

**INCIDENT MANAGEMENT SITUATION REPORT
THURSDAY, JUNE 27, 2002 0530 MDT
NATIONAL PREPAREDNESS LEVEL 5**

CURRENT SITUATION:

Initial attack activity was moderate in the Northern California, Northwest and Southern California Areas and light elsewhere. Nationally, 176 new fires were reported. Three of these became large fires, one each in the Southwest, Rocky Mountain and Southern California Areas. Two large fires were contained, one each in the Southwest and Rocky Mountain Areas. Very high to extreme fire indices were reported in Arizona, California, Colorado, Kansas, Nevada, New Mexico, Oklahoma, Texas, Utah and Wyoming.

The 146th Air Expeditionary Group (Provisional), under the command of Brigadier General John Iffland, is conducting Modular Airborne Fire Fighting System (MAFFS) operations, supporting the National Interagency Fire Center wildland fire suppression effort. Two C-130H3 aircraft from the 302nd Air Wing, US Air Force Reserve, four C-130H3 aircraft from the 145th Air Wing, North Carolina Air National Guard and a joint 302nd/145th support group have been deployed to conduct air tanker missions at Peterson Field, Colorado. Lieutenant Colonel Ted Wright is the immediate commander for the deployed aircraft.

SOUTHWEST AREA LARGE FIRES:

Priorities are being established by the Southwest Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Ribar) is assigned to manage the Rodeo/Chediski complex.

RODEO/CHEDISKI COMPLEX, Bureau of Indian Affairs, Fort Apache Agency. Four Type 1 Incident Management Teams (Humphrey, Bateman, Dash, and Martin) are assigned. The fires are burning in chaparral, ponderosa pine, juniper and brush three miles north of Cibecue, AZ. Slightly higher relative humidity, thunder cell downbursts and convection influenced fire behavior with increased activity observed during the afternoon. Crews successfully held the east flank along Highway 60 with support from aerial resources, preventing fire spread into Show Low and communities to the east. Excellent progress was made burning out the southwest corner and continues north along the west flank. Show Low, Pinedale, Lakeside, Clay Springs, Pinetop, Hon Dah, Linden, Overgaard, Heber and surrounding populated areas remain evacuated; structure protection is in place. Evacuation centers are open in Winslow and Holbrook. Damage assessment groups are reporting a total of 423 residences confirmed lost. Highways 260 and 277 are closed.

ROYBAL/TRAMPAS, Santa Fe National Forest. The Roybal fire is four miles northeast of Pecos, NM and the Trampas fire is in the Pecos Wilderness Area, eight miles west of Rociada, NM. The fires are burning in ponderosa pine and mixed conifer forest. Minimal fire activity was observed.

Steep terrain and limited access are hampering containment efforts.

TEJON, New Mexico State Forestry Office, Las Vegas District. This fire is two miles northwest of Vaughn, NM. No further information was reported.

CAF = Carson National Forest

ROCKY MOUNTAIN AREA LARGE FIRES:

Priorities are being established by the Rocky Mountain Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms. An Area Command Team (Mann) is assigned to manage the Hayman fire. An additional Area Command Team (Chesley) has been ordered for the Missionary Ridge fire.

MISSIONARY RIDGE, San Juan National Forest. Two Type 1 Incident Management Teams (Hart and Bennett) are assigned. Bennett's team is also managing the Valley incident. Missionary Ridge is 15 miles northeast of Durango, CO and Valley is adjacent to and west of US Highway 550. The fires are burning in gambel oak, ponderosa pine and mixed conifer forest. Crews and dozers completed fireline construction around the Valley incident. Active fire behavior, afternoon runs, torching and spotting were observed on the southwest and northeast perimeters of Missionary Ridge. The fire spotted across containment lines in Woodward Canyon on the southwest flank. Crews are burning out, patrolling and mopping up. Nine subdivisions along State Route 250 have been evacuated to the center in Bayfield. A damage assessment group is reporting six residences lost during the initial phases of the Valley fire.

MILLION, Rio Grande National Forest. A Type 1 Incident Management Team (Gelobter) is assigned. This fire is burning two miles south of South Fork, CO in ponderosa pine, bug kill spruce and mixed conifer forest. Minimal fire activity was observed. Crews and dozers have completed fireline construction and personnel are mopping up. The voluntary evacuation of Willow Park has been lifted. A revised evaluation of lost structures reports eleven residences and two outbuildings lost during the initial phases of the fire; the seven additional residences reported yesterday sustained minor damage.

