

**INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY, AUGUST 27, 2002 0530 MDT
NATIONAL PREPAREDNESS LEVEL 5**

CURRENT SITUATION:

Initial attack activity was heavy in the Northwest Area and light elsewhere. Nationally, 227 new fires were reported. Two of these became large fires, one each in the Rocky Mountain and Southwest Areas. Four large fires were contained, two in the Southern California Area and one each in the Eastern Great Basin and Southern Areas. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington and Wyoming.

NORTHWEST AREA LARGE FIRES:

An Area Command Team (Chesley) is assigned to manage large fires on the Umpqua National Forest. An Area Command Team (Williams-Rhodes) is assigned to manage the Biscuit fire.

BISCUIT, Siskiyou and Six Rivers National Forests. A Unified Command between two Type 1 Incident Management Teams (Frye and Vail), a Type 2 Incident Management Team (Morcom) and the Oregon Department of Forestry is in place. A Type 1 Incident Management Team (Dash) has been ordered. The fire is 26 miles southwest of Grants Pass, OR. Low to moderate intensity fire behavior was observed in mixed conifer forest and brush. Crews are constructing direct attack fireline on the north, northwest and west flanks, and burning out where appropriate. Personnel are improving fireline, constructing direct attack handline and mopping up on the east perimeter. A pre-evacuation advisory remains in effect for residents of Agness, Illahe and in the Pistol River area. Structure protection is in place at Wilderness Retreat, Gardner Ranch, the Chetco Inn, Tolman Ranch and in the Pistol River drainage. Increase in acreage is due to more accurate mapping.

APPLE, Umpqua National Forest. A Unified Command between a Type 2 Incident Management Team (Carlson) and the Oregon Department of Forestry is in place. This fire is 21 miles east of Glide, OR. Moderate fire behavior with torching and short range spotting was observed in heavy timber. Crews are constructing indirect attack fireline on the east, west and south flanks. Two miles of burn out were successfully completed on the east and west perimeters. Twenty homes are threatened; structure protection is in place.

TILLER COMPLEX, Umpqua National Forest. A Unified Command between a Type 1 Incident Management Team (Melton) and the Oregon Department of Forestry is in place. This complex, consisting of eight large and numerous small fires, is on the Tiller Ranger District and in the Rogue-Umpqua Divide Wilderness Area, 25 miles east of Canyonville, OR. Moderate fire behavior was observed in grass, brush and timber. Substantial progress was made burning out on the west perimeter with support from aerial resources. Crews are building indirect and direct attack fireline, and mop-up is underway on several divisions. Structure protection is in place for sixty-seven homes.

LAVA, Lakeview District, Bureau of Land Management. This fire is burning in mountain mahogany, juniper, sagebrush and grass in a Wilderness Study Area, 15 miles north-northwest of Christmas Valley, OR. The fire is in monitor status. This will be the last report unless significant activity occurs.

QUARTZ MT. COMPLEX, Okanogan National Forest. A Fire Use Management Team (Cones) is assigned. This complex, consisting of the Quartz Mountain, Middle Mountain and Lake fires, is in the Pasayten Wilderness Area, northwest of Winthrop, WA. One new fire was added to the complex. Minimal fire activity was observed in lodgepole pine and subalpine fir. Personnel are providing structure protection at three administrative sites.

SOUTHWEST AREA LARGE FIRES:

LAKES, Santa Fe National Forest. A Type 1 Incident Management Team (Hefner) has been ordered. This fire is burning in ponderosa pine and grass, 15 miles north of Jemez Pueblo, NM. Extreme fire behavior was observed, moderating as the evening burn period progressed. Steep terrain, heavy fuel loading, low relative humidity and low fuel moisture are impeding suppression efforts. Residents of Seven Springs and Thompson Ridge residential areas, and Fenton Lake State Park have been evacuated. Four summer homes were confirmed lost during the initial phase of the fire. State Route 126 is closed.

PACK RAT, Coconino National Forest. A Type 1 Incident Management Team (Humphrey) is assigned. This fire is eight miles east of Pine, AZ. Very active fire behavior with rapid runs, torching and spotting was observed in mixed conifer forest and chaparral. Crews have re-initiated fireline construction on the east flank. Personnel contained numerous spot fires along the north perimeter with support from aerial resources. Very steep, rugged and rocky terrain is hampering containment efforts. One hundred thirty-seven residences in the Washington Park area are threatened; structure protection is in place.

TRICK, Kaibab National Forest. A Type 2 Incident Management Team (Broyles) is assigned. This fire is 26 miles southwest of Flagstaff, AZ. Active fire behavior was observed in ponderosa pine and brush. Dozers are building fireline with support from aerial resources and crews are burning out along the rim of Tule Canyon. Crews have initiated handline construction off the rim into Tule Tank Wash. Steep, inaccessible terrain and limited water sources are impeding containment efforts.

