

**INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY, APRIL 16, 2003 1000 MDT
NATIONAL PREPAREDNESS LEVEL 2**

CURRENT SITUATION:

Initial attack activity was light to moderate nationally, with 363 new fires reported yesterday. Eleven new large fires were reported, five in the Eastern Area, and six in the Southern Area. Twelve large fires were contained, five in the Eastern Area and seven in the Southern Area. Very high to extreme fire indices were reported in Arizona, Colorado, Connecticut, Illinois, Indiana, Minnesota, Missouri, North Dakota, and Ohio.

COLUMBIA RESPONSE, Federal Emergency Management Agency. A FEMA Emergency Operations Center is established in Lufkin, Texas. A Type 1 Incident Management Team (Bennett) is assigned in Palestine, Texas. Four Type 2 Incident Management Teams (Crisman, Gray, Morcom and Raley) are assigned in Longview, Nacogdoches, Corsicana, and Hemphill, Texas. Forty-eight agencies are cooperating in the search and collection of shuttle materials. Approximately 80 percent of the current assigned area, or 506,202 acres, has been searched.

NEWCASTLE, Animal and Plant Health Inspection Service, USDA. State and Federal personnel have been mobilized in response to the outbreak of the Exotic Newcastle Disease. They are working in support of the USDA APHIS operation under a Unified Command. Support operations are being conducted in Arizona, California, and Nevada.

EASTERN AREA LARGE FIRES:

GREER LAKE FIRE, Minnesota Department of Natural Resources. The fire is three miles southeast of Elbow Lake Village, MN. No new information was reported.

WARFIELD ROAD, Huron-Manistee National Forest. This fire burning in oak and grass is five miles east of Wellston, MI. No major problems or concerns are expected.

BILLS LAKE, Huron-Manistee National Forest. The fire is eight miles east of Newaygo, MI and is burning in hardwoods. The fire was driven by winds with some torching observed. Minimal fire spread is anticipated.

PEACH, Ohio Division of Forestry. The fire is burning in 25-30 year old hardwood regeneration and is two miles west of West Portsmouth, OH. The fire burned actively throughout the operational period in steep, inaccessible terrain. Burnout operations will be utilized to secure containment lines.

CHIPPEWA PRAIRIE, Minnesota Department of Natural Resources. The fire is two miles north of Appleton, MN. No new information was reported. This will be the last report unless new information has been received.

FNF = National Forests in Florida

OUTLOOK:

Red Flag Warnings: Eastern Kentucky, Southeast Missouri, Southern Illinois, Western Kentucky, Southwest Indiana, and Southern Ohio for high wind and low humidity.
West and Central Texas and Guadalupe Mountains for high wind and low humidity.

Fire Weather Watches:

Weather Discussion: A strong low pressure system will move out of central Kansas today into southern Iowa by this evening. This storm system will bring showers and thunderstorms today from the western Dakotas to the Great Lakes States. However, it will lower humidity values in to the teens for portions of western Texas. High pressure will keep the majority of the Southeast dry, while another low pressure system moves toward Southern California later in the evening.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
EASTERN AREA Partly Sunny with a chance of scattered afternoon thunderstorms across the south and east Big Rivers and west Mid-Atlantic compacts ahead of a cool front	74 to 84	28 to 38%	South to southwest wind 15 to 25 mph with gusts over 30 mph possible
NORTHERN ROCKIES AREA Showers	ND: 30-35	ND: 40-50	NE 15-30 mph
SOUTHWEST Sunny and windy across the plains, light winds west.	50s mountains, 60s to low 80s lower elevations.	10-30%	W 20-30 mph eastern NM and west TX, decreasing this afternoon. 5-15 mph western NM & AZ

UNFAMILIAR WITH WEATHER AND LOCAL FACTORS INFLUENCING FIRE BEHAVIOR

- Can you ask questions of local experts? What kinds of questions would you ask?
- Does the operational period plan give you adequate weather and information? What kinds of weather forecasts can you get? What other weather or local information do you look for in the shift plan?
- Can you get information from resources that have been on the fire? What questions will you ask of the crew that you are replacing?
- Is there any other way to obtain information? List common sources of information on weather and local factors.
- To reduce risks:
 - Base all actions on current and expected fire behavior.
 - Post lookouts.
 - Establish escape routes and safety zones.
 - Take extra caution! Discuss a fire where you relied on information from the local unit (perhaps where your fire knowledge and experience was very different from how they did things—Southeast or Alaska).
