

**INCIDENT MANAGEMENT SITUATION REPORT
MONDAY, JULY 1, 2002 0530 MDT
NATIONAL PREPAREDNESS LEVEL 5**

CURRENT SITUATION:

Initial attack activity was moderate in the Rocky Mountain, Southwest, Southern California and Northern California Areas and light elsewhere. Nationally, 86 new fires were reported. Four of these became large fires, three in the Eastern Great Basin Area and one in the Northern California Area. Seven large fires were contained, two each in the Rocky Mountain and Eastern Great Basin Areas, and one each in the Southern California, Southwest and Northern California Areas. Very high to extreme fire indices were reported in Arizona, California, Colorado, Kansas, Nevada, New Mexico, Oregon, Texas, Utah and Wyoming.

The 146th Air Expeditionary Group (Provisional), under the command of Brigadier General John Iffland, is conducting Modular Airborne Fire Fighting System (MAFFS) operations, supporting the National Interagency Fire Center wildland fire suppression effort. Two C-130H3 aircraft from the 302nd Air Wing, US Air Force Reserve, four C-130H3 aircraft from the 145th Air Wing, North Carolina Air National Guard and a joint 302nd/145th support group have been deployed to conduct air tanker missions at Peterson Field, Colorado. Lieutenant Colonel Ted Wright is the immediate commander for the deployed aircraft.

ROCKY MOUNTAIN AREA LARGE FIRES:

Priorities are being established by the Rocky Mountain Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Chesley) is assigned to manage the Missionary Ridge fire.

GRIZZLY GULCH, South Dakota State Forestry. A Type 1 Incident Management Team (Hefner) is assigned. This fire is on the outskirts of Deadwood, SD. Torching, spotting and running were observed in ponderosa pine and grass. Crews are constructing fireline in steep terrain with limited access. Deadwood and surrounding communities have been evacuated and structure protection is in place. Three additional outbuildings were confirmed lost.

MISSIONARY RIDGE, San Juan National Forest. Two Type 1 Incident Management Teams (Hart and Bennett) are assigned. Bennett's team is also managing the Valley fire. Missionary Ridge is five miles northeast of Durango, CO and the Valley fire is adjacent to and west of US Highway 550. The fires are burning in gambel oak, ponderosa pine and mixed conifer forest. Crowning runs were observed on the northeast flank of Missionary Ridge. Crews are constructing direct attack handline on the northeast and northwest flanks and mopping up other divisions. Residents of three subdivisions were allowed to return to their homes; six subdivisions and four ranches remain evacuated.

KRAFT, Standing Rock Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team

(Gardner) will assume command of the fire today. This fire is on the outskirts of Shields, ND. The communities of Shields and Porcupine are threatened. No new information was reported.

BEAR, Dinosaur National Monument. A Type 2 Incident Management Team (Chrisman) is assigned. This wind-driven fire is burning in sagebrush, pinyon pine and juniper 20 miles northeast of Dinosaur, CO on the Yampa River bench. Group and single tree torching were observed on the south and east flanks. Aerial resources successfully suppressed a slopover across the Yampa River. Crews are constructing fireline and hot-spotting on the west flank. Difficult terrain, limited access and very dry fuels are hampering containment efforts. An evacuation plan has been drafted for several ranches and the Greystone subdivision; structure protection is in place.

DALEY COMPLEX, Casper Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Johnson) has been ordered. This complex, comprised of the Daley Draw and Hairy fires, is 30 miles north of Gillette, WY. Extreme fire behavior, torching, crowning and long range spotting were observed in ponderosa pine, sagebrush and grass.

REESE MOUNTAIN, Rawlins District, Bureau of Land Management. A Type 1 Incident Management Team (Wood) is assigned. Wood's team is also managing the Hensel incident. This fire is burning 30 miles west of Wheatland, WY in heavy dead and down lodgepole pine and ponderosa pine. Extreme fire behavior, sustained crowning runs and short range spotting were observed as the fire advanced south and east. Crews are flanking the fire with direct and indirect attack handline and burning out along roads. Dozers are building fireline along the north and west flanks. Numerous residences and commercial properties are threatened; voluntary evacuations are underway at several ranches.

