

**INCIDENT MANAGEMENT SITUATION REPORT
THURSDAY, JUNE 13, 2002 0530 MDT
NATIONAL PREPAREDNESS LEVEL 4**

CURRENT SITUATION:

Initial attack activity was light across the nation. Three new large fires were reported, one each in Southern California, Southwest and Southern Areas. One large fire was contained in Southern California Area. Very high to extreme fire indices were reported in Arizona, California, Colorado, Kansas, Minnesota, Nevada, New Mexico, Oklahoma, Texas, and Utah.

ROCKY MOUNTAIN AREA LARGE FIRES:

Priorities are being established by the Rocky Mountain Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Chesley) is assigned to manage the Hayman fire.

HAYMAN, Pike-San Isabel National Forest. Two Type 1 Incident Management Teams (Martin and Raley) are assigned. This fire is burning six miles northwest of Lake George, CO in ponderosa pine, gambel oak and mixed conifer forest. The fire has several fronts and is advancing north-northwest, south-southeast, and west into the Lost Creek Wilderness Area. Extreme fire behavior, an active run to the south, torching and spotting were observed. Crews are anchoring in and constructing handline. Several camps, ranches, recreation areas, subdivisions and towns are threatened. A mandatory evacuation is in place for 5,430 residents and additional evacuations are underway. Evacuation centers have been opened in Park, Douglas, Teller and Jefferson Counties. One additional residence was confirmed lost yesterday.

TRINIDAD COMPLEX, Colorado State Forest Service, Pueblo Dispatch Center Counties. A Type 2 Incident Management Team (Swope) is assigned. This complex, comprised of the Spring and Fisher fires, is eight miles south of Stonewall, CO. The fires are burning in grass, pinyon pine, juniper and ponderosa pine. Erratic winds and low relative humidity contributed to very active fire behavior along the south fork of the Purgatory River and in Five Mile canyon. Crews made good progress burning out along hand and dozer lines with the support of aerial resources. A total of 250 residences and several commercial properties are threatened.

MIRACLE COMPLEX, Bureau of Land Management, Grand Junction District. A Type 2 Incident Management Team (Hartman) is assigned. This complex, consisting of the Long Canyon and Dierich Creek fires, is near Grand Junction, CO. The fires are burning in sagebrush, pinyon pine and juniper. Steep terrain, inaccessibility, high winds and low relative humidity are hampering containment efforts. Crews are constructing fireline and burning out along dozer lines. Structure protection is in place for the 280 residences that are under mandatory evacuation.

COAL SEAM, Grand Junction Dispatch Center Area Counties. A Type 1 Incident Management Team (Hart) is assigned. This fire is burning four miles west of Glenwood Springs, CO in gamble oak, pinyon pine, juniper and spruce. Long range spotting on the northeast flank and a sustained

run in decadent spruce on the northwest flank were observed. Crews are constructing handline and engines are patrolling and mopping up.

HENSEL, Medicine Bow National Forest, Douglas Ranger District. A Type 2 Incident Management Team (Rios) has been ordered. This fire is burning in bug kill ponderosa pine 20 miles northwest of Wheatland, WY. Extreme fire behavior was observed with torching, crowning and running. Crews are anchoring in and building handline. Steep, rough terrain, limited access and snags are hampering containment efforts. Black Mountain Lookout was evacuated and several ranches in the north Cottonwood Creek area are threatened.

MISSIONARY RIDGE, San Juan National Forest. A Type 2 Incident Management Team (Solarz) is assigned. This fire is ten miles north of Durango, CO and is burning in oakbrush, ponderosa pine and mixed conifer forest. Extreme fire behavior and rapid rates of spread were observed. Crews are constructing direct and indirect fireline. The Florida drainage area of the San Juan National Forest is closed and numerous structures are threatened. The Governor of Colorado and the Director of the Federal Emergency Management Agency visited the incident yesterday.

LYTLE, Department of Defense. This fire is 12 miles south of Colorado Springs, CO on the Fort Carson Military Reservation. The fire is burning in pinyon pine, juniper and oakbrush. No new information was reported. This will be the last report unless new information is received.

