**INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, MARCH 15, 2002- 1000 MST
NATIONAL PREPAREDNESS LEVEL 1**

CURRENT SITUATION:

Initial attack activity was moderate in the South and Southwest Areas and light in Southern California and Eastern Area. Six new large fires were reported in the Southern Area, four in the Eastern Area and one in Southern California. Seven large fires were contained in the Southern Area, three in the Eastern Area and one in Southern California. Prescribed burning projects continued in Northern California, Southern California, the Northwest, Eastern Great Basin, Southwest, Rocky Mountain, Eastern and Southern Areas.

SOUTHERN AREA LARGE FIRES:

BEEF CREEK, Texas Forest Service. This fire is located four miles north of Beaumont, Texas.

OUTLOOK:

The Southeast should see lower fire weather risk for the upcoming 10 days. Initially, extreme fire weather conditions will prevail Thursday from Western Oklahoma to Central and South Texas. Expect above normal temperatures of 80-90 degrees, gusty southerly surface winds, and very low humidities in the 10 to 20 percent range. From Friday through late next week the weather pattern supports a more unsettled period as a cold front moves across the Southeast from Friday to Sunday and stalls over the Gulf Coast before moving back to the North as a warm front. The net result will be lower overall fire weather risks due to increased humidities and chances for rain or rain showers from Monday through Friday. The Oklahoma and Texas area will remain generally dry as most of the precipitation falls across the Mississippi Valley and Eastward. Potentially, a drier and higher fire weather risk period begins around Saturday, March 23rd, for the entire SE region.

Topic of the Day: Required Personal Protective Equipment (PPE)

! Head Protection 1. Always have a hard hat or flight helmet. The hardhat must be non-conductive (non-metallic) in nature. 2. Insure a snug fit. Always use a chin strap in or around helicopters. 3. Replace the helmet or hardhat if it is cracked, or has received some type of major impact.

! Goggles/Safety glasses 1. Use when cutting, chipping, tool sharpening, or anytime radiant heat or flying hot particles pose a risk to your eyes. Examples in aviation work might be air operations-parking tender, or someone directing external loads. 2. Discuss care of eye ware and lens replacement.

! Hearing protection 1. Required for noise level of 80db or greater. 2. Chainsaw/fallers, pump operators, helibase/fixed wing base operations, retardant mixers.
