

**INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY, JUNE 25, 2002 0530 MDT
NATIONAL PREPAREDNESS LEVEL 5**

CURRENT SITUATION:

Initial attack activity was moderate in the Rocky Mountain, Northern California and Southwest Areas, and light elsewhere. Nationally, 168 new fires were reported. Three of these became large fires, one each in the Southern California, Southern and Southwest Areas. Two large fires were contained in the Southwest Area. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Kansas, Nevada, New Mexico, Oklahoma, Texas, Utah and Wyoming.

SOUTHWEST AREA LARGE FIRES:

Priorities are being established by the Southwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Ribar) is assigned to manage the Rodeo and Chediski fires.

RODEO, Bureau of Indian Affairs, Fort Apache Agency. Two Type 1 Incident Management Teams (Humphrey and Bateman) are assigned. This wind and fuel driven fire is burning in ponderosa pine, juniper and brush three miles north of Cibecue, AZ. Extreme fire behavior was observed. Crews are burning out from Cottonwood Canyon to Highway 60. Show Low, Pinedale, Lakeside, Clay Springs, Pinetop, Hon Dah, Linden and surrounding populated areas remain evacuated. Structure protection is in place. Evacuation centers are open in Winslow and Holbrook. Highway 260 and 277 are closed. Forty-five additional residences were lost.

CHEDISKI, Bureau of Indian Affairs, Fort Apache Agency. A Type 1 Incident Management Team (Dash) is assigned. An additional Type 1 Incident Management Team (Martin) has been ordered. This wind and fuel driven fire, burning in chaparral, ponderosa pine, juniper and pinyon pine, is 12 miles northwest of Cibecue, AZ. Steady southwest winds resulted in active fire behavior, with crowning and long range spotting observed during the afternoon. Crews are constructing handline on the south and west flanks and engines are patrolling and mopping up. The Forest Lakes subdivision and the towns of Heber and Overgaard remain evacuated. Structure protection is in place. Fifteen additional residences were lost.

ROYBAL/TRAMPAS, Santa Fe National Forest. The Roybal fire is four miles northeast of Pecos, NM and the Trampas fire is in the Pecos Wilderness Area, eight miles west of Rociada, NM. The fires are burning in ponderosa pine and mixed conifer forest. No new information was reported.

HIPPY, Bureau of Land Management, Yuma-Havasui Field Office. This fire is 1 mile south of Palo Verde, AZ and is burning in salt cedar and cottonwood. Isolated flare-ups were observed. Favorable weather conditions assisted containment efforts.

ROCKY MOUNTAIN AREA LARGE FIRES:

Priorities are being established by the Rocky Mountain Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Mann) is assigned to manage the Hayman fire.

The 146th Air Expeditionary Group (Provisional), under the command of BG John Iffland, is conducting MAFFS operations from Peterson Field, CO in support the National Interagency Fire Center overall wildfire suppression effort. The 146th AEG (P) has deployed 2 C-130H3 aircraft from the 302nd Air Wing, US Air Force Reserve, 4 C-130H3 aircraft from the 145th Air Wing, North Carolina Air National Guard and a joint 302nd/145th support group to conduct air tanker missions from Peterson Field, Colorado. LTC Ted Wright is the immediate commander at Peterson Field for the deployed aircraft.

MISSIONARY RIDGE, San Juan National Forest. A Type 1 Incident Management Team (Bennett) is assigned. This fire is 15 miles northeast of Durango, CO and is burning in gambel oak, ponderosa pine and mixed conifer forest. Extreme fire behavior was observed on the north, northeast, east and southwest flanks. The fire is moving south toward Highway 250 in the Woodard Canyon. Crews are burning out on the west and north flanks. Ten subdivisions near Lemon and Vallecito Reservoirs and along State Route 250 remain evacuated. Additional evacuations are underway, 1,145 residences are threatened. An evacuation center is open in Bayfield. A damage assessment group continues to evaluate losses.

MILLION, Rio Grande National Forest. A Type 1 Incident Management Team (Gelobter) is assigned. This fire is burning two miles south of South Fork, CO in ponderosa pine, bug kill spruce and mixed conifer forest. Extreme fire behavior, running and short range spotting were observed. Crews and dozers are constructing fireline. A voluntary evacuation of Willow Park remains in place and an evacuation center is open in Monte Vista.

HAYMAN, Pike-San Isabel National Forest. Two Type 1 Incident Management Teams (Frye and Raley) are assigned. This fire is burning six miles northwest of Lake George, CO in ponderosa pine, gambel oak and mixed conifer forest. Moderate fire activity was observed. Crews are

constructing handline, rehabilitating and mopping up. A revised estimate of evacuated residents is approximately 1,300. Evacuation centers are open in Park, Douglas, Teller and Jefferson Counties. Residents of Indian Creek and Ridgewood subdivisions were allowed to return to their homes. The four counties evaluating structure loss are reporting 18 additional structures lost. Highway 67 is closed.