ROCKY MOUNTAIN AREA LARGE FIRES:

PASS CREEK, Shoshone National Forest. A Type 2 Incident Management Team (Sisk) is assigned. This fire is 18 miles south of Lander, WY. Torching and crowning were observed in lodgepole pine, spruce, and heavy down fuels. Crews are constructing fireline west of Pass Creek and on the east flank. Residents in the Pass Creek and Red Canyon areas have been evacuated. Engine crews are providing structure protection for thirty residences.

MT. ZIRKEL COMPLEX, Routt National Forest. A Type 1 Incident Management Team (Gelobter) is assigned. This complex, comprised of the Burn Ridge and Hinman fires, is 25 miles north of Steamboat Springs, CO. Moderate fire activity was observed in heavy dead and down spruce, lodgepole pine and fir. Crews are holding on the east flank of the Burn Ridge fire near the town of Walden. Personnel are improving fireline on the west flank of both fires in preparation for a burn out operation. Structure protection is in place in North Park and in the Seed House corridor.

GREEN CREEK, Routt National Forest. A transfer of command from Hartman's Type 2 Incident Management Team to Sandman's Type 2 Incident Management Team will occur today. This fire is 15 miles southeast of Steamboat Springs, CO. Minimal fire activity was observed in spruce, fir and lodgepole pine. Crews are mopping up on all divisions.

BEAR CREEK, Worland District, Bureau of Land Management. This fire is 45 miles south of Tensleep, WY. Very active fire behavior with running and torching was observed in grass, sagebrush and timber. Engine crews are burning out and holding. Structure protection is in place at a ranch.

BIG FISH, White River National Forest. A Fire Use Management Team (Cook) is assigned. The Team is also managing the Lost Lakes fire. This lightning-caused Wildland Fire Use Incident, which started on July 19th, is 34 miles southwest of Steamboat Springs, CO. This fire is being managed for resource benefit and a confinement strategy is in place. Increased fire behavior was observed in heavy dead and down spruce, fir and aspen. Fire Use Modules are monitoring fire behavior and providing structure protection at several guest ranches.

LOST LAKES, Routt National Forest. A Fire Use Management Team (Cook) is assigned. This lightning-caused Wildland Fire Use Incident, which started on July 8th, is 20 miles west of Yampa, CO. The fire is in monitor status and is being managed for resource benefit. Increased fire activity was observed in bug kill spruce and fir.

HALO, Little Snake Field Office, Bureau of Land Management. This lightning-caused Wildland Fire Use Incident, which started on August 21st, is 18 miles west of Maybell, CO. The fire is burning in pinyon pine and juniper in the Cross Mountain Wilderness Study Area. Personnel are monitoring

fire behavior and managing the fire for resource benefit. This will be the last report unless significant activity occurs.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

MCNALLY, Sequoia and Inyo National Forests. A Type 1 Incident Management Team (Raley) is assigned. A Type 2 Incident Management Team (Rios) has been ordered. This fire is nine miles north of Kernville, CA. Moderate fire behavior was observed in heavy brush and mixed conifer forest. Crews are constructing direct attack fireline on the northeast and west flanks with support from aerial resources. Jordan Hot Springs Resort and residents of Monache Meadows have been evacuated. Twenty-three residences and seven commercial properties remain threatened; structure protection is in place.

EASTERN GREAT BASIN AREA LARGE FIRES:

COTTONWOOD, Fishlake National Forest. A Type 2 Incident Management Team (Van Bruggen) will assume command at 0600 MDT. This fire is six miles southwest of Marysville, UT. Significant runs, spotting and torching were observed in subalpine fir, mountain mahogany, juniper and aspen. Crews are building handline on the west flank and dozers are constructing fireline on the southeast perimeter with support from aerial resources.

PROSPECT, Sawtooth National Forest. This fire is seven miles southwest of Yost, UT. Isolated torching and short runs were observed in sagebrush, grass, juniper and pinyon pine. Crews are mopping up and cold trailing.

FRANK CHURCH COMPLEX, Salmon-Challis National Forest. A Fire Use Management Team (Zimmerman) is assigned. This complex, consisting of the Parker Mountain, Little Horse, Little Soldier, Bobtail, Waterfall and Big Hill fires, is 30 miles northwest of Salmon, ID. Creeping, smouldering and isolated torching were observed in subalpine fir and lodgepole pine. Engine crews are patrolling and hot-spotting. Structure protection is in place at Gattin Ranch and on the Little Soldier fire.