HENSEL, Medicine Bow National Forest. A Type 1 Incident Management Team (Wood) is assigned. A Type 2 Incident Management Team (Swope) has been ordered. This fire is burning in bug kill ponderosa pine 20 miles northwest of Wheatland, WY. Torching and sustained crowning runs were observed in the interior. Aerial resources are being utilized on the unsecured perimeter along the north flank due to steep and dangerous terrain. Excellent progress was made mopping up other divisions.

SPRING CREEK, White River National Forest. A Type 2 Incident Management Team (Hartman) is assigned. This fire is burning in spruce and brush eight miles north of New Castle, CO. Significant crowning runs were observed as the fire advanced north, east and south. Crews are constructing handline on the south flank. Steep, inaccessible terrain, long term drought and heavy fuel loading are impeding suppression efforts. Numerous residences and outbuildings are threatened.

HAYMAN, Pike-San Isabel National Forest. A Type 1 Incident Management Team (Lohrey) is assigned. This fire is six miles northwest of Lake George, CO. Creeping and smouldering were observed in ponderosa pine, gambel oak and mixed conifer forest. Crews are constructing direct attack fireline on the west flank in the Lost Creek Wilderness Area with support from aerial resources. Mopup and fireline rehabilitation are underway on the north, south and east flanks.

WEST BEAVER, Grand Mesa-Uncompahgre-Gunnison National Forest. A Type 2 Incident Management Team (Sisk) is assigned. This fire is 15 miles south of Norwood, CO. Isolated torching and creeping were observed in spruce, fir and aspen. Crews made good progress mopping up spot fires with support from aerial resources.

COAL SEAM, Counties Dispatched by Grand Junction. A Fire Use Management Team (Cook) is assigned to manage suppression operations and develop long term assessments. This fire is smouldering and creeping in spruce, subalpine fir and aspen four miles north of Glenwood Springs, CO. A confinement strategy is being utilized on the north flank due to extremely steep and dangerous terrain. Personnel are mopping up completed fireline and monitoring the northern perimeter.

POWELL, Casper Field Office, Bureau of Land Management. This fire, burning in lodgepole pine and grass, is 28 miles north of Gillette, WY. All containment lines were lost yesterday due to extreme fire behavior. Dozers have re-initiated fireline construction. Structure protection is in place for several residences and numerous commercial properties.

WATT, Casper Field Office, Bureau of Land Management. This fire is 30 miles northeast of Buffalo, WY. All containment lines were lost yesterday; dozers have re-initiated fireline construction. Structure protection is in place for ten commercial properties.

EASTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

MUSTANG, Ashley National Forest. This fire is burning in Douglas fir, pinyon pine, juniper and sagebrush one mile north of Dutch John, UT. Extreme fire behavior, crowning and spotting were observed. Dutch John and Mustang Recreation Complex have been evacuated; structure protection is in place. The Flaming Gorge Dam and Power Plant are threatened. Highway 191 is closed.

EAST FORK, Wasatch-Cache National Forest. A Type 2 Incident Management Team (Van Bruggen) is assigned. This fire is burning in lodgepole pine and spruce 35 miles south of Evanston, WY. Short uphill crowning runs with 100 foot flame lengths and medium range spotting were observed. Crews are holding fireline on the southwest perimeter and constructing handline on the west flank. Three hundred residences are threatened and 40 summer homes, a Boy Scout Camp and several campgrounds have been evacuated. Structure protection is in place.

RATTLE COMPLEX, Moab Field Office, Bureau of Land Management. A transfer of command from Shell's Type 2 Incident Management Team to Vail's Type 1 Incident Management Team will occur today. This complex is burning 20 miles northeast of Green River, UT in oak brush, mountain mahogany, pinyon pine, Douglas fir and ponderosa pine. Torching and crowning were observed on the south and east flanks. Several ranches are threatened.