WILEY RIDGE, Gunnison County. This fire is burning in sagebrush and pinyon pine three miles west of Gunnison, CO. Minimal fire activity was observed. Record low live fuel moisture and high winds are hampering containment efforts. Crews are constructing handline along the northwest perimeter. Antelope Hills subdivision has been evacuated and Upper Castle Hills subdivision has been issued an evacuation alert.

HENSEL, Medicine Bow National Forest. A Type 1 Incident Management Team (Wood) is assigned. This fire is burning in bug kill ponderosa pine 20 miles northwest of Wheatland, WY. Active fire behavior and isolated crown runs on the southwest perimeter were observed. Crews are constructing direct attack handline and burning out. Aerial resources are assisting with suppression efforts.

WEST BEAVER, Grand Mesa-Uncompahgre-Gunnison National Forest. A Type 2 Incident Management Team (Sisk) is assigned. This fire is 15 miles south of Norwood, CO. Torching, spotting and running were observed in spruce, fir and aspen. Steep, rugged terrain with heavy dead and downed fuels is impeding containment efforts.

PINYON RIDGE, Bureau of Land Management, Craig District. A Type 2 Incident Management Team (Chrisman) will assume command today. This fire is burning 28 miles northwest of Meeker, CO in pinyon pine and juniper. Crowning, running, torching and spotting were observed. Extreme drought conditions and high winds are impeding containment efforts. Crews are constructing direct attack handline and engines are mopping up.

COAL SEAM, Grand Junction Dispatch Center Area Counties. A Fire Use Management Team (Cook) is assigned to manage suppression operations and develop long term assessments. A confinement strategy is being utilized on the north flank due to extremely steep and dangerous terrain. This fire is burning four miles west of Glenwood Springs, CO in spruce, subalpine fir and aspen. Completed fireline has forced the fire north into areas of low spread potential. Aspen stands are projected to limit fire spread for three to four weeks. Single tree torching and creeping were observed on the northwest perimeter. Crews are conducting reconnaissance and mopping up spot fires.

EASTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

RATTLE, Bureau of Land Management, Moab Field Office. A Type 2 Incident Management Team (Shell) will assume command at 0600. This fire is 20 miles northeast of Green River, UT. Backing and short upslope runs were observed in oak brush, mountain mahogany, pinyon pine, Douglas fir and ponderosa pine. Steep, rugged terrain, extreme drought conditions and limited access are impeding containment efforts.

DIAMOND CREEK, Utah State Division of Forestry, Fire and State Lands, Southeast State. This fire, burning in ponderosa pine, pinyon pine, juniper, sagebrush and oakbrush, is 20 miles northeast of Thompson, UT. Extensive torching and crowning were observed on southwest facing slopes. Extreme drought conditions, steep, rugged terrain and limited access are hampering suppression efforts.

WILDHORSE COMPLEX, Bureau of Indian Affairs, Uintah and Ouray Agency. This complex, comprised of the Wildhorse and Papoose fires, is 54 miles south of Fort Duchesne, UT. Torching was observed in pinyon pine, juniper and sagebrush on the south flank. Aerial resources are being utilized on the south flank which is inaccessible to ground forces due to rock crags.

SANFORD, Dixie National Forest. A Type 2 Incident Management Team (Suwyn) is assigned. The fire is being managed by the most cost efficient alternative under the Wildland Fire Situation Analysis (WFSA) confinement/containment strategy. Priorities are firefighter and public safety, economics of suppression and ecosystem health. The fire is 20 miles northeast of Panguitch, UT and is burning in aspen, pinyon pine, juniper and mixed conifer forest. Torching, spotting and short runs were observed. Crews are constructing handline from Dutton Peak to the east along the north flank. Aerial resources are supporting suppression efforts. Structure protection is in place at Sanford Ranch.

WESTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on

information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

CANNON, Humboldt-Toiyabe National Forest. A transfer of command from Stutler's Type 1 Incident Management Team to a Type 3 Incident Management Team will take place today. This fire is burning in sagebrush, ponderosa pine and mixed conifer forest 25 miles northwest of Bridgeport, CA. Fire activity was limited to burnout operations. Crews are mopping up, patrolling and rehabilitating dozer line. U.S. Highway 395 will reopen at 0700 today.

