

**INCIDENT MANAGEMENT SITUATION REPORT
SUNDAY, JUNE 16, 2002 0800 MDT
NATIONAL PREPAREDNESS LEVEL 4**

CURRENT SITUATION:

Initial attack activity was moderate in Southern California and Rocky Mountain Areas and light elsewhere. Nationally, 89 new fires were reported yesterday. Four of these became large fires, one each in Southwest and Western Great Basin Areas and two in Southern California Area. Two large fires were contained in Northern California Area. Very high to extreme fire indices were reported in Arizona, California, Colorado, Kansas, Minnesota, Nevada, New Mexico, Oklahoma, Texas, and Utah.

ROCKY MOUNTAIN AREA LARGE FIRES:

Priorities are being established by the Rocky Mountain Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Chesley) is assigned to manage the Hayman fire.

HAYMAN, Pike-San Isabel National Forest. Two Type 1 Incident Management Teams (Frye and Raley) are assigned. This fire is burning six miles northwest of Lake George, CO in ponderosa pine, gambel oak and mixed conifer forest. Higher relative humidity and favorable, light winds moderated fire behavior. Crews made good progress constructing direct attack handline on several divisions. Approximately 10,000 residences are threatened and a mandatory evacuation remains in place for 5,430 residents. Evacuation centers are open in Park, Douglas, Teller and Jefferson Counties. The Sheriff's Departments for the four counties are conducting an inventory of lost structures. Highway 67 remains closed.

MISSIONARY RIDGE, San Juan National Forest. A Type 1 Incident Management Team (Melton) is assigned. This fire is 15 miles northeast of Durango, CO and is burning in oakbrush, ponderosa pine and mixed conifer forest. Extreme fire behavior, torching and long range spotting were observed as the fire moved east into the Florida and True Creek drainages. Crews are constructing direct and indirect fireline. Three subdivisions have been evacuated and additional evacuations are underway in the Vallecito Reservoir area. Structure protection is in place.

COAL SEAM, Grand Junction Dispatch Center Area Counties. A Type 1 Incident Management Team (Hart) is assigned. This fire is burning four miles west of Glenwood Springs, CO in gambel oak, pinyon pine, juniper and decadent spruce. A confinement assessment plan addressing suppression strategy for the northern perimeter of the fire is underway and a spike camp has been established. Crews completed handline construction above Glenwood Springs on the south flank and are mopping up. An additional five residences were confirmed lost during the initial phases of the fire. Reduction in acreage is due to better mapping.

HENSEL, Medicine Bow National Forest, Douglas Ranger District. A Type 2 Incident Management Team (Rios) is assigned. This fire is burning in bug kill ponderosa pine 20 miles northwest of

Wheatland, WY. Active fire behavior was observed on the east and southwest flanks as the fire moved up Laramie Peak. Crews are building handline in steep, rugged terrain with the support of aerial resources. Several ranches in the north Cottonwood Creek area remain threatened.

MIRACLE COMPLEX, Bureau of Land Management, Grand Junction District. A Type 2 Incident Management Team (Hartman) is assigned. This complex, consisting of the Long Canyon and Dierich Creek fires, is near Grand Junction, CO. The fires are burning in sagebrush, pinyon pine and juniper. Smouldering and torching were observed. Crews are constructing fireline on the Long Canyon fire, and patrolling and mopping up on the Dierich fire.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

SOUTHWEST AREA LARGE FIRES:

Priorities are being established by the Southwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

ROYBAL COMPLEX, Sante Fe National Forest. A Type 1 Incident Management Team (Bateman) is assigned. The complex is comprised of the Trampas fire which started yesterday and the Roybal fire. Roybal is four miles northeast of Pecos, NM and Trampas is eight miles west of Rociada, NM. Extreme fire behavior, rapid rates of spread driven by strong winds and spotting up to one mile ahead of the front were observed as Trampas moved east into the Pecos Wilderness Area. Crews successfully completed burn out operations and are patrolling, mopping up and rehabilitating dozer lines on Roybal and are constructing fireline on Trampas.

WEST DOME, Arizona State Land Department. This fire is burning five miles northwest of Huachuca City, AZ in grass, mesquite and juniper. Extreme fire behavior was observed due to erratic upcanyon winds and the fire crossed containment lines on several occasions. Crews are building handline in steep, rugged terrain. Structure protection is in place for three residences.

