

**INCIDENT MANAGEMENT SITUATION REPORT
MONDAY, AUGUST 19, 2002 0530 MDT
NATIONAL PREPAREDNESS LEVEL 4**

CURRENT SITUATION:

Initial attack activity was heavy in the Northwest Area, moderate in the Northern Rockies Area, and light elsewhere. Nationally, 200 new fires were reported. Six of these became large fires, three in the Northwest Area, two Northern Rockies Area and one in the Eastern Great Basin Area. Five large fires were contained, two in the Northwest Area and one each in the Eastern Great Basin, Western Great Basin and Northern California Areas. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Kansas, Massachusetts, Montana, Nebraska, Nevada, North Dakota, Oregon, South Dakota, Utah, Washington and Wyoming.

NORTHWEST AREA LARGE FIRES:

Priorities are being established by the Northwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Mann) is assigned to manage large fires in southwest Oregon and northern California. The Oregon State Fire Marshall's Office is assisting the Area Command Team with contingency planning.

BISCUIT, Siskiyou and Six Rivers National Forests. A Unified Command between three Type 1 Incident Management Teams (Bateman, Frye, Vail), a Type 2 Incident Management Team (Bright), and the Oregon Department of Forestry is in place. The fire is burning in mixed conifer forest and brush, 26 miles southwest of Grants Pass, OR. Fire behavior was extreme on the north and northwest flanks and moderate on the west flank. Crews are constructing direct attack fireline, improving established fireline and rehabilitating fireline. Evacuations are in place for residents on Spud Road and in the Oak Flats area south of Agness. Residents in the upper Pistol River drainage and Agness remain under an evacuation advisory. Galice, Agness and adjacent areas are threatened; structure protection is in place.

APPLE, Umpqua National Forest. A Type 2 Incident Management Team (Carlson) is assigned. This fire is 21 miles east of Glide, OR. Extreme fire behavior with short crown runs and spotting up to one mile ahead of the fire was observed in heavy timber. Twenty homes and several outbuildings are threatened; structure protection is in place. Local road closures are in effect.

TILLER COMPLEX, Umpqua National Forest. A Unified Command between a Type 1 Incident Management Team (Hart) and the Oregon Department of Forestry is in place. This complex, consisting of eight large and numerous small fires, is on the Tiller Ranger District and in the Rogue-Umpqua Divide Wilderness Area, 25 miles east of Canyonville, OR. Short crown runs, torching and mid range spotting were observed in grass, brush and timber. Crews are building indirect and direct attack fireline and conducting burn out operations. Sixty-seven homes are threatened; structure protection is in place.

SPOKANE COMPLEX, Northeast, Washington State. A Washington Interagency Incident Management Team (Jennings/Perry) is assigned. This complex is 45 miles west and 25 miles north of Spokane, WA and consists of the Spring Creek, Cooper and Nicholson fires. Active fire behavior with running was observed in pine, brush and grass. Fifty residences are threatened, two outbuildings are confirmed lost.

SIUSLAW RIVER FIRE, Oregon Department of Forestry. An Oregon Department of Forestry Incident Management Team (Mair) is assigned. This fire is burning 18 miles west of Veneta, OR in Douglas fir, brush and untreated slash. Higher relative humidity moderated fire activity with occasional torching and creeping observed. Crews are constructing fireline and burning out.

FERRY COMPLEX, Northeast Washington State. A Washington Interagency Incident Management Team (Dutton/Holloway) is assigned. This complex, comprised of Malo, Curlew and East Lake fires, is between Curlew, WA and Curlew Lake. No new information was reported.

MT. MARION, Willamette National Forest. A Type 2 Incident Management Team (Gerke) is assigned. This fire is in the Mt. Jefferson Wilderness Area, 14 miles southeast of Idanha, OR. Creeping and smouldering were observed in the interior in mountain hemlock, subalpine fir and brush. Crews are improving fireline and mopping up.

DEER POINT, Wenatchee National Forest. A Washington Interagency Incident Management Team (Furlong/Gormley) is assigned to manage this fire and the Deer Mountain fire. The fire is burning seven miles northwest of Chelan, WA in sagebrush, ponderosa pine and lodgepole pine. Torching, short runs, creeping and smouldering were observed in unburned islands in the interior and in the Grade Creek drainage. Crews are mopping up and patrolling.

