

**INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY, JULY 2, 2002 0530 MDT
NATIONAL PREPAREDNESS LEVEL 5**

CURRENT SITUATION:

Initial attack activity was moderate in the Southern California and light elsewhere. Nationally, 140 new fires were reported. Five of these became large fires, three in the Rocky Mountain Area, one in the Southwest Area and one in the Southern California Area. Two large fires were contained, one each in the Rocky Mountain and the Southwest Areas. Very high to extreme fire indices were reported in Arizona, California, Colorado, Kansas, Nevada, New Mexico, Oregon, Texas, Utah, Washington and Wyoming.

The 146th Air Expeditionary Group (Provisional), under the command of Brigadier General John Iffland, is conducting Modular Airborne Fire Fighting System (MAFFS) operations, supporting the National Interagency Fire Center wildland fire suppression effort. Two C-130H3 aircraft from the 302nd Air Wing, US Air Force Reserve, four C-130H3 aircraft from the 145th Air Wing, North Carolina Air National Guard and a joint 302nd/145th support group have been deployed to conduct air tanker missions at Peterson Field, Colorado. Lieutenant Colonel Ted Wright is the immediate commander for the deployed aircraft.

ROCKY MOUNTAIN AREA LARGE FIRES:

Priorities are being established by the Rocky Mountain Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Chesley) is assigned to manage the Missionary Ridge fire.

GRIZZLY GULCH, South Dakota State Forestry. A Type 1 Incident Management Team (Hefner) is assigned. This fire is on the outskirts of Deadwood, SD. Creeping, backing and short uphill runs were observed in ponderosa pine and grass. Crews are constructing fireline in steep terrain with limited access. Deadwood and surrounding communities have been evacuated and structure protection is in place. Six outbuildings were confirmed lost.

MISSIONARY RIDGE, San Juan National Forest. Two Type 1 Incident Management Teams (Hart and Bennett) are assigned. Bennett's team is also managing the Valley fire. Missionary Ridge is five miles northeast of Durango, CO and the Valley fire is adjacent to and west of US Highway 550. The fires are burning in gambel oak, ponderosa pine and mixed conifer forest. Isolated torching and short runs were observed on the northeast flank of Missionary Ridge. Crews are constructing direct attack handline on the northeast and northwest flanks and mopping up other divisions. Residents of Durango Hills were allowed to return to their homes; four subdivisions and four ranches remain evacuated.

REESE MOUNTAIN, Rawlins District, Bureau of Land Management. A Type 1 Incident Management Team (Wood) is assigned. Wood's team is also managing the Hensel incident. This

fire is burning 30 miles west of Wheatland, WY in heavy dead and down lodgepole pine and ponderosa pine. Extreme fire behavior, sustained crown runs and long range spotting were observed. Steep and rocky terrain are hampering containment efforts. Numerous residences and commercial properties are threatened. Structure protection in place; voluntary evacuations are underway at several ranches.

DALEY COMPLEX, Casper Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Johnson) has been ordered. This complex, comprised of the Daley Draw and Hairy fires, is 30 miles north of Gillette, WY. Extreme fire behavior, torching, crowning and long range spotting were observed in ponderosa pine, sagebrush and grass.

WATT, Casper Field Office, Bureau of Land Management. This fire is 30 miles northeast of Buffalo, WY. Ten commercial properties are threatened. No further information was received.

POWELL, Casper Field Office, Bureau of Land Management. This fire, burning in lodgepole pine and grass, is 28 miles north of Gillette, WY. Extreme fire behavior with running, crowning, torching and spotting was observed. Structure protection is in place for several residences and numerous commercial properties.

SPRING CREEK, White River National Forest. A Type 2 Incident Management Team (Hartman) is assigned. This fire is burning in spruce and brush eight miles north of New Castle, CO. Significant runs were observed as the fire advanced northeast. Crews are constructing handline on the south flank and burning out near Canyon Creek. Aerial resources are assisting suppression efforts. Steep, inaccessible terrain, long term drought and heavy fuel loading are impeding suppression efforts. Numerous residences and outbuildings are threatened.

KRAFT COMPLEX, Standing Rock Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Gardner) will assume command of the fire at 0600 MDT. This complex consists of the Kraft, Bale II, Twin II and Kenel Again fires near Shields, ND. Personnel are patrolling and mopping up. The communities of Shields and Porcupine are threatened. Forty-five structures were confirmed lost.