SOUTHWEST AREA LARGE FIRES:

MONTOYA, Carson National Forest. A Type 2 Incident Management Team (Sears) is assigned. This fire is burning in ponderosa and pinyon pine near Canjilon, NM. Torching and spotting were observed. No further information was reported.

PONIL, New Mexico State Forestry Office, Cimmaron District. A Type 1 Incident Management Team (Lohrey) is assigned. This fire is burning ten miles west of Cimmaron, NM in ponderosa pine. Several major interior runs, very active fire behavior on the west flank and active backing into a drainage on the northwest perimeter were observed. Crews are constructing indirect fireline on the west flank and burning out on the north, south and east flanks. The town of Ute Park, Philmont Boy Scout Camp, Vermego Park Complex, and El Paso Natural Gas Company transfer station and wells are threatened.

CHERRY, El Malpais National Park. A Type 2 Incident Management Team (Gardner) is assigned.

This fire, burning in grass and ponderosa pine, is 26 miles southwest of Grants, NM. Crews have completed burn out operations with the assistance of aerial resources. The voluntary evacuation of the El Calderon area and the Frank Lloyd Wright House has been lifted. Highway 117 is closed nightly due to residual smoke.

EASTERN GREAT BASIN AREA LARGE FIRES:

BIG WASH, Bureau of Land Management, Cedar City Field Office. A Type 1 Incident Management Team (Hefner) is assigned. The fire is burning 21 miles southeast of Cedar City, UT in bug kill spruce and fir. Torching, backing and short runs were observed. Crews are building fireline on the west flank and mopping up on the south and east flanks. Several residences, a communication site and historic structures are threatened. Cedar Breaks National Monument is closed due to road closures.

SANFORD, Dixie National Forest. A Fire Use Management Team (Cones) is assigned. This fire is being managed under the most meaningful, most cost efficient alternative under the Wildland Fire Situation Analysis (WFSa) confinement/containment strategy. Priorities are firefighter and public safety, economics of suppression and ecosystem health. The fire is 20 miles northeast of Panguitch, UT and is burning in aspen, pinyon pine, juniper and mixed conifer forest. Crews are constructing direct and indirect fireline along the northeast perimeter. Structure protection is in place for Sanford Ranch. Increase in acreage is due to better mapping.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

WOLF, Los Padres National Forest. A Type 1 Incident Management team (Gelobter) is assigned. This fire is burning ten miles north of Ojai, CA in decadent chaparral, pinyon pine and juniper. Occasional flare-ups were observed. Crews are mopping up and patrolling. Matilija Canyon Road is closed to non local traffic.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
WOLF	CA	LPF	21,278	90	6/14	932	16	11	5	6	13.7M
AVERY	CA	ORC	135	100	---	1	0	0	0	0	NR

ORC = Orange County Fire Department

NORTHERN CALIFORNIA AREA LARGE FIRES:

FORKS, Klamath National Forest. A Type 2 Incident Management Team (McElwain) is assigned. This fire is three miles down stream from Forks of the Salmon, CA and is burning in continuous hardwood and mixed conifer forest. Intense fire behavior was observed as the fire backed downhill to the east and then made short uphill runs. Burn out operations are underway and structure protection is in place for improvements along Salmon River Road.

KUPUKUPU, Hawaii Volcanos National Park. Lava flows from Kilauea ignited this fire on the southern edge of Hawaii in the Hawaiian Islands. Very deep duff layers are contributing to strong reburn potential and continuously moving lava has made portions of the fire too dangerous for crews. Crews are constructing fireline on the north and west flanks.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
FORKS	CA	KNF	700	45	6/16	661	17	5	4	0	400K
KUPUKUPU	HI	HVP	3,660	65	6/15	100	5	0	2	0	960K

SOUTHERN AREA LARGE FIRES:

MARBLEYARD COMPLEX, George Washington and Jefferson National Forests. This complex, comprised of several fires, is burning three miles south of Glasgow, VA in standing dead timber, hardwoods and rhododendron. Extreme fire behavior was observed on the Marbleyard fire due to low relative humidity and increasing temperatures. The Appalachian Trail in the James River Face Wilderness Area is closed. The Chicken and Kennedy fires have been contained.