MONUMENT-MALHEUR COMPLEX, Malheur National Forest. A transfer of command from a Type 2 Incident Management Team (Swope) to a Type 3 organization will occur at 2000 PDT. This complex is burning in sagebrush, ponderosa pine and mixed conifer forest, southwest of Unity, OR. Active fire behavior with torching, smouldering and creeping was observed in unburned interior islands. Crews are mopping up and rehabilitating firelines.

LAVA, Lakeview District, Bureau of Land Management. This fire, which started on July 13th and was previously reported as part of the Toolbox Complex, is 15 miles north and northwest of Christmas Valley, OR. Active fire behavior was observed in juniper, sage and grass. Personnel are performing burnout operations on the west flank.

HALEY CREEK, Colville Agency, Bureau of Indian Affairs. A Washington Interagency Incident Management Team (Berndt/Andring) is assigned. This fire is ten miles southeast of Omak, WA. Two residences were confirmed lost.

QUARTZ MT. COMPLEX, Okanogan National Forest. A Washington Interagency Incident Management Team (Johnson/Barnett) has been ordered. This complex is located in the Pasayten Wilderness area northwest of Winthrop, WA. Very active fire behavior with torching, upslope runs and spotting was observed in lodgepole pine and subalpine fir. Extremely difficult terrain is hampering containment efforts. Three outbuildings are threatened.

ROCKY MOUNTAIN AREA LARGE FIRES:

BATTLE CREEK, Black Hills National Forest. A Type 1 Incident Management Team (Wood) will assume command at 1800 MDT. This fire is ten miles southwest of Rapid City, SD. Extreme, wind driven, fire behavior with crowning, torching and running was observed in ponderosa pine and grass. Dozers and crews are constructing fireline. A pre-evacuation notice was issued to Keystone. Hayward, Mount Rushmore estates and Rockerville remain evacuated; structure protection is in place.

MT. ZIRKEL COMPLEX, Routt National Forest. A Type 2 Incident Management Team (Sisk) is assigned. A Type 1 Incident Management Team (Gelobter) has been ordered. This complex, previously reported as the Burn Ridge and Hinman fires, is 25 miles north of Steamboat Springs, CO. Extreme, wind driven fire behavior with crowning, torching and long range spotting was observed in heavy dead and down spruce, lodgepole pine and fir. Crews are constructing fireline on the west flank. Thirty homes are threatened; structure protection is in place.

GREEN CREEK, Routt National Forest. A Type 2 Incident Management Team (Hartman) will assume command today. This previously reported fire, which began on July 14th, is 15 miles southeast of Steamboat Springs, CO. Extreme fire behavior was observed in spruce, fir and lodgepole pine. Twelve homes and numerous outbuildings at Lake Agnes are threatened; structure protection is in place.

BIG FISH, White River National Forest. A Fire Use Management Team (Cook) is assigned. The Team is also managing the Lost Lakes fire. This lightning-caused Wildland Fire Use Incident, which started on July 19th, is 34 miles southwest of Steamboat Springs, CO. The fire is being managed for resource benefit and a confinement strategy is in place. Torching, spotting and crown runs were observed in heavy dead and down spruce, fir and aspen. Structure protection is in place at the Rio Blanco Guest Ranch and Leonard Cabin.

SHAFF #2, San Juan National Forest. This fire is four miles north of Cascade, CO. Observed fire behavior included isolated torching and creeping in mixed conifer forest. Crews are building direct attack fireline with support from aerial resources. Steep, rocky terrain is hampering containment efforts. Five outbuildings are threatened.

LOST LAKES, Routt National Forest. A Fire Use Management Team (Cook) is assigned. This fire is 20 miles west of Yampa, CO. The fire is being managed for resource benefit and is in monitor status. Torching, spotting and crown runs were observed in bug kill spruce and fir.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

MCNALLY, Sequoia and Inyo National Forests. A Type 1 Incident Management Team (Raley) is assigned. This fire is burning in heavy brush and mixed conifer forest, nine miles north of Kernville, CA. Moderate runs with torching and spotting as well as 200 foot flame lengths were observed. Crews are constructing direct attack fireline on the north and northeast flanks with assistance from aerial resources. Twelve residences are threatened.

REDHILL, Los Padres National Forest. A Type 2 Incident Management Team (Dorn) is assigned. This fire is 12 miles east of Paso Robles, CA. Moderate fire behavior was observed in brush, grass and oak woodland. Crews and dozers are constructing direct attack fireline with support from aerial resources. Twenty-five homes are threatened; structure protection is in place. Local road closures are in effect.