BLACK CANYON, Moab Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Broyles) is assigned. This fire is 20 miles northeast of Green River, UT. Moderate upslope runs were observed in oak brush, mountain mahogany, pinyon pine, Douglas fir and ponderosa pine as the fire advanced north. Anchor points were established on the northeast flank and crews are constructing fireline. Burn out operations were successful at Weaver Reservoir and Hill Creek.

COW CAMP, Bridger-Teton National Forest. This fire is 30 miles southeast of Pinedale, WY. Low ground fire, creeping and smouldering were observed in lodgepole pine, Englemann spruce and subalpine fir. Crews have spiked out and are building handline on the south flank. A cabin at Cow Camp is threatened.

SPRINGVILLE, Uinta National Forest. A Type 2 Incident Management Team has been ordered. This fire is one mile north of Springville, UT. No further information was reported.

PRICE CANYON, Moab Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Shell) will assume command of this fire. The fire is 12 miles northwest of Price, UT. No further information was reported.

SOUTHWEST AREA LARGE FIRES:

Priorities are being established by the Southwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Ribar) is assigned to manage the Rodeo/Chediski complex.

RODEO/CHEDISKI COMPLEX, Fort Apache Agency, Bureau of Indian Affairs. Four Type 1 Incident Management Teams (Humphrey, Bateman, Dash, and Martin) are assigned. The Rodeo and Chediski fires are burning in chaparral, ponderosa pine, juniper and brush three miles north of Cibecue, AZ. Moderate fire behavior was observed. Crews successfully completed burn out operations along the entire southwest flank and are holding firelines on the northwest flank. Mopup and fireline rehabilitation is underway on the southeast and northeast flanks. Overgaard, Heber and surrounding populated areas remain evacuated; structure protection is in place. Evacuation centers are open in Winslow and Holbrook.

CARRIZO #1, Navajo Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Sears) has been ordered. This fire is 15 miles south of Teec Nos Pos, AZ. Extreme fire behavior was observed in ponderosa pine, juniper and pinyon pine. Steep terrain and limited access are hampering containment efforts.

WALNUT COMPLEX, Socorro District, New Mexico State Forestry Office. This complex, comprised of the Walnut, Center, Wooley Bugger 1 and Wooley Bugger 2 fires, is 14 miles east of Cloverdale, NM. Moderate rate of spread was observed in grass and brush. No further information was reported.

PARACHUTE ADAM, Socorro District, New Mexico State Forestry Office. This fire, burning in grass and brush, is 14 miles north of Cloverdale, NM. Minimal fire behavior was observed.

TEJON, Las Vegas District, New Mexico State Forestry Office. This fire is two miles northwest of Vaughn, NM. No new information was reported.

NORTHERN ROCKIES AREA LARGE FIRES:

LINE CREEK, Miles City Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Kechter) is assigned. This fire is 35 miles southwest of Broadus, MT. Extreme fire behavior, torching and significant runs were observed in ponderosa pine, juniper and grass. The fire advanced south, northwest and southeast, jumping containment lines on several occasions. Crews have anchored at the Powder River and are flanking the fire to the northwest with handline. Steep terrain, low relative humidity, dry fuels, limited access, high temperatures and erratic winds are impeding suppression efforts.

LINE CREEK	MT	MCD	5,000	10	7/3	167	4	17	4	0	NR

SOUTHERN AREA LARGE FIRES:

BLACKJACK BAY COMPLEX, Okefenokee National Wildlife Refuge. This lightning-caused complex, consisting of the Blackjack 02, Bay Creek and Number One Island fires, is ten miles northeast of Fargo, GA. The complex is being managed by the most cost efficient alternative under the Wildland Fire Situation Analysis confinement/containment strategy. Priorities are firefighter and public safety, economics of suppression and ecosystem health. Precipitation has raised swamp water levels, decreasing fire behavior. Personnel are monitoring fire activity.

