

**INCIDENT MANAGEMENT SITUATION REPORT
SATURDAY, JULY 13, 2002 0530 MDT
NATIONAL PREPAREDNESS LEVEL 5**

CURRENT SITUATION:

Initial attack activity was heavy in the Southern California Area, moderate in the Western Great Basin, Southwest and Rocky Mountain Areas, and light elsewhere. Nationally, 319 new fires were reported. Twelve of these became large fires, three each in the Eastern Great Basin, Western Great Basin and Northern California Areas, and one each in the Northwest, Rocky Mountain and Southern California Areas. Six large fires were contained, four in the Eastern Great Basin Area and one each in the Northern California and Southern Areas. Very high to extreme fire indices were reported in Arizona, California, Colorado, Idaho, Kansas, Massachusetts, Montana, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, Texas, Utah, Washington and Wyoming.

ROCKY MOUNTAIN AREA LARGE FIRES:

Priorities are being established by the Rocky Mountain Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

BURN CANYON, Grand Mesa-Uncompahgre-Gunnison National Forest. A Type 2 Incident Management Team (Furlong) is assigned. This fire is five miles southwest of Norwood, CO. Crowning, significant runs and long range spotting were observed in pinyon pine and gambel oak. Engine crews are providing structure protection for several residences and holding the east flank.

BEAR MOUNTAIN SOUTH, Medicine Bow National Forest. A Type 2 Incident Management Team (Gray) is assigned. This fire is 14 miles southeast of Encampment, WY. Significant crown runs and spotting were observed in lodgepole pine and spruce. Crews are flanking the fire with direct and indirect attack fireline with support from aerial resources.

STEUBEN, Grand Mesa-Uncompahgre-Gunnison National Forest. This fire is burning ten miles west of Gunnison, CO in sagebrush, aspen and bug kill Douglas fir. No new information was reported.

HINMAN, Routt National Forest. A Type 2 Incident Management Team (Garcia) has been ordered. This fire is 23 miles north of Steamboat Springs, CO. Extreme fire behavior including torching, spotting and significant downhill runs was observed in spruce, fir and lodgepole pine. Limited access and erratic winds are hampering initial attack forces. Several residences and a commercial property are threatened.

BEAVER DAM COMPLEX, Black Hills National Forest. A Type 2 Incident Management Team (Sisk) is assigned. This complex, consisting of the Beaver Dam, Harding and Stoney Point fires, is 23 miles north of Sundance, WY. Minimal fire activity was observed in ponderosa pine and gambel oak. Crews made excellent progress constructing direct attack fireline and mopping up.

MISSIONARY RIDGE, San Juan National Forest. A Type 2 Incident Management Team (Carlson) is assigned. This fire is five miles northeast of Durango, CO. Interior islands continue to burn out in gambel oak, ponderosa pine and mixed conifer forest. Crews are mopping up and rehabilitating firelines. A division in the Weminuche Wilderness Area is in monitor status.

SOUTH FORK II, Wind River Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Benes) is assigned. This fire is ten miles west of Fort Washakie, WY in the Wind River Roadless Area. Plume dominated fire behavior and crown runs were observed in the interior in decadent lodgepole pine and sagebrush. Crews are burning out on several divisions and making good progress mopping up.

SPRING CREEK, White River National Forest. A Type 2 Incident Management Team (Swope) is assigned. This fire is burning in spruce, fir, aspen and brush eight miles north of New Castle, CO. Very active fire behavior with crown runs and group tree torching was observed. Burn out operations are underway on the north flank. Crews are making good progress building fireline on the east side of East Elk Creek.

HENSEL, Medicine Bow National Forest. This fire is burning in bug kill ponderosa pine 20 miles northwest of Wheatland, WY. Torching was observed in the Ashenfelder Creek drainage. Personnel contained several spot fires at the head of Salt Lick drainage in very steep, rugged terrain.

EASTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

EAST FORK, Wasatch-Cache National Forest. A Type 1 Incident Management Team (Raley) is assigned. This fire is burning in lodgepole pine and spruce 35 miles south of Evanston, WY. Moderate fire behavior was observed. Crews made good progress hot-spotting and constructing, improving and mopping up firelines. Evacuation orders remain in place for the Christmas Meadows subdivisions, scattered homes and a Boy Scout camp; structure protection is in place.

MULE, Bridger-Teton National Forest. A Type 2 Incident Management Team has been ordered. This fire is 12 miles west of Daniel, WY. Torching, short runs and short range spotting were observed in heavy timber. Crews made good progress building direct attack fireline with support from aerial resources.

RATTLE COMPLEX, Moab Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Murphy) is assigned. This complex is 20 miles northeast of Green River, UT. Active fire behavior, crowning and torching were observed on the west flank in oak brush, mountain mahogany, pinyon pine, Douglas fir and ponderosa pine.

SPRINGVILLE, Uinta National Forest. This fire is burning one mile north of Springville, UT in oak brush, pinyon pine and juniper. No new information was reported.