HENSEL, Medicine Bow National Forest. A Type 1 Incident Management Team (Wood) is assigned. This fire is burning in bug kill ponderosa pine 20 miles northwest of Wheatland, WY. Isolated torching was observed. Crews are constructing direct attack handline on Laramie Peak. Strong, gusty winds and very steep terrain are hampering containment efforts.

HAYMAN, Pike-San Isabel National Forest. A Type 1 Incident Management Team (Frye) is assigned. This fire is burning six miles northwest of Lake George, CO in ponderosa pine, gambel oak and mixed conifer forest. Precipitation limited fire behavior to isolated torching, creeping and smoldering. Crews are constructing direct attack handline on the west flank in the Lost Creek Wilderness Area. Rehabilitation and mopup are underway on the north, south and east flanks. Park, Douglas, Teller and Jefferson Counties are assessing structure loss. Four evacuation

centers remain open.

SPRING CREEK, White River National Forest. A Type 2 Incident Management Team (Hartman) is assigned. This fire is burning in spruce eight miles north of New Castle, CO. Spotting, torching and short runs were observed. Steep, inaccessible terrain, long term drought, low relative humidity and erratic winds are impeding suppression efforts.

WEST BEAVER, Grand Mesa-Uncompahgre-Gunnison National Forest. A Type 2 Incident Management Team (Sisk) is assigned. This fire is 15 miles south of Norwood, CO. Torching was observed in spruce, fir and aspen. Steep, rugged terrain, numerous snags, and heavy dead and downed fuels is impeding containment efforts. Crews made significant progress toward containment objectives. Personnel are conducting reconnaissance and lining spot fires.

PINYON RIDGE, Bureau of Land Management, Craig District. A Type 2 Incident Management Team (Chrisman) is assigned. This fire is burning 28 miles northwest of Meeker, CO in pinyon pine and juniper. Torching and low ground fire were observed. Crews are constructing direct attack handline and engines are patrolling and mopping up.

COAL SEAM, Grand Junction Dispatch Center Area Counties. A Fire Use Management Team (Cook) is assigned to manage suppression operations and develop long term assessments. A confinement strategy is being utilized on the north flank due to extremely steep and dangerous terrain. This fire is burning four miles west of Glenwood Springs, CO in spruce, subalpine fir and aspen. Completed fireline has forced the fire north into areas of low spread potential. Aspen stands are projected to limit fire spread for three to four weeks. Creeping was observed in unburned islands. Personnel are conducting reconnaissance, mopping up spot fires and rehabilitating fireline.

EASTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

RATTLE COMPLEX, Bureau of Land Management, Moab Field Office. A Type 2 Incident Management Team (Casey) is assigned. This complex, consisting of the Diamond Creek and Rattle fires, is 20 miles northeast of Green River, UT. Sustained crowning runs and medium range spotting were observed in oak brush, mountain mahogany, pinyon pine, Douglas fir and ponderosa pine. Extreme drought conditions and limited access are impeding containment efforts. Crews are constructing fireline in steep, rugged terrain.

WILDHORSE COMPLEX, Bureau of Indian Affairs, Uintah and Ouray Agency. This complex, comprised of the Wildhorse and Papoose fires, is 54 miles south of Fort Duchesne, UT. Creeping and isolated torching were observed in pinyon pine, juniper and sagebrush on the southwest flank. Crews are patrolling and mopping up.

SANFORD, Dixie National Forest. A Type 2 Incident Management Team (Suwyn) is assigned. The fire is being managed by the most cost efficient alternative under the Wildland Fire Situation Analysis (WFSA) confinement/containment strategy. Priorities are firefighter and public safety, economics of suppression and ecosystem health. The fire is 20 miles northeast of Panguitch, UT and is burning in aspen, pinyon pine, juniper and mixed conifer forest. Minimal fire activity was observed. Crews are constructing direct attack handline on the south and west flanks and mopping up spot fires near Dutton Peak. Structure protection is in place at Sanford Ranch.

GRINDER, Bureau of Land Management, Lower Snake River District. This wind-driven fire is burning 21 miles south of Glenns Ferry, ID in grass and sagebrush. Engines are wet lining the fire and dozers are building direct attack fireline.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

LOUISIANA, San Bernardino National Forest. A Type 2 Incident Management Team (Walker) is assigned. This fire, burning in heavy chaparral, is nine miles north of Devore, CA. Extreme fire behavior was observed. Interstate 15 and the Burlington Northern-Sante Fe railroad line have been closed. Lone Pine and residences in Swarthout Canyon have been evacuated. Baldy Mesa, West Cajon Valley, Wrightwood and Oak Hills are threatened.

WESTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildland Fire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

CANNON, Humboldt-Toiyabe National Forest. This fire is burning in sagebrush, ponderosa pine and mixed conifer forest 25 miles northwest of Bridgeport, CA. Fire activity was limited to interior burning. Crews are patrolling and mopping up.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
CANNON	NV	HTF	22,750	95	6/27	475	18	27	3	4	7.8M

SOUTHERN AREA LARGE FIRES:

BLACKJACK BAY COMPLEX, Okefenokee National Wildlife Refuge. This lightning-caused complex, consisting of the Blackjack 02, Bay Creek and Number One Island fires, is ten miles northeast of Fargo, GA. The complex is being managed by the most cost efficient alternative under the Wildland Fire Situation Analysis (WFSa) confinement/containment strategy. Priorities are firefighter and public safety, economics of suppression and ecosystem health. Precipitation has raised swamp water levels, minimizing fire activity. The fire is in monitor status.

ROCKY TOP, Shenandoah National Park. This fire is burning east of Harrisonburg, VA in mixed hardwoods and bug kill timber. Precipitation resulted in minimal fire activity. Crews are constructing direct attack fireline and successfully suppressed a slopover with the support of aerial resources.

OUTLOOK:

*****A FIRE WEATHER WATCH HAS BEEN ISSUED IN WESTERN COLORADO FOR DRY LIGHTNING AND HIGH TEMPERATURES*****

The Southwest Area can expect partly to mostly sunny skies with scattered dry thunderstorms across eastern Arizona and western New Mexico. A chance of wet thunderstorm activity is forecast in eastern New Mexico and west Texas. High temperatures will be in the 80's in the mountains and near 110 at lower elevations. Minimum relative humidity will range from 5 to 15 percent in Arizona and western New Mexico and 15 to 30 percent elsewhere. Winds will be southwest at 5 to 15 mph in Arizona and western New Mexico with gusts to 20 mph, and east to southeast at 10 to 15 mph in the remainder of the area.

The Rocky Mountain Area can expect mostly sunny skies with widely scattered, mainly wet thunderstorms in eastern Colorado and western Wyoming. Isolated dry thunderstorms are forecast for western Colorado. High temperatures will be in the 70's and 80's in the mountains and upper 70's to mid 90's at lower elevations. Minimum relative humidity will be in the single digits at lower elevations in western Colorado, 10 to 25 percent in the mountains, and 20 to 30 percent in northern Wyoming and the Black Hills. Winds will be east to southeast at 10 to 20 mph east of the Divide and variable at 5 to 15 mph elsewhere.

High pressure over the Eastern Great Basin Area will bring mostly sunny skies with widely scattered dry thunderstorms over the mountains. High temperatures will be in the 80's to low 90's in the mountains and 90 to 107 in the valleys. Minimum relative humidity will range from 7 to 25 percent at higher elevations and 4 to 18 percent at lower elevations. Winds will be southwest at 5 to 15 mph.

The Southern California Area can expect mostly sunny skies with morning low clouds and fog along the coast. A chance of isolated thunderstorms are forecast over the higher terrain of the Sierra Nevada Mountains. High temperatures will be upper 60's and 70's in coastal areas, mid 80's to low 90's in the mountains and inland valleys, and low 90's to 115 in the deserts. Minimum relative humidity will range from 5 to 15 percent in the deserts, 8 to 20 percent in the mountains, 15 to 30 percent in the valleys, and above 45 percent near the coast. Winds will be onshore at 7 to 12 mph in coastal areas and west to southwest at 8 to 18 mph elsewhere.

High pressure over the Western Great Basin Area will bring sunny skies with isolated thunderstorms in northeast and central Nevada. High temperatures will be in the 90's in the north and 100 to 110 in the south. Minimum relative humidity will range from the single digits to teens. Winds will be west to southwest at 5 to 15 mph.

The Southern Area can expect partly to mostly cloudy skies with scattered showers and thunderstorms. High temperatures will be in the 80's and 90's and minimum relative humidity will generally be above 45 percent. Winds will be variable at 5 to 10 mph.
