

**INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY, AUGUST 20, 2002 0530 MDT
NATIONAL PREPAREDNESS LEVEL 5**

CURRENT SITUATION:

Initial attack activity was heavy in the Eastern Great Basin and light elsewhere. Nationally, 281 new fires were reported. Five of these became large fires, two each in the Northern Rockies and the Eastern Great Basin Areas, and one in the Northern California Area. Five large fires were contained, two in the Northwest Area and one each in the Eastern Great Basin, Northern Rockies and Southern California Areas. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Kansas, Massachusetts, Montana, Nebraska, Nevada, North Dakota, Oregon, Rhode Island, South Dakota, Utah, Washington and Wyoming.

NORTHWEST AREA LARGE FIRES:

Priorities are being established by the Northwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Mann) is assigned to manage large fires in southwest Oregon and northern California. The Oregon State Fire Marshall's Office is assisting the Area Command Team with contingency planning.

BISCUIT, Siskiyou and Six Rivers National Forests. A Unified Command between three Type 1 Incident Management Teams (Bateman, Frye, Vail) and the Oregon Department of Forestry is in place. The fire is burning in mixed conifer forest and brush, 26 miles southwest of Grants Pass, OR. Active fire behavior with torching, short crown runs and spotting observed on the north and east flanks with minimal to moderate fire behavior elsewhere. Crews are constructing direct attack fireline, burning out and patrolling. Evacuations are in place for residents on Spud Road and in the Oak Flats area south of Agness. Residents in the upper Pistol River drainage and Agness remain under an evacuation advisory. Galice, Agness and adjacent areas are threatened; structure protection is in place.

APPLE, Umpqua National Forest. A Type 2 Incident Management Team (Carlson) is assigned. This fire is 21 miles east of Glide, OR in heavy timber. Lower temperatures and higher relative humidity moderated fire behavior. Crews are constructing indirect fireline. Twenty homes and several outbuildings are threatened; structure protection is in place. Local road closures are in effect.

TILLER COMPLEX, Umpqua National Forest. A Unified Command between a Type 1 Incident Management Team (Hart) and the Oregon Department of Forestry is in place. A Type 1 Incident Management Team (Melton) has been ordered. This complex, consisting of eight large and numerous small fires, is on the Tiller Ranger District and in the Rogue-Umpqua Divide Wilderness Area, 25 miles east of Canyonville, OR. Short crown runs, individual tree torching and mid range spotting were observed in grass, brush and timber. Crews are building indirect and direct attack fireline, burning out and mopping up. Sixty-seven homes are threatened; structure protection is in place.

SPOKANE COMPLEX, Northeast, Washington State. A Washington Interagency Incident Management Team (Jennings/Perry) is assigned. This complex is 45 miles west and 25 miles north of Spokane, WA and consists of the Spring Creek, Cooper and Nicholson fires. Active fire behavior with running was observed in pine, brush and grass. Fifty residences are threatened.

SIUSLAW RIVER FIRE, Oregon Department of Forestry. An Oregon Department of Forestry Incident Management Team (Mair) is assigned. This fire is burning 18 miles west of Veneta, OR in Douglas fir, brush and untreated slash. Minimal fire behavior was observed. Crews are constructing fireline, burning out and mopping up. Rolling debris and difficult terrain are hampering containment efforts.

FERRY COMPLEX, Northeast Washington State. A Washington Interagency Incident Management Team (Dutton/Holloway) is assigned. This complex, comprised of Malo, Curlew and East Lake fires, is between Curlew, WA and Curlew Lake. Crews are mopping up and patrolling.

DEER POINT, Wenatchee National Forest. A Washington Interagency Incident Management Team (Furlong/Gormley) is assigned to manage this fire and the Deer Mountain fire. The fire is burning seven miles northwest of Chelan, WA in sagebrush, ponderosa pine and lodgepole pine. Torching, short runs, creeping and smouldering were observed in unburned islands in the interior and in the Grade Creek drainage. Crews are mopping up and patrolling.

QUARTZ MT. COMPLEX, Okanogan National Forest. A Washington Interagency Incident Management Team (Johnson/Barnett) is assigned. This complex is located in the Pasayten Wilderness area northwest of Winthrop, WA. Very active fire behavior with torching, upslope runs and spotting was observed in lodgepole pine and subalpine fir. Extremely difficult terrain and rolling debris are hampering containment efforts. Three outbuildings are threatened.

