (Keith) is assigned. This fire is seven miles northeast of Ashland, OR. Active fire behavior was observed in the interior in oak, timber and brush. Crews are constructing fireline in steep, rugged terrain with support from aerial resources.

Forty nine homes are threatened; structure protection is in place. Increase in acreage is due to more accurate mapping.

MT. MARION, Willamette National Forest. A Type 2 Incident Management Team (Jackson) is assigned. This fire is in the Mt. Jefferson Wilderness Area, 14 miles southeast of Idanha, OR. Active fire behavior with short crown runs, torching and spotting was observed in the interior in mountain hemlock, subalpine fir and brush. Crews are constructing direct and indirect attack fireline with support from aerial resources.

DEER POINT, Wenatchee National Forest. This fire is burning seven miles northwest of Chelan, WA in sagebrush, ponderosa pine and lodgepole pine. No new information was reported.

MONUMENT-MALHEUR COMPLEX, Malheur National Forest. A Type 2 Incident Management Team (Swope) is assigned. This complex is southwest of Unity, OR. Minimal fire activity was observed in mixed conifer forest, ponderosa pine and sagebrush. Crews continue to make good progress mopping up and rehabilitating firelines.

DEER MOUNTAIN, Southeast Washington State. A Washington Interagency Incident Management Team (Furlong/Gormley) has been ordered. This fire is within the city limits of Chelan, WA. Extreme fire behavior was observed in grass, bitter brush and scattered pine. Crews are providing structure protection with support of aerial resources.

HALEY CREEK, Colville Agency, Bureau of Land Management. A Washington Interagency Incident Management Team (Berndt/Andring) is assigned. This wind driven fire is ten miles southeast of Omak, WA. Dozers have completed fireline construction in preparation for a burn out operation. Four residences were confirmed lost during the initial phase of the fire.

APPLE, Umpqua National Forest. A Type 2 Incident Management Team (Carlson) has been ordered. This fire is 21 miles east of Glide, OR. Extreme fire behavior with crowning and torching was observed in heavy timber. Three campgrounds were evacuated and twenty homes are threatened; structure protection is in place.

ROCKY MOUNTAIN AREA LARGE FIRES:

BATTLE CREEK, Black Hills National Forest. This fire is near Hayward, SD. Extreme fire behavior was observed in grass and ponderosa pine. Hayward and the Mount Rushmore estates were evacuated; structure protection is in place. One residence was confirmed lost during the initial phase of the fire.

BIG FISH, White River National Forest. A Fire Use Management Team (Cook) is assigned. This lightning-caused Wildland Fire Use Incident, which started on July 19th, is 34 miles southwest of Steamboat Springs, CO. The fire is being managed for resource benefit and a confinement strategy is in place. Torching, spotting and crowning were observed as the fire advanced east-northeast in spruce, fir and aspen. Two commercial properties are threatened; structure protection is in place. Six cabins at Trapper Lake Lodge were confirmed lost.

HINMAN, Routt National Forest. A Type 2 Incident Management Team (Sisk) has been ordered. This previously reported fire, which started on July 12th, is 23 miles north of Steamboat Springs, CO. Significant runs and spotting up to one mile ahead of the front were observed in bug kill spruce, fir and lodgepole pine. Crews are providing structure protection for residences along Seed House Road. Aerial operations were suspended yesterday due to strong winds.

BURN RIDGE, Routt National Forest. A Fire Use Management Team (Zimmerman) has been ordered. This fire is burning into the Mt. Zirkel Wilderness Area, 25 miles north of Steamboat Springs, CO. Extreme fire behavior with torching, crowning and spotting was observed in aspen, fir and spruce. Crews are holding the west flank outside the Wilderness Area. Dry fuels, heavy fuel loading and gusty winds are hampering confinement efforts.

LOST LAKES, Routt National Forest. A Fire Use Management Team (Cook) is assigned. This lightning-caused Wildland Fire Use Incident, which started on July 8th and was previously reported as part of the Lost Green Complex, is 20 miles west of Yampa, CO. The fire is being managed for resource benefit and is in monitor status. Active fire behavior was observed in bug kill spruce and fir.