WALKER, Coronado National Forest. A Unified Command between a Type 2 Incident Management Team (Kvale) and the government of Nogales, Sonora Mexico is in place. This fire is in Walker Canyon northwest of Nogales, AZ and is burning in chaparral, oak woodland and grass. Extreme fire behavior and rapid rates of spread to the north and east were observed. The fire crossed containment lines several times. Crews and dozers are constructing indirect attack fireline with the support of aerial resources. Burn out operations are underway. Dry, flashy fuels, drought conditions, and steep terrain are impeding containment efforts. Numerous residences remain threatened.

MONTOYA, Carson National Forest. A Type 2 Incident Management Team (Sears) is assigned. This fire is burning in ponderosa and pinyon pine east of Canjilon, NM. Moderate fire behavior,

interior islands burning out and isolated torching were observed. Crews are mopping up.

PONIL, New Mexico State Forestry Office, Cimarron District. A Type 1 Incident Management Team (Lohrey) is assigned. This fire is burning two miles northwest of Ute Park, NM in ponderosa pine. The fire is backing southwest into the Middle Ponil and Greenwater drainages. Moderate fire behavior has allowed crews to construct direct attack handline on the west flank. The town of Ute Park, historic mining structures, a Boy Scout camp and several ranches are threatened.

PONIL	NM	N2S	92,500	75	6/18	1,403	42	30	13	0	10.3M

SOUTHERN CALIFORNIA AREA LARGE FIRES:

BOREL, Sequoia National Forest. A Type 2 Incident Management Team (Dietrich) is assigned. This fire is burning in grass, brush and oak one mile northwest of Bodfish, CA. Extreme fire behavior with rapid rates of spread was observed. Hot temperatures, low relative humidity and low fuel moisture are hampering containment efforts. Bodfish, Lake Isabella and Keysville are threatened and several areas within each of the towns have been evacuated.

SUDDEN RANCH, Vandenberg Air Force Base. This fire is burning in heavy brush six miles west of Lompoc, CA. Strong winds contributed to very active fire behavior and intense upcanyon runs. Numerous commercial properties, two military facilities, a flight tracking station and Jolma State Beach day use area are threatened.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD

SUDDEN RANCH	CA	AFV	3,000	0	UNK	122	2	9	2	0	NR

WESTERN GREAT BASIN AREA FIRES:

CANNON, Humboldt-Toiyabe National Forest. A Type 2 Incident Management Team (Murphy) will assume command of the fire today. This fire is 25 miles northwest of Bridgeport, CA in a Marine Winter Warfare Training Area. The fire is burning in sagebrush, ponderosa pine and mixed conifer forest. The fire has three fronts on the north, east and west perimeters. A significant northeast downhill run toward Walker was observed. Crews have anchored and are constructing handline. Gusty, erratic winds, steep terrain, limited access and unexploded ordnance in the Training Area are impeding containment efforts. A preliminary evacuation plan for Walker has been prepared by the Mono County Sheriff's Department. Numerous residences and commercial properties are

threatened.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
CANNON	NV	HTF	100	5	UNK	53	1	4	1	0	75K

EASTERN GREAT BASIN AREA LARGE FIRES:

BIG WASH, Bureau of Land Management, Cedar City Field Office. A Type 1 Incident Management Team (Hefner) is assigned. The fire is burning 21 miles southeast of Cedar City, UT in bug kill spruce and fir. Torching, backing and short interior runs were observed. Crews are burning out on the northwest flank and mopping up. Several residences, a communication site and historic structures are threatened. Reduction in acreage is due to better mapping.

SANFORD, Dixie National Forest. A Fire Use Management Team (Cones) is assigned. This fire is being managed by the most meaningful, most cost efficient alternative under the Wildland Fire Situation Analysis (WFSA) confinement/containment strategy. Priorities are firefighter and public safety, economics of suppression and ecosystem health. The fire is 20 miles northeast of Panguitch, UT and is burning in aspen, pinyon pine, juniper and mixed conifer forest. Crowning and torching were observed in the Sanford and Deer Creek areas. Crews are constructing handline in Sanford Creek and on the north flank in Willow Creek. Structure protection is in place for Sanford Ranch.