BEAR, Dinosaur National Monument. A Type 2 Incident Management Team (Chrisman) is assigned. This wind-driven fire is burning in sagebrush, pinyon pine and juniper 20 miles northeast of Dinosaur, CO on the Yampa River bench. Group and single tree torching were observed on the south and east flanks. Crews are constructing fireline on the north flank. Difficult terrain, limited access and very dry fuels are hampering containment efforts. An evacuation plan has been drafted for several ranches and the Greystone subdivision; structure protection is in place.

HAYMAN, Pike-San Isabel National Forest. A Type 1 Incident Management Team (Lohrey) is assigned. This fire is six miles northwest of Lake George, CO. Creeping and smouldering were observed in ponderosa pine, gambel oak and mixed conifer forest. Crews are constructing direct attack fireline on the west flank in the Lost Creek Wilderness Area with support from aerial resources. Mopup and fireline rehabilitation are underway on the north, south and east flanks.

HENSEL, Medicine Bow National Forest. A transition from Wood's Type 1 Incident Management Team to Swope's Type 2 Incident Management Team will occur today. This fire is burning in bug kill ponderosa pine 20 miles northwest of Wheatland, WY. Flare-ups in the interior were observed. Aerial resources are being utilized on the unsecured perimeter along the north flank due to steep and dangerous terrain. Crews are mopping up and rehabilitating line.

COAL SEAM, Counties Dispatched by Grand Junction. A Fire Use Management Team (Cook) is assigned to manage suppression operations and develop long term assessments. This fire is smouldering and creeping in spruce, subalpine fir and aspen four miles north of Glenwood Springs, CO. A confinement strategy is being utilized on the north flank due to extremely steep and dangerous terrain. Personnel are rehabilitating fireline and monitoring the northern perimeter.

SOUTH FORK II, Wind River Agency, Bureau of Indian Affairs. This fire is ten miles west of Fort Washakie, WY and is burning in brush and timber. Crowning , torching, running and spotting were observed. High winds, low relative humidity and rough, inaccessible terrain is hampering suppression efforts.

SHE BEAR MOUNTAIN, Big Horn National Forest. This fire is 15 miles west of Sheridan, WY and burning in heavy dead-down timber. Minimal fire activity was observed. Crews are constructing handline.

FOUNTAIN GULCH, Fort Collins Dispatch Center Counties, Colorado State Forest Service. This fire is north of Idaho Springs, CO. Difficult access is hampering containment efforts.

EASTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

MUSTANG, Ashley National Forest. A Type 1 Incident Management Team (Melton) will assume command of the fire today. This fire is burning in Douglas fir, pinyon pine, juniper and sagebrush one mile north of Dutch John, UT. Extreme fire behavior with 200 foot flame lengths was observed. Dutch John and the Mustang Recreation Complex have been evacuated; structure protection is in place. The Flaming Gorge Dam and Power Plant are threatened. Highway 191 is closed.

EAST FORK, Wasatch-Cache National Forest. A Type 2 Incident Management Team (Van Bruggen) is assigned. This fire is burning in lodgepole pine and spruce 35 miles south of Evanston, WY. Short uphill crowning runs with 150 foot flame lengths and long range spotting were observed. Crews are holding fireline on the southwest perimeter and constructing handline on the west flank. Steep terrain and dry fuels are hampering containment efforts. Three hundred residences are threatened. Forty summer homes, a Boy Scout Camp and several campgrounds have been evacuated. Structure protection is in place.

RATTLE COMPLEX, Moab Field Office, Bureau of Land Management. A transfer of command from Shell's Type 2 Incident Management Team to Vail's Type 1 Incident Management Team will occur today. This complex is burning 20 miles northeast of Green River, UT in oak brush, mountain mahogany, pinyon pine, Douglas fir and ponderosa pine. Torching and crowning were observed on the north, south and east flanks. Crews are burning out in Westwater Canyon. Several ranches are threatened. One structure was confirmed lost.

BLACK CANYON, Moab Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Broyles) is assigned. This fire is 20 miles northeast of Green River, UT. Extreme fire behavior with crown runs were observed in oak brush, mountain mahogany, pinyon pine, Douglas fir and ponderosa pine as the fire advanced north. Crews and dozers are constructing line on the north and west flanks. Aerial resources are assisting containment efforts.