NORTHERN CALIFORNIA AREA LARGE FIRES:

SUPPLY CREEK #13, Hoopa Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Szczepanik) is assigned. This fire is burning in mixed conifer forest and brush, two miles southwest of Hoopa, CA. Crews are constructing direct attack handline and building contingency lines. Steep, rocky terrain, heavy fuel loading, snags and limited access are hampering containment efforts. Four hundred fifty homes and one hundred commercial properties are threatened; structure protection is in place.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

MCNALLY, Sequoia and Inyo National Forests. A transfer of command from Studebaker's Type 1 Incident Management Team to Raley's Type 1 Incident Management Team will occur today. This fire is burning in heavy brush and mixed conifer forest, nine miles north of Kernville, CA. Short runs and torching were observed in the Cold Creek drainage and on the northwest flank. The fire has spotted into Hell's Hole Creek and north of Sherman Peak. Crews are burning out from Osa Meadow to Long Valley and constructing fireline on the northeast flank in the Golden Trout Wilderness Area. Good progress was made mopping up the west flank from Hockett Peak to the Kern River. Fire Use Modules are providing structure protection for remote cabins.

NORTHERN ROCKIES AREA LARGE FIRES:

SHEEP CREEK, Beaverhead-Deerlodge National Forest. A Type 2 Incident Management Team (Benes) has been ordered. This fire is 16 miles west of Wisdom, MT. Crowning, torching and short range spotting were observed in heavy dead and down lodgepole pine. Crews are providing structure protection to residences along Highway 43; Highway 43 is closed.

PHLOX, Yellowstone National Park. This lightning-caused Wildland Fire Use Incident, which started on August 10th, is 25 miles south-southeast of Lake Junction, WY. The fire is being managed for resource benefit and is in monitor status. Torch, running and significant fire growth were observed in whitebark pine, lodgepole pine and spruce.

BIRD HILL, Nez Perce National Forest. This lightning-caused Wildland Fire Use Incident, which started on August 4th, is burning in the Selway-Bitterroot Wilderness Area, 35 miles west of Hamilton, MT. The fire is in monitor status and is being managed for resource benefit. Spotting, torching and short surface runs were observed in mixed conifer forest.

SOUTH CREW, Nez Perce National Forest. This lightning-caused Wildland Fire Use Incident, which started on August 4th, is burning in the Selway-Bitterroot Wilderness Area, 35 miles west of Hamilton, MT. The fire is in monitor status and is being managed for resource benefit. Spotting and torching were observed as the fire advanced east in mixed conifer forest.

EASTERN GREAT BASIN AREA LARGE FIRES:

HUFF, Northwest State, Utah Division of Forestry, Fire and State Lands. This fire is nine miles east of Coalville, UT. A Type 2 Incident Management Team (Suwyn) is assigned. Creeping fire behavior was observed in sagebrush, grass, mixed conifer forest and aspen. Dozers and crews made significant progress building fireline. One residence is threatened; structure protection is in place.

LITTLE HORSE, Salmon-Challis National Forest. A Type 2 Incident Management Team (Saleen) is assigned. This fire is 30 miles northwest of Salmon, ID. Torching and spotting were observed in subalpine fir, spruce and lodgepole pine. Heavy fuel loading, very steep terrain and unfavorable winds are hampering containment efforts. Structure protection is in place at Middle Fork Lodge, Gattin Ranch, Oreana Lookout and Cabin Creek.

LITTLE SOLDIER, Salmon-Challis National Forest. This fire is 36 miles west of Challis, ID. Minimal fire activity was observed in subalpine fir and heavy downed timber. Personnel are providing structure protection for a commercial lodge.

DIVIDE, Bridger-Teton National Forest. This lightning-caused Wildland Fire Use Incident, which started on August 4th, is nine miles east of Pinedale, WY. The fire is burning in the Bridger Wilderness Area and is being managed for resource benefit. Torching and spotting was observed as the fire moved east.

SEQUOIA, Dixie National Forest. This fire is burning 26 miles southwest of Cedar City, UT in mixed conifer forest and brush. Crews are patrolling and monitoring fire behavior on the west flank.

PARKER MOUNTAIN, Salmon-Challis National Forest. This lightning-caused Wildland Fire Use Incident, which started on August 4th, is 35 miles northwest of Salmon, ID. The fire is burning in subalpine fir and lodgepole pine and is being managed for resource benefit. The fire is in monitor status. This will be the last report unless significant activity occurs.

ALASKA AREA LARGE FIRES:

REINDEER, Southwest Area Forestry, Alaska Division of Forestry. A Type 2 Incident Management Team (Kurth) is assigned. This fire is 29 miles northeast of Holycross, AK. Very active fire behavior was observed on the west and southwest flanks in black spruce, tussock tundra and hardwood forest. Crews are providing structure protection for allotments at Reindeer Lake.

