ESCAPE ROUTES

An escape route is a preplanned and understood route to reach a safety zone.

• What are the primary concerns in choosing an escape route?

- Select the closest, least obstructed route.
- Plan for more than one escape route.
- Avoid an uphill escape.
- Scout and clearly mark the route for visibility (aids during smoky situations or night operational periods).

•

- Determine escape time--consider slowest person, fatigue, and temperature factors.
- Continuously reassess the situation with regard to work progress and additional resource arrivals.
- Assure all line personnel are familiar with escape routes.