NORTHERN ROCKIES AREA LARGE FIRES:

SHEEP CREEK, Beaverhead-Deerlodge National Forest. A Type 2 Incident Management Team (Benes) is assigned. This fire is 16 miles west of Wisdom, MT. Short runs, group torching and spotting were observed in heavy dead and down lodgepole pine. Dozers and crews are constructing fireline and improving established fireline. Four residences are threatened; structure protection is in place.

HOPE 44, Pend Oreille Area Office, Idaho Department of Lands. A Type 2 Incident Management Team (Chrisman) is assigned. This fire is six miles northwest of the town of Hope, ID in ponderosa pine, grass and logging slash. Active fire behavior with torching and spotting were observed. Crews are constructing fireline on the east and west flanks. Twenty-four residences and several outbuildings are threatened.

STEAMBOAT, Southern Land Office, Montana Department of Natural Resources and Conservation. This fire is burning 15 miles north of Pompeys Pillar, MT in ponderosa pine and grass. Dozers are constructing fireline with aerial assistance.

PHLOX, Yellowstone National Park. This lightning-caused Wildland Fire Use Incident, which started on August 10th, is 25 miles south-southeast of Lake Junction, WY. The fire is being managed for resource benefit and is in monitor status. This will be the last report unless significant activity occurs.

PHLOX	WY	YNP	1,000	0	UNK	6	0	0	0	0	16K

EASTERN GREAT BASIN AREA LARGE FIRES:

CHERRY CREEK, Upper Snake River District, Southern Idaho Area, Bureau of Land Management. This fire is burning south and east of the town of Hailey, ID in aspen, sage and grass. Very active fire behavior with 30 to 40 foot flame lengths was observed. Dozers and crews are constructing fireline in preparation for a burn out operation. Forty residences and several commercial properties are threatened; structure protection is in place.

HUFF, Northwest State, Utah Division of Forestry, Fire and State Lands. This fire is nine miles east of Coalville, UT. A Type 2 Incident Management Team (Suwyn) is assigned. Creeping fire behavior was observed in sagebrush, grass, mixed conifer forest and aspen. Dozers and crews made significant progress building fireline. Personnel are mopping up and patrolling. One residence is threatened; structure protection is in place.

LITTLE HORSE, Salmon-Challis National Forest. A transfer of command will occur today from a Type 2 Incident Management Team (Saleen) to a Fire Use Management Team (Zimmerman). The Fire Use Management Team will also be managing the Parker Mountain fire. This fire is 30 miles northwest of Salmon, ID. Torching and spotting were observed in subalpine fir, spruce and lodgepole pine. Structure protection is in place at Gattin Ranch.

LITTLE SOLDIER, Salmon-Challis National Forest. This fire is 36 miles west of Challis, ID. Moderate fire activity with tree torching and smouldering was observed in subalpine fir and heavy dead and down timber. Strong winds caused the fire to grow to the southwest and northeast. One commercial property and several outbuildings are threatened, crews are providing structure protection.

PARKER MOUNTAIN, Salmon-Challis National Forest. A transfer of command from Saleen's Type 2 Incident Management Team to Zimmerman's Fire Use Management Team will occur today. This previously reported Wildland Fire Use Incident, which began on August 4th, is 45 miles west-northwest of the town of Salmon, ID. Spotting and isolated group torching were observed in subalpine fir and lodgepole pine.

DIVIDE, Bridger-Teton National Forest. This lightning-caused Wildland Fire Use Incident, which started on August 4th, is nine miles east of Pinedale, WY. The fire is burning in the Bridger Wilderness Area and is being managed for resource benefit. Torching and spotting were observed as the fire moved east-northeast.

SOUTHWEST AREA LARGE FIRES:

PACK RAT, Coconino National Forest. This fire is eight miles east of Pine, AZ. Extreme fire behavior with spotting up to one quarter mile ahead of the front was observed in mixed conifer forest and chaparral. Precipitation moderated fire activity with small runs on steep slopes observed. Crews are constructing indirect attack fireline on the east flank and improving established fireline. Very steep, inaccessible terrain and erratic winds from passing thunderstorms are impeding containment efforts.