GESKAKMINA LAKE, Tanana Zone, Bureau of Land Management. A Type 2 Incident Management Team (Wilcock) is assigned. This fire is 70 miles west of Fairbanks, AK. Active fire behavior was observed in black spruce, muskeg and hardwood forest. Crews are mopping up around structures along the Kantishna River and at West Twin Lake, Kindanina Lake and Mucha Lake.

OUTLOOK:

A dry, northwest flow over the Northwest Area will bring sunny skies with morning low clouds west of the Cascade Mountains. High temperatures will be in the 90's in southwestern Oregon and in the 70's and 80's elsewhere. Minimum relative humidity will range from 30 to 45 percent in western Washington and northwest Oregon, and in the single digits to 20 percent elsewhere. Winds will be west to northwest at 5 to 15 mph, gusting to 25 mph.

The Rocky Mountain Area can expect partly to mostly sunny skies. High temperatures will be in the 60's to 70's in the mountains and in the mid 70's to mid 90's at lower elevations. Minimum relative humidity will range from 5 to 15 percent in western Colorado and southwestern Wyoming, 20 to 30 percent in the mountains, and 15 to 25 percent elsewhere. Winds will be variable at 10 to 20 mph.

The Northern California Area can expect sunny skies with fog and low clouds near the coast. High temperatures will be in the 60's and 70's along the coast and in the 80's to near 100 inland. Minimum relative humidity will range from 15 to 30 percent in the valleys and 12 to 20 percent in the mountains. Winds will be southwest to northwest at 5 to 15 mph.

A high pressure system over the Southern California Area will bring sunny skies with morning low clouds and fog along the coast. High temperatures will be in the 70's to low 80's near the coast, in the 80's and 90's in the mountains and valleys, and 100 to 115 in the deserts. Minimum relative humidity will range from 10 to 20 percent in the mountains and deserts, 15 to 25 percent in the inland valleys, 20 to 35 percent in the coastal valleys, and above 50 percent along the coast. Winds will be southwest to northwest at 15 to 25 mph in the deserts of Los Angeles and Kern Counties, on shore at 6 to 12 mph near the coast, and southwest to northwest at 8 to 18 mph in the mountains.

A weak ridge of high pressure over the Northern Rockies Area will bring partly cloudy skies. High temperatures will be in the 60's in eastern North Dakota and near 90 in northern Idaho. Minimum relative humidity will range from 15 to 25 percent in the west and 35 to 45 percent in the east. Winds will be northwest at 20 to 35 mph in North Dakota and west at 10 to 20 mph elsewhere.

A dry, northwest flow over the Eastern Great Basin Area will bring sunny skies. High temperatures will be 70 to 90 in Idaho and western Wyoming, and 90 to 110 in Utah. Minimum relative humidity will range from 4 to 20 percent and winds will be northwest at 10 to 25 mph.

Partly to mostly cloudy skies are forecast for the Alaska Area with widespread showers in the southeast interior. High temperatures will be in the 40's and 50's in the north and in the 60's in the

south. Minimum relative humidity will be above 40 percent and winds will be west at 10 to 20 mph.

www.nifc.gov/sixminutes/index_j.asp

SAFENET

SAFENET is a form, and process, that provides a method for reporting unsafe situations on, or off, the fireline. The information provided on the form will help collect important, safety-related data to determine long-term trends and problem areas. A SAFENET may be filled out at any time to report a valid concern about unsafe situations in fire operations, as well as document corrective action.

Discuss the methods for filing a SAFENET.

Electronically (Access site through NIFC web site)

By hardcopy (self-addressed, stamped forms available through the cache system).

By phone (1-800-670-3938)

Discuss advantages of filing a SAFENET through your supervisor versus sending it yourself.

Increase the chances of finding an immediate solution.

Keeps supervisor "in the loop".

Discuss using SAFENET in situations other than fire.

Prescribed fire

All-risk

Training

Where does a SAFENET go, and what response can you expect?

SAFENETs are received and stored in a database in Boise. After a SAFENET is received, the names are removed. It is then given a document number and posted to the web.

Every new SAFENET is then forwarded to the affected agencies designated list of contacts, which usually includes the National or Regional Safety Officer.

It is each agency's responsibility to insure that corrective actions are taken.

Corrective actions can be filed by anyone at any time. They are automatically attached to the individual SAFENET on the database. Discuss using SAFENET to monitor safety issues other firefighters may be having.