HORSE, Moab Field Office, Bureau of Land Management. A Type 2 Incident Management Team has been ordered. This fire is 16 miles southeast of Monticello, UT. No further information was reported.

NORTHERN ROCKIES AREA LARGE FIRES:

BROAD, Yellowstone National Park. A transfer of command from Cook's Fire Use Management Team to Frye's Type 1 Incident Management Team will occur today. This fire is burning in old growth lodgepole pine and Douglas fir 20 miles southeast of Mammoth, WY. Very active fire behavior was observed as the fire advanced northeast, southeast and into the Grand Canyon of the Yellowstone. Heavy helicopters have been utilized on the west flank to hold the fire on the east side of the Yellowstone River. Personnel are scouting anchor points in preparation for fireline construction.

FOX CREEK, Blackfeet Agency, Bureau of Indian Affairs. A Type 2 Incident Management (Kechter) will assume command today. This fire is burning nine miles southeast of Babb, MT in subalpine fir, lodgepole pine and spruce. Plume dominated fire behavior, crowning with flame

lengths of 250 feet, torching and long range spotting were observed. Heavy fuel loading and gusty winds are hampering containment efforts.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

INYO COMPLEX, Inyo National Forest. A Type 2 Incident Management Team (Conrad) is assigned. This complex, comprised of Fuller, Piper and 11 small fires, is five miles west of Big Pine, CA. Significant runs, spotting and torching were observed in sagebrush, Jeffery pine and bug kill lodgepole pine. Crews are constructing fireline and creating defensible space around structures. Residents within Big Pine Canyon have been evacuated. Several commercial properties, numerous primary and recreational residences, resorts, campgrounds and the John Muir Wilderness Area are threatened.

NORTHWEST AREA LARGE FIRES:

MALHEUR COMPLEX, Malheur National Forest. A Type 2 Incident Management Team (Morcom) will assume command today. This complex, consisting of seven lightning-caused fires, is burning in mixed conifer forest, eight to 25 miles south of Prairie City, OR. Active fire behavior on all flanks and spotting up to 1/4 mile ahead of the fronts were observed.

EYERLY, Warm Springs Agency, Bureau of Indian Affairs. A Type 2 Incident Management Team (Jackson) is assigned. This fire is burning in sagebrush, pinyon pine and juniper in the Metolius River Canyon, 15 miles west of Madras, OR. Torching and spotting were observed as the fire advanced west and south. Crews are constructing indirect attack handline with support from aerial resources. Several summer residences have been evacuated; structure protection is in place.

WESTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

GATE, Humboldt-Toiyabe National Forest. A Type 2 Incident Management Team has been ordered. This fire is five miles north of Walker, CA. Very active fire behavior was observed in pinyon pine, juniper, sagebrush and grass. An additional small fire is threatening the town of Coleville and is expected to burn into the Gate fire today. Engine crews are establishing anchor points to initiate fireline construction and creating defensible space around threatened structures. Evacuation of livestock from the Little Antelope Pack Station is underway.

PAN, Humboldt-Toiyabe National Forest. A Type 2 Incident Management Team (Saleen) has been ordered. This fire is 12 miles north of Bridgeport, CA. Significant runs, spotting and torching were observed in sagebrush, pinyon pine and juniper. The Monte Cristo Mine and several ranches are threatened. Evacuation of livestock is underway.

MUD SPRINGS, Winnemucca Field Office, Bureau of Land Management. This fire is two miles east of Daveytown, NV. Extreme fire behavior with rapid rates of spread was observed in grass and sagebrush. Dozers and engine crews are constructing fireline.

NORTHERN CALIFORNIA AREA LARGE FIRES:

BLACK, Northern California District, Bureau of Land Management. This fire is 13 miles northeast of Susanville, CA. Rapid rates of spread with 10 to 20 foot flame lengths were observed in sagebrush and grass. Crews are constructing handline and creating defensible space around threatened structures.

HORSE, Northern California District, Bureau of Land Management. This fire, burning in grass and sagebrush, 13 miles northeast of Susanville, CA. Very active fire behavior was observed.

ANNIE, Northern California District, Bureau of Land Management. This fire is five miles northeast of Fort Bidwell, CA. Rapid rates of spread were observed in grass and sagebrush. Crews are building fireline in very rugged terrain.

SOUTHWEST AREA LARGE FIRES:

Priorities are being established by the Southwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

CUB, Gila National Forest. This fire is burning in ponderosa pine and mixed conifer forest in the Gila Wilderness Area, 19 miles east of Glenwood, NM. The fire is backing in Packsaddle Canyon and smoldering elsewhere. The fire is in monitor status.

DARNELL, Coronado National Forest. This fire is in the Chiricahua Wilderness Area, seven miles southeast of Portal, AZ. This will be the last report unless significant activity occurs.

