

**INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, MAY 24, 2002- 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2**

CURRENT SITUATION:

Initial attack activity was light across the nation. Eight new large fires were reported, four in Alaska, and one each in the Southern California, Eastern, Southern and Northern Rockies Areas. Five large fires were contained, two in the Southwest Area and one each in the Eastern, Southern and Northern Rockies Areas. Very high to extreme fire indices were reported in Arizona, Colorado, Kansas, Minnesota, Nevada, New Mexico, Oklahoma, Texas, Utah and Wisconsin.

SOUTHWEST AREA LARGE FIRES:

BULLOCK, Coronado National Forest. A transfer of command from Kvale's Type 2 Incident Management Team to Humphrey's Type 1 Incident Management Team will occur at 1800 MST today. This fire is burning 15 miles northeast of Tucson, AZ in grass, oak woodland and chaparral. Drought conditions and upslope winds resulted in extreme fire behavior with rapid rates of spread. Crews are flanking with direct attack handline and burn out operations as the fire continues to burn northwest. Seven hundred fifteen structures are threatened, including a ski recreation area. The Pima County Sheriff's Office has completed a pre-notification of contingency evacuation orders. The Catalina Highway is closed.

BORREGO, Santa Fe National Forest. A Type 1 Incident Management Team (Bateman) is assigned. The fire is burning in pinyon and ponderosa pine two miles southeast of Cordova, NM. Crowning, running and spotting up to a mile and a quarter ahead of the front were observed. Strong winds, dry fuels and rugged terrain are hampering containment efforts. The town of Truchas has been evacuated and Cordova has been advised of a potential evacuation. An evacuation center has been opened at Chimayo Elementary School. Fourteen hundred thirty structures are threatened.

LEFT FORK, New Mexico State Forestry Office, Cimmaron District. This fire, burning in mixed conifer forest, is 32 miles west of Raton, NM. Drought conditions, high winds, low relative humidity, and low fuel moisture are hampering containment efforts. Dozers are building and improving firelines.

COF = Coconino National Forest

ROCKY MOUNTAIN AREA LARGE FIRES:

SCHOONOVER, Pike-San Isabel National Forest. A Type 1 Incident Management Team (Hart) is assigned. This fire is burning three miles southwest of Deckers, CO in ponderosa pine, Douglas fir and grass. Backing surface fire, individual and group tree torching, and short, upslope runs were observed. Crews have anchored in close to the ignition point and are making good progress constructing handline. Aerial resources are holding the fire on divisions that are not staffed. Highway 67 has been opened to local traffic. The evacuation of Deckers remains in effect and two evacuation centers have been opened by the American Red Cross. A total of 13 structures have been lost.

BUCKTAIL COMPLEX, Grand Mesa-Uncompahgre-Gunnison National Forest. A Type 2 Incident Management Team (Sisk) is assigned. This complex, comprised of the Bucktail, 47, Dry Park and Horsefly fires, is five miles northeast of Nucla, CO. The fires are burning in ponderosa and pinyon pine, juniper, sagebrush and oakbrush on the Uncompahgre Plateau. The 47 fire has backed into the Robber's Roost and North Fork drainages and moderate surface fire with short uphill runs were observed. Crews have spiked out and are constructing direct attack fireline. Inaccessibility, extremely rugged terrain and strong, erratic winds are hampering containment efforts.

BUCKTAIL COMPLEX	CO	GMF	3,480	25	5/27	329	8	10	3	0	350K

ALASKA AREA LARGE FIRES:

WEST FORK CHENA, Alaska State Division of Forestry. This fire is burning in black spruce 50 miles east of Fairbanks, AK. Extreme fire weather conditions for this time of year are hampering control efforts. Structures and a watershed are threatened.

KALSKAG, Alaska State Division of Forestry. Burning in black spruce, muskeg and hardwoods, this fire is 22 miles west of Aniak, AK. A shift in wind direction could push the fire back toward the village of Kalskag.

VINESALE, Alaska State Division of Forestry. The fire is 15 miles south of McGrath, AK. Heavy smoke from the fire drifted into the town of McGrath. Sixteen smokejumpers are assigned to the fire. Lack of helicopter support is slowing the mobilization of crews to the fire.

MP 78 ELLIOTT HIGHWAY, Bureau of Land Management, Tanana Zone. The fire is seven miles southwest of Livengood, AK, and is burning in black spruce, brush and litter. Crowning, torching and running were observed on the fire yesterday. Numerous air tanker drops occurred throughout day. The fire is burning actively in fuels that normally act as natural barriers due to the extremely dry conditions.

