

**INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY, JULY 10, 2002 0530 MDT
NATIONAL PREPAREDNESS LEVEL 5**

CURRENT SITUATION:

Initial attack activity was moderate in the Eastern Great Basin, Rocky Mountain, Southwest and Northern California Areas and light elsewhere. Nationally, 360 new fires were reported. Three of these became large fires, one in the Southern Area and two in the Eastern Great Basin Area. Four large fires were contained, one in the Western Great Basin Area and three in the Eastern Great Basin Area. Very high to extreme fire indices were reported in Arizona, California, Colorado, Kansas, Nebraska, Nevada, New Mexico, Montana, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington and Wyoming.

EASTERN GREAT BASIN AREA

LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

EAST FORK, Wasatch-Cache National Forest. A Type 1 Incident Management Team (Raley) is assigned. This fire is burning in lodgepole pine and spruce 35 miles south of Evanston, WY. Extreme fire behavior with torching, spotting and short surface fire runs was observed. Crews are constructing and improving fireline. Steep terrain, spotting and dry fuels are hampering containment efforts. Evacuation orders remain in place for Christmas Meadows subdivisions, scattered homes and a Boy Scout camp. Structure protection is in place for threatened residences.

NORTH HORN MOUNTAIN, Manti-LaSal National Forest. A Type 2 Incident Management Team (Suwyn) is assigned. This fire is burning in sage and mixed conifer 13 miles southwest of Castle Dale, UT. Creeping and running fire behavior was observed.

RATTLE COMPLEX, Moab Field Office, Bureau of Land Management. A Type 1 Incident Management Team (Vail) is assigned. This complex is burning 20 miles northeast of Green River, UT in oak brush, mountain mahogany, pinyon pine, Douglas fir and ponderosa pine. Interior pockets showed active fire behavior, and short surface fire and crown runs were observed on the southern flank. Crews are constructing direct attack fireline, mopping up and cold trailing. Aerial resources are assisting suppression efforts in areas inaccessible to ground personnel. Several ranches are threatened.

BLACK CANYON, Moab Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Broyles) is assigned. This fire is 20 miles northeast of Green River, UT. Extreme fire behavior with interior torching and spotting was observed in oak brush, mountain mahogany, pinyon pine, Douglas fir and ponderosa pine. Down drafts from passing thunder cells and extremely rugged terrain are impeding containment efforts. Crews are hot spotting, mopping up and rehabilitating dozer line. Aerial resources are being utilized for burnout operations.

SPRINGVILLE, Uinta National Forest. A Type 2 Incident Management Team (Rios) is assigned. This fire is one mile north of Springville, UT. Low to moderate fire behavior was observed in oak brush, pinyon pine and juniper. Steep, rocky and inaccessible terrain is hampering containment efforts.

INDIAN KNOLL, South Central State, Utah State. This fire is five miles south of Scipio, UT. Smouldering and creeping fire behavior was observed in ponderosa pine and mixed conifer. Crews are constructing direct attack handline and mopping up.

WEB, Lower Snake River District, Bureau of Land Management. The Jack Knife fire has burned into the Web fire and both are now being managed as one incident. The fire is burning in sage and bitter brush three miles west of Ola, ID. Very active fire behavior was observed on the north flank. Crews are constructing fireline and mopping up.

ROCKY MOUNTAIN AREA LARGE FIRES:

Priorities are being established by the Rocky Mountain Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

KRAFT COMPLEX, Standing Rock Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Gardner) is assigned. This complex is 50 miles south of Bismarck, ND and consists of 16 fires. Smouldering and creeping fire behavior was observed. Crews are patrolling and mopping up.

MISSIONARY RIDGE, San Juan National Forest. A Type 1 Incident Management Team (Hart) and a Type 2 Incident Management Team (Carlson) are assigned. This fire is five miles northeast

of Durango, CO in gambel oak, ponderosa pine and mixed conifer forest. Fire behavior was limited to short surface runs and torching in the eastern half and smouldering in the western half. Crews are mopping up and rehabilitating established fireline.

SOUTH FORK II, Wind River Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Benes) is assigned. This fire is ten miles west of Fort Washakie, WY in the Wind River Roadless Area. Extreme fire behavior with torching, running and spotting were observed in decadent lodgepole pine and sagebrush. Steep and inaccessible terrain is impeding suppression efforts. Crews are busy on all flanks constructing fireline, patrolling, mopping up and burning out.

SPRING CREEK, White River National Forest. A Type 2 Incident Management Team (Hartman) is assigned. This fire is burning in spruce, fir, aspen and brush eight miles north of New Castle, CO. Torching in the interior was observed. Crews are mopping up and patrolling on the west and northwest flanks and burning out on the east, southeast and northeast flanks. Rugged inaccessible terrain and dry, heavy fuel loading are hampering containment efforts.

REESE MOUNTAIN, Rawlins District, Bureau of Land Management. This fire is 30 miles west of Wheatland, WY in heavy dead and down lodgepole pine and ponderosa pine. Minimal fire activity was observed.

HENSEL, Medicine Bow National Forest. This fire is burning in bug kill ponderosa pine 20 miles northwest of Wheatland, WY. Active fire behavior with spotting was observed in the Ashenfelder Creek drainage. Aerial resources are suppressing spot fires in the Saltlick Creek drainage.

SOUTHWEST AREA LARGE FIRES:

Priorities are being established by the Southwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

CUB, Gila National Forest. A Fire Use Management Team (Zimmerman) is assigned. This fire is in the Gila Wilderness Area, 19 miles east of Glenwood, NM. Precipitation and higher relative humidity moderated fire behavior in ponderosa pine and mixed conifer forest.