OUTLOOK:

*****A RED FLAG WARNING HAS BEEN POSTED IN SOUTHEASTERN IDAHO FOR HIGH TEMPERATURES, VERY LOW RELATIVE HUMIDITY AND HIGH HAINES INDEX*****

*****A RED FLAG WARNING HAS BEEN POSTED IN EASTERN WASHINGTON, NORTHEAST OREGON AND THE IDAHO PANHANDLE FOR LOW RELATIVE HUMIDITY, HIGH HAINES INDEX AND DRY LIGHTNING*****

*****A FIRE WEATHER WATCH HAS BEEN ISSUED IN SOUTHEASTERN OREGON AND SOUTHWEST IDAHO FOR DRY LIGHTNING*****

*****A FIRE WEATHER WATCH HAS BEEN ISSUED IN NORTH-CENTRAL WASHINGTON AND ALONG THE EAST SLOPES OF THE CASCADE MOUNTAINS FOR DRY LIGHTNING*****

The Rocky Mountain Area can expect sunny skies with isolated thunderstorms in the mountains of Wyoming and Colorado. High temperatures will be 75 to 85 in the mountains and 85 to 95 at lower elevations. Minimum relative humidity will range from the single digits to mid teens west of the Continental Divide and in north-central Wyoming, and 10 to 20 percent elsewhere. Winds will be north-northeast at 5 to 15 mph.

Strong high pressure over the Eastern Great Basin Area will bring mostly sunny skies with isolated thunderstorms in southwestern Idaho. High temperatures will be 85 to 95 in the mountains and 95 to 115 in the valleys. Minimum relative humidity will range from 5 to 17 percent and winds will be variable at 5 to 15 mph.

High pressure exiting east out of the Northern Rockies Area will bring mostly sunny skies with isolated thunderstorms in northern Idaho and western Montana. High temperatures will be 95 to 105 in Montana and Idaho, and in the 80's to low 90's in North Dakota. Minimum relative humidity will range from 20 to 35 percent in North Dakota and 6 to 16 percent elsewhere. Winds will be south to west at 5 to 15 mph.

The Southern California Area can expect mostly sunny skies, becoming partly cloudy as the afternoon progresses. Isolated to scattered thunderstorms are forecast over the mountains and deserts. High temperatures will be in the 70's to low 80's in coastal areas, upper 80's and 90's in the mountains, in the 90's to 102 inland, and upper 90's to 115 in the deserts. Minimum relative humidity will range from 10 to 20 percent in the deserts, 15 to 30 percent in the mountains, 20 to 35 percent in the valleys and above 45 percent near the coast. Winds will be onshore at 8 to 15 mph near the coast and southeast to southwest at 5 to 15 mph elsewhere.

High pressure in combination with unstable air over the Northwest Area will bring partly to mostly sunny skies with isolated to scattered wet and dry thunderstorms. High temperatures will be in the 90's to 105 east of the Cascade Mountains with some cooling elsewhere. Minimum relative humidity will range from 5 to 15 percent in the east and 30 to 50 percent to the west. Winds will be west at 5 to 12 mph, increasing to 25 to 30 mph in eastern Washington during the evening.

The Western Great Basin can expect partly to mostly sunny skies with isolated thunderstorms. High temperatures will be in the 80's and 90's in the mountains and in the 90's to 105 at lower elevations. Minimum relative humidity will range from 4 to 30 percent. Winds will be south to west under 15 mph.

Drier air moving into the Northern California Area will bring mostly sunny skies with isolated

thunderstorms in the Sierra Nevada and Cascade Mountains. High temperatures will be mid 60's to low 70's along the coast and upper 90's to 102 inland. Minimum relative humidity will range from 18 to 28 percent inland and winds will be variable under 10 mph.

Monsoonal moisture over the Southwest Area will bring partly sunny skies with isolated to scattered showers and thunderstorms. High temperatures will be in the 70's and 80's in the mountains and in the 90's to 110 at lower elevations. Minimum relative humidity will range from 10 to 20 percent in Arizona and northern New Mexico, and 20 to 40 percent in the remainder of the region. Winds will be north to east at 5 to 15 mph.

The Southern Area can expect heavy rain in some locations in the south and sunny skies to the north. High temperatures will be in the 70's, 80's and 90's. Minimum relative humidity will be above 40 percent in most areas and winds will be variable to 15 mph.

<u>UNFAMILIAR WITH WEATHER AND LOCAL FACTORS INFLUENCING FIRE BEHAVIOR</u>	
<u>Can you ask questions of local experts? What kinds of questions would you ask?</u>	
<u>Does the operational period plan give you adequate weather and information? What kinds of weather forecasts can you get? What other weather or local information do you look for in the shift plan?</u>	
<u>Can you get information from resources that have been on the fire? What questions will you ask of the crew that you are replacing?</u>	
<u>Is there any other way to obtain information? List common sources of information on weather and local factors. To reduce risks:</u>	
	<u>Base all actions on current and expected fire behavior</u>
	<u>Post lookouts</u>
	<u>Establish escape routes and safety zones.</u>
	<u>Take extra caution! Discuss a fire where you relied on information from the local unit (perhaps where your fire knowledge and experience was very different from how they did things Southeast or Alaska)</u>
