Do not lie down.

- The best position is sitting on the pack or crouching with feet close together.
- Avoid sitting directly on the ground, if possible; but, if necessary, keep feet and butt close together.
- Crouching for extended periods is not easily done, so sit on the pack.
- Sitting on or covering up with a ground cloth is okay.

Removing caulk boots to allow stocking-covered or bare feet to make contact with the ground will not provide safety.

Handheld radios (with short rubber antennas) or cell phones are safe to use. Communication is vital to crew safety.

Wide, open spaces are better than trees or clumps of trees in the vicinity. Ridge tops, etc., should be avoided.

If you feel the hair on your arms or head stand up , there is a high probability of a strike in the vicinity. Crouch or sit on a pack.