DARNELL, Coronado National Forest. This fire is in the Chiricahua Wilderness Area five miles south of Portal, AZ. Minimal fire behavior in grass, scrub oak and juniper was observed. This will be the last report unless significant activity occurs.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

NORTHERN ROCKIES AREA LARGE FIRES:

BROAD, Yellowstone National Park. A Fire Use Management Team has been ordered. This fire is burning in old growth lodgepole and Douglas fir 20 miles southeast of Mammoth, WY. Extreme fire behavior was observed. Personnel are conducting reconnaissance, mapping the fire perimeter and reassessing confinement actions.

BROAD	WY	YNP	2,550	0	UNK	8	0	0	0	0	80K

SOUTHERN AREA LARGE FIRES:

BLACKJACK BAY COMPLEX, Okefenokee National Wildlife Refuge. This lightning-caused complex, consisting of the Blackjack 02, Bay Creek and Number One Island fires, is ten miles northeast of Fargo, GA. The complex is being managed by the most cost efficient alternative under the Wildland Fire Situation Analysis confinement/containment strategy. Priorities are firefighter and public safety, economics of suppression and ecosystem health. Personnel continue to monitor the fire.

JULY COMPLEX, George Washington and Jefferson National Forests. This complex consists of seven lightning caused fires in the Shenandoah Valley 14 miles north of Lexington, VA in dead hardwoods. Hot temperatures, low fuel moisture and low relative humidity contributed to very active fire behavior.

ROCKY TOP II, Shenandoah National Park. This fire is burning in bug kill pine, rhododendron, leaf litter and understory five miles east of Port Republic, VA. Moderate fire behavior was observed. Crews are constructing fireline and burning out in remote and rugged terrain.

OUTLOOK:

*****A RED FLAG WARNING HAS BEEN POSTED IN SOUTHWESTERN IDAHO FOR HIGH TEMPERATURES AND LOW RELATIVE HUMIDITY*****

High pressure over the Eastern Great Basin Area will bring mostly sunny skies. High temperatures will be 95 to 109 in the valleys and 80 to 90 in the mountains. Minimum relative humidity will range from 4 to 15 percent at lower elevations and 8 to 22 percent at higher elevations. Winds will be variable at 5 to 15 mph.

A high pressure system over the Rocky Mountain Area will bring mostly sunny skies with isolated thunderstorms. High temperatures will be in the upper 60's to lower 70's in the mountains and the mid 80's to 95 at lower elevations. Minimum relative humidity will range from 8 to 15 percent in northwestern Colorado and southwest Wyoming and 20 to 32 percent elsewhere. Winds will be north to northwest at 15 to 20 mph in northeast Wyoming and western South Dakota, elsewhere winds will be variable at 5 to 15 mph.

The Southwest Area can expect partly sunny skies with scattered showers and thunderstorms. High temperatures will be in the 70's to 80's in the mountains and the 90's to 110 at lower elevations. Minimum relative humidity will range from 5 to 20 percent in Arizona and 20 to 50 percent elsewhere. Winds will be east to south at 5 to 15 mph with gusts up to 40 mph possible near thunderstorms.

High pressure over the Northern Rockies Area will bring mostly sunny skies with scattered thunderstorms in eastern Montana and North Dakota. High temperatures will be 80 to 90 east of the Continental Divide and 90 to 100 on the west side. Minimum relative humidity will range from 15 to 25 percent. Winds will be east at 5 to 15 mph.

The Northern California Area can expect mostly sunny skies due to high pressure aloft. High temperatures will be in the 60's to mid 80's along the coast and 105 to 116 inland. Minimum relative humidity will range from 6 to 18 percent and winds will be variable under 12 mph.

A cold front moving through the Southern Area will bring partly sunny skies with scattered showers and thunderstorms. High temperatures will be in the low 80's to 90's. Minimum relative humidity will range from 27 percent in Oklahoma to above 40 percent elsewhere. Winds will be variable at 5 to 15 mph.

REFUSING RISK (“TURNDOWN” PROTOCOL)

Every firefighter has the right and obligation to report safety problems and contribute ideas regarding their safety. Supervisors are expected to give these concerns and ideas serious consideration. When an individual feels an assignment is unsafe, they also have the obligation to identify, to the degree possible, safe alternatives for completing that assignment. Turning down an assignment is one possible outcome of managing risk.

! A turndown is a situation where an individual has determined an assignment cannot be undertaken as given, and they are unable to negotiate an alternative solution.

! A turndown must be based on an assessment of risks and the ability of an individual or organization to control those risks.

! A situation may be a candidate for a turndown if:

! There is a violation of safe work practices.

! Environmental conditions make the work unsafe.

! The forces lack the necessary qualifications or experience.

! Defective equipment is being used.

! The following steps will be used when turning down an assignment:

! The individual will directly inform their supervisor that they are turning down the assignment as given. (Document using criteria outlined in the risk management process.)

! Supervisor will notify the Safety Officer immediately upon being informed. In the absence of a Safety Officer, the appropriate Section Chief or Incident Commander will be notified. This step provides accountability for decisions and initiates communication of safety concerns.

! If the supervisor requests another resource to perform the assignment, he/she is responsible for informing that resource that the assignment has previously been refused and the reason(s) why.

! The safety hazard should be documented by the submission of a SAFENET or SAFECOM.

! These actions do not stop an operation from being carried out. This protocol is integral to the

effective management of risk as it provides timely identification of hazards to the chain of command, raises risk awareness for both leaders and subordinates, and promotes accountability.