CANNON	NV	HTF	22,750	85	6/25	1,155	33	48	7	4	7.3M

SOUTHERN AREA LARGE FIRES:

BLACKJACK BAY COMPLEX, Okefenokee National Wildlife Refuge. A transfer of command from Zimmerman's Fire Use Management Team to the Okefenokee National Wildlife Refuge, Georgia Forestry Commission, Florida Division of Forestry and the National Forests of Florida will take place today. This lightning-caused complex, consisting of the Blackjack 02, Bay Creek and Number One Island fires, is ten miles northeast of Fargo, GA. The complex is being managed by the most cost efficient alternative under the Wildland Fire Situation Analysis (WFSA) confinement/containment strategy. Priorities are firefighter and public safety, economics of suppression and ecosystem health. Precipitation has raised swamp water levels, resulting in minimal fire activity. Personnel are mopping up and rehabilitating roads.

ROCKY TOP, Shenandoah National Park. This fire is burning east of Harrisonburg, VA. Several residences are threatened. No further information was received.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

MANZANITA, California Department of Forestry and Fire Protection, San Diego Unit. This fire is burning in scrub oak, red shank and manzanita north of Boulevard, CA. Very active fire behavior with spotting was observed. The Manzanita Indian Reservation is threatened and evacuations have been ordered. Thirty residences are threatened.

OUTLOOK:

High pressure over the Southwest Area will bring sunny skies with isolated thunderstorms in southwest Texas and the south-central mountains of New Mexico. High temperatures will be from the 80's in the mountains to 110 at lower elevations. Minimum relative humidity will range from 3 to 10 percent in Arizona, 5 to 20 percent in New Mexico, and 15 to 40 percent in west Texas. Winds will be west to southwest at 5 to 15 mph, gusting to 25 mph.

Rocky Mountain Area can expect sunny skies with isolated wet and dry thunderstorms near the Continental Divide in Colorado. High temperatures will be in the 70's to lower 80's in the mountains and mid 80's to mid 90's at lower elevations. Minimum relative humidity will be in the single digits at lower elevations in western Colorado, 10 to 19 percent in the mountains, and 20 to 30 percent in northern Wyoming and the Black Hills. Winds will be southwest at 10 to 15 mph west of the Divide and east at 5 to 15 mph elsewhere.

High pressure building over the Eastern Great Basin Area will bring sunny skies. High temperatures will be in the 80's in the mountains and in the 90's to 105 in the valleys. Minimum relative humidity will range from 7 to 22 percent at higher elevations and 2 to 15 percent at lower elevations. Winds will be variable at 10 to 15 mph.

High pressure over the Western Great Basin Area will bring sunny skies with isolated thunderstorms. High temperatures will be 80 to 95 at lower elevations and 75 to 85 in the mountains. Minimum relative humidity will range from 5 to 20 percent. Winds will be west to southwest at 5 to 15 mph.

A low pressure system in the Southern Area will bring scattered showers and thunderstorms. High temperatures will be in the 80's and 90's. Minimum relative humidity will range from 35 to 60 percent and winds will be south to southwest at 5 to 10 mph.

Southern California Area can expect mostly sunny skies. High temperatures will be in the 60's to 70's in coastal areas, 80's to 90's in the mountains and inland valleys and in the 90's to 110 in the deserts. Minimum relative humidity will range from 8 to 20 percent in the mountains and deserts, 15 to 30 percent in the valleys and 45 to 60 percent near the coast. Winds will be southwest to northwest at 8 to 18 mph.

DOZER/TRACTOR PLOW OPERATIONS

Dozers/tractor plows provide suppression and support capability for BLM fire operations. When working on or around dozers on the fireline, it is important to respect the following guidelines:

- Load/unload equipment from the transport in a safe manner on a level, stable surface.
- Park transport in an area free of fuel. Clear an area if needed to protect parked equipment.
- Do not sit or bed down near equipment. Walk around the equipment before starting or moving it.
- Lower the dozer blade and/or fire plow to the ground when the equipment is idling or stopped.
- When working a dozer or tractor plow, stay at least 100 feet in front or 50 feet behind the equipment.
- Allow no one but the operator to ride on the equipment.
- Never get on or off equipment while it is moving.
- Provide front and rear lights for equipment working at night or in heavy smoke.
- Provide lights and fluorescent vests to personnel working with dozer/tractor plow units.
- Use hand signals for direction and safety. (See Fireline Handbook, Appendix A, for hand signals.)
- Do not use a dozer or tractor plow without a canopy or brush guard and radio communications.
- Operators will wear required PPE and carry a fire shelter.
- Be aware of different fuel types, rates of spread, and flammability.
- Watch for wetlands, steep slopes, rocks, ditches, and other obstacles that might stop the equipment.
- Do not get too far ahead of a firing crew during firing operations.
- Anchor the line to a secure firebreak and create a black line (burn out) until the fire is completely enclosed.
- Tractor plow operators should wear headgear protection for head, face, eyes, and ears while also providing radio reception and ventilation capabilities.

- Tractor plow crews should consist of a minimum of two people.
- When the dozer or tractor plow is equipped with a hand-clutch lever, always take equipment out of gear when mounting and dismounting.