OUTLOOK:

*****A RED FLAG WARNING HAS BEEN POSTED IN SOUTHWESTERN OREGON FOR GUSTY NORTHEAST WINDS AND POOR OVERNIGHT RELATIVE HUMIDITY RECOVERY*****

*****A RED FLAG WARNING HAS BEEN POSTED IN THE NORTHERN SACRAMENTO VALLEY AND SURROUNDING FOOTHILLS, AND THE TAHOE AND ELDORADO NATIONAL FORESTS FOR GUSTY NORTH TO NORTHEAST WINDS, LOW RELATIVE HUMIDITY AND POOR OVERNIGHT RELATIVE HUMIDITY RECOVERY*****

High pressure over the Northwest Area will bring sunny skies with a chance of showers and isolated thunderstorms along the Idaho-Washington border. High temperatures will be in the 70's and 80's. Minimum relative humidity will range from 25 to 35 percent in the west and 18 to 28 percent in the east. Winds will be northwest at 5 to 15 mph, gusting to 35 mph in southwestern Oregon.

Mostly sunny skies are forecast for the Southwest Area with a chance of late afternoon thunderstorms in west Texas. High temperatures will be in the 70's to upper 80's in the mountains and in the 90's to 110 at lower elevations. Minimum relative humidity will range from 20 to 35 percent in west Texas and 5 to 20 percent elsewhere. Winds will be south to west at 10 to 20 mph and gusty.

Unstable air spreading into the Rocky Mountain Area will bring widely scattered wet thunderstorms near and east of the Continental Divide. Isolated, mainly dry thunderstorms are forecast in northwestern Colorado. High temperatures will be in the 50's, 60's and 70's in the mountains and in the 60's, 70's and 80's at lower elevations. Minimum relative humidity will range from 5 to 13 percent in southwestern Colorado, 15 to 20 percent in northwestern Colorado, and 20 to 40 percent elsewhere. Winds will be southwest at 10 to 18 mph in western Colorado, and east at 10 to 15 mph in the remainder of the area.

The Southern California Area can expect sunny skies with morning low clouds and fog near the coast. High temperatures will be in the 60's and 70's along the coast, upper 70's to 80's in the mountains, 80's to 92 in the inland valleys, and 90's to 110 in the deserts. Minimum relative humidity will range from 10 to 20 percent in the mountains and deserts, 20 to 35 percent in the inland valleys, and above 45 percent near the coast. Winds will be southwest to northwest at 10 to 20 mph in the mountains and deserts, and onshore at 8 to 12 mph along the coast.

The Eastern Great Basin Area can expect mostly sunny skies in Utah and partly cloudy skies with scattered showers in Idaho. High temperatures will be 62 to 82 in the north and 82 to 99 in the south. Minimum relative humidity will range from 20 to 40 percent in Idaho and 4 to 18 percent in Utah. Winds will be southwest to northwest at 8 to 18 mph.

Low pressure over the Northern Rockies Area will bring scattered showers and thunderstorms. High temperatures will be 65 to 75 in Yellowstone National Park and northern Montana, and 75 to

85 elsewhere. Minimum relative humidity will range from 50 to 60 percent in North Dakota and 25 to 35 percent west of the Continental Divide. Winds will be southeast to 15 mph in Montana and west to 15 mph in northern Idaho.

The Southern Area can expect scattered showers in the Atlantic Coast states with sunny skies elsewhere. High temperatures will be in the 70's, 80's and 90's. Minimum relative humidity will be above 40 percent and winds will be variable to 10 mph.

www.nifc.gov/sixminutes/index_j.asp

AVIATION COMMUNICATIONS

Discuss the following information in terms of effective communication with aircraft.

Establish an air-to-ground frequency on the fire, and make sure everyone knows what it is.

Consider using national air-to-ground frequencies.

Discuss Guard frequencies:

How they work.

What frequencies are established for aircraft in your area?

Aviation communications should be clear, concise, short, and to the point.

Use standard terminology that can be understood by all people you are talking to.

Do not use local slang.

Before you key your microphone to talk, be sure to listen to ensure you don't cut into another transmission.

Know what you want to say before you key the microphone.

Identify who you want to talk to by the call sign and identify yourself in every transmission.

If the frequency gets congested, request another frequency. Upon receipt, ensure that all people who need to be on the new frequency transfer to that frequency.

Give only meaningful information on the radio.

Give accurate and descriptive ground information when describing a specific place on the ground.

When giving ground descriptions, describe the location as if you are viewing the location from the direction an aircraft would be traveling.

Use easily understandable directions, such as north, south, east, west, 2 o'clock, 9 o'clock, left 20 degrees, right 45 degrees, etc.

When giving directions, always give them in relation to the pilot's perspective.