COW CAMP, Bridger-Teton National Forest. This fire is 30 miles southeast of Pinedale, WY. Torching and spotting were observed in lodgepole pine, Englemann spruce and subalpine fir. Crews have spiked out and are building handline on the south flank. A cabin at Cow Camp is threatened.

SPRINGVILLE, Uinta National Forest. A Type 2 Incident Management Team (Rios) has been ordered. This fire is one mile north of Springville, UT. Short runs and torching were observed in oak brush, pinyon pine and juniper. Aerial resources are assisting suppression efforts. Forty-five residences are threatened.

PRICE CANYON, Moab Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Shell) has been ordered. The fire is 12 miles northwest of Price, UT and is burning in pinyon pine, juniper and brush. Creeping and torching were observed. Crews are constructing handline.

SOUTHWEST AREA LARGE FIRES:

Priorities are being established by the Southwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Ribar) is assigned to manage the Rodeo/Chediski complex.

RODEO/CHEDISKI COMPLEX, Fort Apache Agency, Bureau of Indian Affairs. Four Type 1 Incident Management Teams (Humphrey, Bateman, Dash, and Martin) are assigned. The Rodeo and Chediski fires are burning in chaparral, ponderosa pine, juniper and brush three miles north of Cibecue, AZ. Moderate fire behavior was observed on the southwest flank. Mopup and fireline rehabilitation is underway on the southeast, northwest and northeast flanks. Overgaard, Heber and surrounding populated areas remain evacuated; structure protection is in place. Evacuation centers are open in Winslow and Holbrook.

CARRIZO #1, Navajo Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Sears) is assigned. This fire is 15 miles south of Teec Nos Pos, AZ. Extreme fire behavior with crowning and running was observed in ponderosa pine, juniper and pinyon pine. Crews are constructing handline on the west flank. Steep terrain and limited access are hampering containment efforts. Reduction in acreage was due to better mapping.

WALNUT COMPLEX, Socorro District, New Mexico State Forestry Office. This complex, comprised of the Walnut, Center, Wooley Bugger 1 and Wooley Bugger 2 fires, is 14 miles east of Cloverdale, NM. Moderate rates of spread was observed in grass and brush. Engines are patrolling the fire. Reduction in acreage was due to better mapping.

PARACHUTE ADAM, Socorro District, New Mexico State Forestry Office. This fire, burning in grass and brush, is 14 miles north of Cloverdale, NM. No new information was reported.

TEJON, Las Vegas District, New Mexico State Forestry Office. This fire is two miles northwest of Vaughn, NM. No new information was reported. This will be the last report unless new information is received.

GNF = Gila National Forest

SOUTHERN CALIFORNIA AREA LARGE FIRES:

BIRCH, Inyo National Forest. A Type 2 Incident Management Team (Conrad) will assume command at 0600 PDT. This fire is sixteen miles northwest of Bishop, CA burning in brush, pinyon pine and Jeffrey pine. Active fire behavior with a rapid rate of spread was observed. Two hundred residences are threatened. Structure protection is in place. A mandatory evacuation is in place for Swall Meadows, Toms Place and recreations areas.

NORTHERN ROCKIES AREA LARGE FIRES:

LINE CREEK, Miles City Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Kechter) is assigned. This fire is 35 miles southwest of Broadus, MT burning in ponderosa pine, juniper and grass. Significant activity with a two mile run was observed. Crews are burning out from the dozer line on the northwest flank. Steep terrain, low relative humidity, dry fuels, limited access, high temperatures and erratic winds are impeding suppression efforts.

SOUTHERN AREA LARGE FIRES:

BLACKJACK BAY COMPLEX, Okefenokee National Wildlife Refuge. This lightning-caused complex, consisting of the Blackjack 02, Bay Creek and Number One Island fires, is ten miles

northeast of Fargo, GA. The complex is being managed by the most cost efficient alternative under the Wildland Fire Situation Analysis confinement/containment strategy. Priorities are firefighter and public safety, economics of suppression and ecosystem health. Precipitation has raised swamp water levels, decreasing fire behavior. Personnel are monitoring fire activity.