LAVA, Lakeview District, Bureau of Land Management. This fire, which started on July 13th and was previously reported as part of the Toolbox Complex, is 15 miles north and northwest of Christmas Valley, OR. Active fire behavior with torching was observed in juniper, sage and grass. Limited access and difficult terrain are impeding containment efforts.

HALEY CREEK, Colville Agency, Bureau of Indian Affairs. A Washington Interagency Incident Management Team (Berndt/Andring) is assigned. This fire is ten miles southeast of Omak, WA. Minimal fire behavior was observed in sagebrush, grass and pine. Crews are mopping up and gridding for hot spots.

ROCKY MOUNTAIN AREA LARGE FIRES:

Priorities are being established by the Rocky Mountain Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

BATTLE CREEK, Black Hills National Forest. A Type 1 Incident Management Team (Wood) is assigned. This fire is ten miles southwest of Rapid City, SD. Extreme, wind driven fire behavior with crowning, torching, running and spotting up to one half mile ahead of the front was observed in ponderosa pine and grass. Crews are burning out and constructing fireline with assistance from dozers. A pre-evacuation notice was issued to Keystone. Hayward, Mount Rushmore estates and Rockerville remain evacuated; structure protection is in place.

MT. ZIRKEL COMPLEX, Routt National Forest. A transfer of command from Sisk's Type 2 Incident Management Team to Gelobter's Type 1 Incident Management Team will occur at 0600 MDT. This complex, previously reported as the Burn Ridge and Hinman fires, is 25 miles north of Steamboat Springs, CO. Extreme wind driven fire behavior with crowning, torching and long range spotting was observed in heavy dead and down spruce, lodgepole pine and fir. Thirty homes are threatened; structure protection is in place.

GREEN CREEK, Routt National Forest. A Type 2 Incident Management Team (Hartman) will assume command today. This previously reported fire, which began on July 14th, is 15 miles southeast of Steamboat Springs, CO. Smoldering, single tree and multiple tree torching were

observed in spruce, fir and lodgepole pine. Crews and dozers are constructing fireline. Thirteen homes and numerous outbuildings at Lake Agnes are threatened; structure protection is in place.

BIG FISH, White River National Forest. A Fire Use Management Team (Cook) is assigned. The Team is also managing the Lost Lakes fire. This lightning-caused Wildland Fire Use Incident, which started on July 19th, is 34 miles southwest of Steamboat Springs, CO. The fire is being managed for resource benefit and a confinement strategy is in place. High winds from thunderstorms resulted in torching, spotting and crown runs in heavy dead and down spruce, fir and aspen. Structure protection is in place at the Rio Blanco Guest Ranch.

SHAFF #2, San Juan National Forest. This fire is four miles north of Cascade, CO. Observed fire behavior included isolated torching and creeping in mixed conifer forest. Crews are building direct attack fireline with support from aerial resources. Steep, rocky terrain is hampering containment efforts. Five outbuildings are threatened.

LOST LAKES, Routt National Forest. A Fire Use Management Team (Cook) is assigned. This fire is 20 miles west of Yampa, CO. The fire is being managed for resource benefit and is in monitor status. Strong winds caused individual tree torching, group torching, crown runs and spotting in bug kill spruce and fir.

NORTHERN ROCKIES AREA LARGE FIRES:

Priorities are being established by the Northern Rockies Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

HOPE 44, Pend Oreille Area Office, Idaho Department of Lands. A Type 2 Incident Management Team (Chrisman) is assigned. This fire is six miles northwest of the town of Hope, ID. Torching was observed in ponderosa pine, grass and logging slash. Crews are constructing fireline on the east and west flanks. Twenty-four residences and several outbuildings are threatened; structure protection is in place.

KELLY CREEK, Nez Perce National Forest. A Type 2 Incident Management Team (Kechter) has been ordered. This fire is burning 11 miles east of Riggins, ID in ponderosa pine, Douglas fir and sage brush. Active fire behavior with flame lengths up to 15 feet was observed. Steep terrain and limited access are hampering containment efforts.

SHEEP CREEK, Beaverhead-Deerlodge National Forest. A Type 2 Incident Management Team (Benes) is assigned. This fire is 16 miles west of Wisdom, MT. Short runs, group torching and spotting were observed in heavy dead and down lodgepole pine. Personnel are burning out on the west and north flanks; dozers and crews are constructing fireline. Four residences are threatened.