SANFORD	UT	DIF	54,000	30	UNK	201	8	2	3	0	650K

SOUTHERN AREA LARGE FIRES:

MARBLEYARD COMPLEX, George Washington and Jefferson National Forests. A Type 2 Incident Management Team (Kearney) is assigned. This complex, comprised of several fires, is burning three miles south of Glasgow, VA in standing dead timber, hardwoods and rhododendron. Moderate fire behavior was observed as the Marbleyard fire spread into the James River Face Wilderness Area. Crews are building handline and burning out. The Appalachian Trail is closed.

BLACKJACK BAY COMPLEX, Okefenokee National Wildlife Refuge. A Unified Command between an interagency Fire Use Management Team (Zimmerman), the Georgia Forestry Commission and the Florida Division of Forestry is in place. This lightning-caused complex, consisting of the Blackjack 02, Bay Creek and Number One Island fires, is ten miles northeast of Fargo, GA. The complex is being managed by the most cost efficient alternative under the Wildland Fire Situation Analysis (WFSA) confinement/containment strategy. A ten mile section of preexisting permanent fuel break that surrounds the Refuge has been successfully utilized to hold the fires. Personnel are monitoring fire activity, fuels and weather conditions.

CAPE FEAR COMPLEX, North Carolina Division of Forest Resources. This complex, comprised of the Thorp Road and Plantation Road fires, is in New Hanover and Brunswick Counties, north of Murrayville and west of Henrytown, NC. No new information was reported.

EGLIN COMPLEX, Eglin Air Force Base. This complex, consisting of the Grassy Point, Roberts Point and Range Road 747 fires, is near Fort Walton Beach, FL. No new information was reported.

OUTLOOK:

*****A FIRE WEATHER WATCH HAS BEEN ISSUED IN PORTIONS OF NORTHERN ARIZONA FOR GUSTY AFTERNOON WINDS, LOW RELATIVE HUMIDITY AND EXTREME FIRE DANGER*****

High pressure moving into Rocky Mountain Area will bring mostly sunny skies with a chance of isolated wet and dry thunderstorms in mountainous areas. High temperatures will be upper 50's and 60's in the mountains and in the 70's to mid 90's at lower elevations. Minimum relative humidity will be as low as 5 percent west of the Continental Divide and 15 to 25 percent elsewhere. Winds will be west to northwest at 10 to 20 mph with gusts to 30 mph west of the Divide, and northwest to northeast at 10 to 15 mph in the remainder of the region.

Southwest Area can expect mostly sunny skies with a chance of isolated wet and dry thunderstorms in eastern New Mexico and west Texas. High temperatures will be in the 70's and 80's in the mountains and above 100 at lower elevations. Minimum relative humidity will range from 2 to 10 percent in Arizona, 5 to 25 percent in New Mexico, and 25 to 35 percent in west Texas. Winds will be east to northeast at 10 to 20 mph in eastern New Mexico and west Texas. In Arizona and western New Mexico, winds will be west at 10 to 20 mph with gusts to 35 mph in the Fire Weather Watch areas.

Southern California Area can expect mostly sunny skies with morning low clouds and fog along the coast. High temperatures will be upper 60's and 70's in coastal areas, in the 80's to 90's in the mountains and inland, and in the 90's to 110 across the deserts. Minimum relative humidity will range from 8 to 15 percent in the deserts, 10 to 20 percent in the mountains, 15 to 30 percent in the valleys, and above 45 percent near the coast. Winds will be southwest to northwest at 10 to 20 mph over the mountains and deserts, and onshore at 8 to 15 mph near the coast.

High pressure over Eastern Great Basin Area will bring mostly sunny skies with isolated dry thunderstorms over northern Utah, Idaho and the Bridger-Teton National Forest. High temperatures will be in the 90's to 105 in the valleys and mid 70's to mid 80's in the mountains. Minimum relative humidity will range from 3 to 15 percent in the valleys and 7 to 20 percent at higher elevations. Winds will be west to southwest at 10 to 20 mph and gusty in the southern half of the region.

A southwest flow over Northern California Area will bring sunny skies with morning low clouds and fog along the coast. High temperatures will be in the 60's to mid 70's near the coast and in the 80's to low 90's inland. Minimum relative humidity will range from 12 to 25 percent inland. Winds will be west to southwest at 5 to 15 mph.