OUTLOOK:

*****A RED FLAG WARNING HAS BEEN POSTED IN MUCH OF WYOMING FOR HIGH TEMPERATURES, LOW RELATIVE HUMIDITY AND STRONG WINDS*****

The Rocky Mountain Area can expect mostly sunny skies with isolated dry thunderstorms on the east side of the Continental Divide in southern Colorado. High temperatures will be mid 70's to 80's in the mountains and mid 80's to 90's at lower elevations. Minimum relative humidity will range from 12 to 22 percent in Wyoming and the Black Hills, in the single digits at lower elevations in western Colorado, and 9 to 18 percent in southern Wyoming and the remainder of Colorado. Winds will be west to north at 15 to 25 mph, gusting to 35 mph in the Red Flag Warning areas.

The Southwest Area can expect partly to mostly sunny skies with scattered dry thunderstorms across western New Mexico, eastern Arizona and along the Mogollon Rim. A chance of wet thunderstorm activity is forecast in west Texas and the Sangre de Cristo, Capitan and Sacramento Mountains of eastern New Mexico. High temperatures will be in the 80's in the mountains and near 112 at lower elevations. Minimum relative humidity will range from 5 to 15 percent in Arizona and western New Mexico and 20 to 40 percent elsewhere. Winds will be east to south at 10 to 20 mph in eastern New Mexico and west Texas. In Arizona and western New Mexico, winds will be west at 5 to 15 mph, gusting to 20 mph over the mountains.

A westerly flow over the Eastern Great Basin Area will bring mostly sunny skies. High temperatures will be 75 to 90 in the north and 90 to 105 in the south. Minimum relative humidity will range from 3 to 15 percent in southern Utah and 12 to 25 elsewhere. Winds will be west at 10 to 25 mph.

A weak cool front moving across the Northern Rockies Area will bring mostly sunny to partly cloudy skies with a chance of scattered showers and thunderstorms. Temperatures will be warm and minimum relative humidity will be above 20 percent in most locations. Winds will be northwest at 10 to 20 mph.

Warm, humid air from the Gulf of Mexico will bring partly to mostly cloudy skies with scattered showers and thunderstorms to the Southern Area. High temperatures will be upper 80's to low 90's and minimum relative humidity will be above 50 percent. Winds will be south at 10 to 15 mph in the western third of the region with light, easterly winds elsewhere.

A southeast flow over the Southern California Area will bring mostly sunny skies with morning low clouds and fog along the coast. High temperatures will be in the 70's in coastal areas, in the upper

80's to near 100 in the mountains and inland valleys, and upper 90's to 110 in the deserts. Minimum relative humidity will range from 5 to 15 percent in the deserts, 8 to 18 percent in the mountains, 15 to 35 percent in the valleys, and above 55 percent near the coast. Winds will be onshore at 6 to 12 mph in coastal areas and southeast to southwest at 8 to 20 mph elsewhere.

High pressure building into the Northern California Area will bring sunny skies with morning low clouds and fog along the coast. High temperatures will be in the 60's and 70's near the coast and mid 80's to 105 inland. Minimum relative humidity will range from 10 to 22 percent. Winds will be north at 12 to 22 mph with lighter winds further south in the Sacramento Valley.

AVIATION MISHAP RESPONSE ACTIONS

Having a written mishap response action posted and accessible to all employees is an important first step. Having a list of actions to follow will ensure that nothing is missed in a stressful, time-critical period. Immediate, positive action is necessary. Any delay may affect someone's chances of survival. Conduct rescue operations keeping the following priorities in mind:

Preserve life.

Do whatever is necessary to extricate injured occupants and to extinguish fires, keeping in mind the necessity of protecting and preserving evidence.

Document and/or photograph the location of any debris that must be disturbed in order to carry out rescues and/or fire suppression activities.

Secure the area. Treat the crash site as a crime scene. Arrange for security at the accident scene if necessary. Determine if hazardous materials were on the aircraft. Deny access except to credentialed officials and escorted media.

Be aware that crash sites can be dangerous due to hazardous cargo, flammable and toxic fluids, sharp objects, disease, adverse terrain, hot/cold weather conditions, and fire. Exercise good judgment, utilize available protective devices and clothing, and use extreme caution when working near the wreckage site. Do not exceed your physical limitations.