PHLOX, Yellowstone National Park. This lightning-caused Wildland Fire Use Incident, which started on August 10th, is 25 miles south-southeast of Lake Junction, WY. Moderate fire behavior with torching and spotting was observed. The fire is being managed for resource benefit and is in monitor status.

HESLIP, Clearwater National Forest. This lightning-caused Wildland Fire Use Incident is burning 50 miles southwest of Missoula, MT. The fire is being managed for resource benefit. This will be the last report unless significant activity occurs.

EASTERN GREAT BASIN AREA LARGE FIRES:

GARDER FIRE, Vernal Field Office, Bureau of Land Management. This fire is 21 miles southwest of Duchesne, UT in lodgepole pine, aspen and Douglas fir. Very active, wind driven, fire behavior was observed including torching, crowning and running. Five residences are threatened in the Argyle Canyon area and mandatory evacuations have occurred; structure protection is in place.

EAGLE SPRINGS, Sawtooth National Forest. This fire is 29 miles south of Twin Falls, ID, burning in lodgepole pine, grass and sagebrush. Active fire behavior with torching and crowning observed. Crews are constructing direct attack fireline. Nine residences and two outbuildings are threatened.

CHERRY CREEK, Upper Snake River District, Southern Idaho Area, Bureau of Land Management. A Type 2 Incident Management Team (Broyles) has been ordered. This fire is burning south and east of the town of Hailey, ID in aspen, sage and grass. Winds resulted in very active fire behavior with running, spotting and 30 to 50 foot flame lengths. Dozers and crews are constructing fireline. Forty residences and several commercial properties are threatened; structure protection is in place.

LITTLE HORSE, Salmon-Challis National Forest. A transfer of command will occur today from a Type 2 Incident Management Team (Saleen) to a Fire Use Management Team (Zimmerman) at 1800 MDT. The Fire Use Management Team will also be managing the Parker Mountain fire. This fire is 30 miles northwest of Salmon, ID. Torching and spotting were observed in subalpine fir,

spruce and lodgepole pine. Structure protection is in place at Gattin Ranch.

LITTLE SOLDIER, Salmon-Challis National Forest. This fire is 36 miles west of Challis, ID. Moderate fire activity with tree torching was observed in subalpine fir and heavy dead and down timber. One commercial property and several outbuildings are threatened; crews are providing structure protection.

PARKER MOUNTAIN, Salmon-Challis National Forest. A transfer of command from Saleen's Type 2 Incident Management Team to Zimmerman's Fire Use Management Team will occur today at 1800 MDT. This previously reported Wildland Fire Use Incident, which began on August 4th, is 45 miles west-northwest of the town of Salmon, ID. Spotting and isolated group torching were observed in subalpine fir and lodgepole pine.

DIVIDE, Bridger-Teton National Forest. This lightning-caused Wildland Fire Use Incident, which started on August 4th, is nine miles east of Pinedale, WY. The fire is burning in the Bridger Wilderness Area and is being managed for resource benefit. Torching and spotting were observed.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

MCNALLY, Sequoia and Inyo National Forests. A Type 1 Incident Management Team (Raley) is assigned. This fire is burning in heavy brush and mixed conifer forest, nine miles north of Kernville, CA. Torching and spotting were observed. Crews are constructing direct attack fireline on the north, northeast and west flanks. Crews are mopping up and rehabilitating fireline on the northeast flank. Twelve residences are threatened.

LPF = Los Padres National Forest

NORTHERN CALIFORNIA AREA LARGE FIRES:

SHOWERS, Tahoe Basin Management Unit. A Type 2 Incident Management Team has been ordered. This fire is burning south of the town of Meyers, CA in mixed conifer and heavy brush. Strong, swirling winds resulted in very active fire behavior with heavy spotting. Aerial operations were suspended due to winds. Difficult terrain and inaccessibility are hampering containment efforts.

SHOWERS	CA	TMU	100	0	UNK	345	13	9	4	0	NR

SOUTHWEST AREA LARGE FIRES:

PACK RAT, Coconino National Forest. This fire is eight miles east of Pine, AZ. Extreme fire behavior with spotting up to one quarter mile ahead of the front was observed in mixed conifer forest and chaparral. Precipitation moderated fire activity. Crews are burning out and constructing indirect attack fireline on the east and west flanks. Very steep and inaccessible terrain is impeding containment efforts.

