**INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, FEBRUARY 08, 2002- 1000 MST
NATIONAL PREPAREDNESS LEVEL 1**

CURRENT SITUATION:

Initial attack activity was moderate in the Southern Area and light elsewhere. The Southern Area reported four new large fires and contained five large fires. Prescribed burning projects continued in Northern California, Southern California, the Northwest, Southwest, Rocky Mountain, Eastern and Southern Areas. Very high fire indices were reported in Arizona.

SOUTHERN AREA LARGE FIRES:

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
DANTE	SC	FMF	238	100	---	0	0	0	0	0	5K

PARTIN	FL	FLS	300	100	---	0	0	0	0	0	UNK

FMF = Francis Marion & Sumter National Forest

SBR = Sabine National Wildlife Refuge

FLS = Florida Division of Forestry

OUTLOOK:

High pressure keeps the Southern Area dry for most of the upcoming weekend, except for an area of low pressure moving from the Dakotas, across southern Iowa and toward New England will pull a cold front across the Southern Area, Saturday and Sunday. This front will mainly be a dry passage for Oklahoma and Texas, as well as for most of Louisiana and southern Mississippi. Rainfall with the front will begin to affect eastern Arkansas and northern Mississippi Sunday morning. Although the precipitation is expected to be light, it should become more widespread as the front advances eastward. By Sunday evening, precipitation should extend from north Georgia to Washington D.C. and it should turn to snow across Kentucky, Virginia and eastern Tennessee and possibly the mountains of western North Carolina. Cold air pours in behind this system bringing dry and cool weather through the evening of the 14th. The next chance of rain develops in west Texas the 16th and spreads eastward along the Gulf Coast the 17th and continues further east the 18th. High temperatures will be in the 50s and 60s for most of the week, except for 40s in Oklahoma, Kentucky and northern Virginia. Strong northwest winds of 15 to 25 mph are possible behind this weekends frontal passage. Wind speeds could approach 30 mph in Kentucky and western Virginia, Sunday night into Monday. Minimum relative humidity values may approach 25 percent over the Appalachian Mountains and into the Carolina s with an off-shore flow.