STRIKE III, George Washington and Jefferson National Forests. Burning in hardwoods, this fire is three miles north of Shenandoah, VA. Intense fire behavior was observed in leaf litter. Crews are burning out along dozers lines.

BLACKJACK BAY COMPLEX, Okefenokee National Wildlife Refuge. A Unified Command between an interagency Fire Use Management Team (Cook), the Georgia Forestry Commission and the Florida Division of Forestry is in place. This lightning-caused complex, consisting of the Blackjack 02, Bay Creek and Number One Island fires, is ten miles northeast of Fargo, GA. The complex is being managed for ecosystem health and hazardous fuels reduction. A ten mile section of preexisting permanent fuel break that surrounds the Refuge has been successfully utilized to hold the fires. Reduction in acreage is due to better mapping of interior unburned islands.

DEAD END COMPLEX, National Forests in Florida. A transfer of command from Greene's Florida State Type 2 Incident Management Team to a Type 3 Incident Management Team is underway. This complex, consisting of nine fires, is burning in southern rough near Olustee, FL. Smoldering and creeping were observed. This will be the last report unless significant activity occurs.

ALASKA AREA LARGE FIRES:

MP 78 ELLIOTT HIGHWAY, Bureau of Land Management, Tanana Zone. An Alaska Type 2 Interagency Incident Management Team (McKnight) is assigned. This fire is burning seven miles southwest of Livengood, AK in black spruce, hardwoods, brush and litter. The planned burn out operation was postponed due to unfavorable weather conditions. Crews are improving existing contingency lines. Reduction in acreage is due to better mapping.

OUTLOOK:

High pressure moving west into Rocky Mountain Area will bring sunny skies. A stationary cool front over the east side of the Continental Divide in Colorado will result in widely scattered wet and dry thunderstorms. High temperatures will be in the 50's and 60's in the mountains and in the 70's and 80's at lower elevations. Minimum relative humidity in Colorado will range from 4 to 14 percent in the west and 25 to 35 percent in the east. In Wyoming and South Dakota, minimum relative humidity will range from 15 to 25 percent in the south and 25 to 35 percent in the north. Winds will be west to northwest at 10 to 20 mph with gusts to 30 mph in western Colorado, Wyoming and the Black Hills. In eastern Colorado, winds will be east at 10 to 20 mph.

Southwest Area can expect mostly sunny skies over Arizona and western New Mexico and partly cloudy skies with a chance of thunderstorms in eastern New Mexico and west Texas. High temperatures will be in the 70's and 80's in the mountains and in the 90's to 110 at lower elevations. Minimum relative humidity will range from 5 to 15 percent across Arizona and western New Mexico and 20 to 50 percent in the remainder of the area. Winds will be south to west at 10 to 20 mph and gusty in Arizona and western New Mexico. In eastern New Mexico and west Texas, winds will be northeast at 15 to 15 mph.

High pressure will bring mostly sunny skies to Eastern Great Basin Area. High temperatures will be in the 70's and 80's in the north and near 100 in the south. Minimum relative humidity will range from 5 to 20 percent and winds will be southwest to west at 10 to 20 mph.

Southern California Area can expect mostly sunny skies with morning low clouds and fog in the coastal basins. High temperatures will be upper 60's to mid 70's in coastal areas, upper 70's to mid 80's inland, in the 80's to low 90's in the mountains, and in the 90's to 112 across the deserts. Minimum relative humidity will range from 5 to 15 percent in the deserts, 10 to 25 percent in the mountains, 30 to 45 percent in the valleys, and above 50 percent near the coast. Winds will be southwest at 12 to 25 mph over the mountains and deserts.

High pressure over Northern California Area will bring mostly sunny skies with a chance of isolated thunderstorms over the northeastern portion of the state. High temperatures will be in the 80's in the mountains and in the 90's in the valleys and inland. Minimum relative humidity will range from 12 to 22 percent and winds will be southwest to northwest at 5 to 15 mph.

Alaska Area can expect partly to mostly cloudy skies with scattered showers and isolated thunderstorms in the eastern interior. High temperatures will be upper 50's and 60's, and minimum relative humidity will range from 30 and 40 percent. Winds will be southwest at 10 to 15 mph.