ALASKA AREA LARGE FIRES:

REINDEER, Southwest Area Forestry, Alaska Division of Forestry. A Type 2 Incident Management Team (Kurth) is assigned. This fire is 29 miles northeast of Holycross, AK in black spruce, tussock tundra and hardwood forest. Lower temperatures, increased relative humidity and light precipitation moderated fire behavior with occasional torching observed. Crews are providing structure protection for allotments at Reindeer Lake.

OUTLOOK:

*****A RED FLAG WARNING HAS BEEN POSTED IN THE SOUTHWEST AND WEST CENTRAL UTAH FOR GUSTY SOUTH TO SOUTHWEST WINDS AND LOW RELATIVE HUMIDITY*****

*****A FIRE WEATHER WATCH HAS BEEN ISSUED IN SOUTHWEST AND WEST CENTRAL COLORADO FOR DRY THUNDERSTORMS, HIGH TEMPERATURES, LOW RELATIVE HUMIDITY AND HIGH HAINES INDEX*****

A westerly flow over the Northwest Area will bring mostly sunny skies. High temperatures will be in the 70's and 80's except in western Washington and northwest Oregon where high temperatures will be 60 to 70. Minimum relative humidity will be above 50 percent in western Washington and northwestern Oregon, 25 to 30 percent in southwest Oregon and 15 to 25 percent elsewhere. Winds will be west to northwest at 10 to 20 mph with gusts to 30 mph.

The Rocky Mountain Area can expect partly to mostly sunny skies. High temperatures will be in the 70's in the mountains and in the 80's to 90's at lower elevations. Minimum relative humidity will range from 5 to 15 percent in western Colorado and southwestern Wyoming, 20 to 30 percent in the mountains, and 5 to 15 percent elsewhere. Winds will be south to southeast at 10 to 20 mph in eastern Wyoming and eastern Colorado; west to southwest at 10 to 20 mph western Wyoming and western Colorado.

A high pressure system over the Southern California Area will bring sunny skies with morning low clouds and fog along the coast. High temperatures will be in the 60's to 70's near the coast, in the 80's and 90's in the mountains and valleys, and 90 to 110 in the deserts. Minimum relative humidity will range from 10 to 20 percent in the mountains and deserts; 30 to 50 percent along the coast. Winds will be southwest to northwest at 15 to 25 mph in the mountains and deserts; on shore at 8 to 15 mph near the coast.

Northern Rockies Area can expect mostly sunny skies. High temperatures will be 70 to 80 in eastern North Dakota and 90 to 100 in northern Idaho. Minimum relative humidity will range from 25 to 35 percent in North Dakota and 10 to 20 percent elsewhere. Winds will be south to west at 5 to 15 mph.

A southwesterly flow over the Eastern Great Basin Area will bring sunny skies. High temperatures will be 75 to 88 in the mountains and 85 to 106 in the valleys. Minimum relative humidity will range from 3 to 20 percent. Winds will be west at 10 to 25 mph in western Utah and 5 to 15 mph elsewhere.

The Northern California Area can expect sunny skies with fog and low clouds near the coast. High temperatures will be in the 60's along the coast and in the 80's to mid 90's inland. Minimum relative humidity will range from 18 to 25 percent in the valleys and 8 to 15 percent in the mountains. Winds will be southwest to northwest at 12 to 22 mph.

The Alaska Area can expect cloudy skies with showers in the southwest and in the interior. High temperatures will be in the 50's and 60's and minimum relative humidity will be above 45 percent. Winds will be south to 20 mph in south-central Alaska and variable to 15 mph elsewhere.

The Western Great Basin can expect clear skies with high temperatures in the mid 80's to mid 90's except in the extreme south where the high temperatures will be near 108. Minimum relative humidity will range from single digits to the low teens. Winds will be southwest at 15 to 30 mph.

www.nifc.gov/sixminutes/index_j.asp

RESPONDING TO VEHICLE FIRES

Suppression of vehicle fires is extremely dangerous and poses many health hazards to firefighters. The following procedures are recommended:

Secure the scene and provide or request assistance for traffic control.

Provide for your escape route at the scene.

Do not use road flares if fuel is leaking from the vehicle or if wildland fuel is nearby.

Vehicle fires are considered a hazardous materials scene. Suppression action should only be taken if the crew is trained, equipped, and authorized in the use of Self-Contained Breathing Apparatuses (SCBA).

If taking suppression action on wildland fuels, firefighters should ensure that they are a safe distance from the burning vehicle (100-feet minimum), and avoid contact with vehicle fire smoke or fumes.