ALASKA AREA LARGE FIRES:

REINDEER, Southwest Area Forestry, Alaska Division of Forestry. A Type 2 Incident Management Team (Kurth) is assigned. This fire is 29 miles northeast of Holycross, AK in black spruce, tussock tundra and hardwood forest. Increased relative humidity resulted in minimal fire activity with creeping and smouldering observed. One commercial property and nine outbuildings are threatened. Crews are providing structure protection.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
REINDEER	AK	SWS	210,100	0	UNK	70	2	0	2	0	640K

OUTLOOK:

*****A RED FLAG WARNING HAS BEEN POSTED IN WESTERN UTAH FOR STRONG WINDS AND LOW RELATIVE HUMIDITY*****

*****A FIRE WEATHER WATCH HAS BEEN ISSUED IN SOUTHWEST WYOMING AND SOUTHWEST SOUTH DAKOTA FOR STRONG WINDS, LOW RELATIVE HUMIDITY AND DRY LIGHTNING*****

Low pressure over the Northwest Area will bring cooler temperatures, higher relative humidity and a chance of scattered thunderstorms east of the Cascade Mountains and in northeast Washington. High temperatures will be in the 60's and 70's in the mountains, 80's in the valleys. Minimum relative humidity will be above 50 percent in western Washington and western Oregon, 15 to 30 percent elsewhere. Winds will be light from the west-northwest with gusts to 30 mph at higher elevations east of the Cascade Mountains.

Increasing moisture over the Rocky Mountain Area will bring a chance of widely scattered thunderstorms with isolated dry lightning. High temperatures will be in the 70's in the mountains and in the mid 80's to low 90's at lower elevations. Minimum relative humidity will range from 25 to 35 percent in western Colorado and 12 to 28 percent elsewhere. Winds will be southwest at 15 to 30 mph in southwest Wyoming and southerly at 8 to 16 mph elsewhere.

Unstable moisture over the Northern Rockies Area will bring increasing chances of wet and dry thunderstorms. High temperatures will be 65 to 75 in North Dakota and mid 90's in Idaho. Minimum relative humidity will be above 40 percent in North Dakota and 15 to 25 percent elsewhere. Winds will be south at 10 to 15 mph but will shift to northeast.

A southwesterly flow over the Eastern Great Basin Area will bring sunny skies. High temperatures will be 68 to 80 in the mountains and 82 to 102 in the valleys. Minimum relative humidity will range from 7 to 15 percent in the valleys and 12 to 27 percent at higher elevations. Winds will be southwest at 10 to 25 mph.

The Northern California Area can expect mostly sunny skies with low clouds near the coast. High temperatures will be in the 60's along the coast and upper 70's to near 90 inland. Minimum relative humidity will range from 15 to 40 percent. Winds will be south-southwest to west at 10 to 25 mph with gusts of 30 to 35 mph at higher elevations.

The Alaska Area can expect cloudy skies with scattered showers. High temperatures will be in the 50's and minimum relative humidity will be between 40 and 50 percent. In the north, winds will be northeast at 10 to 20 mph; in the south, winds will be southeast at 5 to 15 mph.

Low pressure over the Western Great Basin will bring mostly sunny skies with windy conditions

and a chance of isolated dry thunderstorms in northwest Nevada. High temperatures in the 80's to 90's. Minimum relative humidity will range from single digits to the teens. Winds will be 15 to 30 mph.

HELICOPTER LANDING AREA SELECTION

Consider the following points when selecting a landing area for a helicopter:

- ! Locate a flat area that is of sufficient size for the helicopter you are expecting to land.
 - Type I -- Clear and level touchdown pad measuring 30 feet by 30 feet; safety circle measuring 110 feet in diameter.
 - Type II -- Clear and level touchdown pad measuring 20 feet by 20 feet; safety circle measuring 90 feet in diameter.
 - Type III -- Clear and level touchdown pad measuring 15 feet by 15 feet; safety circle measuring 75 feet in diameter.
- ! Choose an area clear of people, vehicles, and obstructions such as trees, poles, and especially overhead wires.
- ! The area must be free of stumps, brush, posts, large rocks or anything over 18 inches high.
- ! Consider the wind direction. Helicopters land and take off into the wind.
- ! Choose an approach free of obstructions. Any obstruction should be relayed to the helicopter crew during initial radio contact.
- ! Remove or secure any loose items in and around the landing area such as trash, blankets, hats, or equipment.
- ! Wet down the landing area if dusty conditions are present.