SOUTHERN AREA LARGE FIRES:

BLACKJACK BAY COMPLEX, Okefenokee National Wildlife Refuge. A Unified Command has been established between an interagency Fire Use Management Team (Adams), the Georgia Forestry Commission and the Florida Division of Forestry. This lightning caused complex, consisting of the Blackjack 02, Bay Creek and Number One Island fires, is ten miles northeast of Fargo, GA. Water levels in the swamp have decreased. An increase in fire activity was observed, including ground fire and short runs. Personnel continue to plan for contingencies and monitor the complex.

SIMMONDS POND, Florida Division of Forestry. This fire is four miles north of Fort McCoy, FL. The fire is burning on Ocala Lumber Company land with swamp both to the north and south. Aerial resources assisted with suppression efforts.

OUTLOOK:

*****A FIRE WEATHER WATCH HAS BEEN ISSUED IN FLORIDA FOR MINIMUM RELATIVE HUMIDITY RANGING FROM 30 TO 35 PERCENT, NORTHEAST WINDS AT 15 TO 25 MPH AND DISPERSION INDICES GREATER THAN 75*****

*****A FIRE WEATHER WATCH HAS BEEN ISSUED IN NORTHERN INTERIOR ALASKA FOR LOW RELATIVE HUMIDITY*****

The Southwest Area can expect mostly sunny to partly cloudy skies with a slight chance of afternoon thunderstorms in northeast New Mexico and west Texas. High temperatures will be in the 60's and 70's in the mountains and in the 80's and low 90's in the deserts. Minimum relative humidity will range from 15 to 30 percent in northeast New Mexico and west Texas, and 5 to 15 percent elsewhere. Winds will be southwest at 10 to 20 mph.

An upper level disturbance moving eastward across the Rocky Mountain Area will bring areas of rain and snow along the east side of the Continental Divide, with decreasing precipitation as the afternoon progresses. High temperatures will be 55 to 65 in the mountains of western Colorado and 65 to 75 at lower elevations. Elsewhere, high temperatures will be 40 to 50 in the mountains and 50 to 60 at lower elevations. Minimum relative humidity will range from 10 to 20 percent in western Colorado, 45 to 55 percent in eastern Colorado and southeast Wyoming, and 25 to 35 percent in the remainder of the area. Winds will be west at 10 to 20 mph, however, east of the Divide, winds will be northeast at 10 to 20 mph.

High pressure over the Southern Area will bring fair skies. A slowly advancing cold front over Oklahoma will bring a chance of isolated rain showers and thunderstorms. High temperatures will be in the 90's in southern Texas and in the 70's and 80's elsewhere. Minimum relative humidity will be in the 20 percent range in the Appalachian Mountains, Georgia and the Carolinas, 50 percent in southeastern coastal Florida, and in the 30 to 40 percent range in the remainder of the area. Winds will be east to northeast at 12 to 18 mph in Florida, south to southeast at 15 to 25 mph near the cold front and 8 to 15 mph elsewhere.

A frontal boundary will bring showers and thunderstorms to the Eastern Area as it settles southward into the mid Mississippi and Ohio Valleys. Dry and cooler conditions with light and variable winds will prevail across the Great Lakes region as high pressure advances into the area from the west. The mid Atlantic states can expect warm temperatures and moderate southwest winds.

FIGHT FIRE AGGRESSIVELY, BUT PROVIDE FOR SAFETY FIRST

Standard Fire Order #1 must be taken into account at all times when fighting fire. In order to fight fire safely and aggressively, every firefighter must be able to answer the following questions:

Is the suppression method adequate? Ask yourselves, are we making progress? Are we beating our heads against a wall? Is there a better way to get this done? Give examples when you have had to change your suppression method.

Are there adequate resources and time for effective suppression? Ask yourselves, do we need to retreat and reevaluate? Talk about times when you have realized you weren't getting anywhere and needed to retreat and start managing firefighters and placing orders.

Are lookouts posted? Discuss when you post lookouts, who you would choose to be a lookout, and where they should be located.

Are communications prompt with crews and other resources? Review the importance of good communications on the fireline.

Have escape routes and safety zones been established? Talk about your crew's procedure for establishing escape routes and safety zones. Review what constitutes an escape route and a safety zone.

Do you feel comfortable with your assignment? Discuss the situation check. Remind firefighters that every individual has the right to question an assignment.

To reduce the risks:

- Post lookouts.
- Retreat if the situation is too complex. Emphasize that safety is everyone's responsibility; we all want to be good firefighters and being safe is part of that.