OUTLOOK:

*****A FIRE WEATHER WATCH HAS BEEN ISSUED FOR MUCH OF WYOMING FOR HIGH TEMPERATURES, LOW RELATIVE HUMIDITY, STRONG ERRATIC WINDS AND HIGH HAINES INDICES*****

*****A FIRE WEATHER WATCH HAS BEEN ISSUED FOR MOST OF CENTRAL AND SOUTHERN UTAH FOR DRY LIGHTNING AND STRONG ERRATIC WINDS*****

The Rocky Mountain Area can expect mostly sunny skies with thunderstorms along the Colorado Front Range and in the Black Hills, and isolated dry thunderstorms near and on the west side of the Continental Divide in Colorado. High temperatures will be in the upper 70's in the mountains and low to mid 80's at lower elevations. Minimum relative humidity will range from 20 to 30 percent in Wyoming and the Black Hills, in the single digits at lower elevations in western Colorado, and 12 to 20 percent in southern Wyoming and the remainder of Colorado. Winds will be strongest in the watch area and variable elsewhere.

The Southwest Area can expect partly to mostly sunny skies with scattered dry thunderstorms across western New Mexico and eastern Arizona. A chance of wet thunderstorm activity is forecast in west Texas and eastern New Mexico. High temperatures will be in the 80's in the mountains and near 115 at lower elevations. Minimum relative humidity will range from 5 to 15 percent in Arizona and western New Mexico and 20 to 40 percent elsewhere. Winds will be east to south at 10 to 20 mph in eastern New Mexico and west Texas. In Arizona and western New Mexico, winds will be west at 5 to 15 mph, gusting to 20 mph over the mountains.

A southwesterly flow over the Eastern Great Basin Area will bring partly to mostly sunny skies with scattered thunderstorms and dry lightning in southern Utah. High temperatures will be 90 to 105 in the valleys and 75 to 85 in the mountains. Minimum relative humidity will range from 4 to 15 percent in southern Utah and 10 to 25 elsewhere. Winds will be southwest at 10 to 25 mph with

gusts near thunderstorms.

A southeast flow over the Southern California Area will bring mostly sunny skies with morning low clouds and fog along the coast with a chance of afternoon thunderstorms. High temperatures will be in the 70's in coastal areas, in the mid 80's to mid 90's in the mountains and inland valleys, and low 90's to 112 in the deserts. Minimum relative humidity will range from 8 to 20 percent in the deserts, 15 to 30 percent in the mountains, 25 to 40 percent in the valleys, and above 55 percent near the coast. Winds will be onshore at 7 to 15 mph in coastal areas and south to southwest at 10 to 20 mph elsewhere.

www.nifc.gov/sixminutes/index_j.asp

<u>INITIAL ATTACK FIRE SIZEUP/SAFETY</u>
<u>Having a good size-up is important in order to give both the Incident Commander (IC) and fire management a good idea of what problems exist and what resources may be needed for effective firefighting. Use the following reporting factors for size-up. Discuss others that may be used.</u>
<u>Fire name and location</u> <u>Terrain (slope, aspect, elevation) and position of fire on the slope</u>
<u>Size of fire</u> <u>Fuel type, anticipated control problems, and spread potential</u>
<u>Values threatened</u> <u>Fire behavior</u>
<u>Resources on the fire and those needed</u> <u>Estimated containment and control times</u>
<u>Cause (known, suspected, under investigation)</u>
<u>After your initial size-up of the fire and/or transition from an initial attack IC, answer the following questions. Repeat this analysis whenever there is a change, or predicted change, in conditions on the fire.</u>
<u>Have you sized up the fire and relayed the information to dispatch?</u>
<u>Is the observed fire weather consistent with the forecast?</u>
<u>Can you control the fire with the resources available (on the incident or soon to be on the incident) and under the expected conditions?</u>

<u>Have you developed a plan to attack the fire (direct or indirect, anchor points, escape routes, head or flank attack, priority areas); and have you communicated this information to all personnel assigned to the incident, including new arrivals?</u>
<u>Are lookouts in place or can you see all of the fire area?</u>
<u>Can you communicate with everyone on the fire and with dispatch?</u>
<u>Are escape routes and safety zones established? If you are using the black, is it completely burned and without a reburn potential?</u>
<u>Are safety and the standard fire orders being followed?</u>
<u>Do you have a complete list of what resources have been ordered for the fire?</u>
<u>Will you control the fire before the next operational period; and if you won't, or the size of the organization exceeds the IC's capability to manage, have you informed the agency Fire Management Officer?</u>
