

**INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY, FEBRUARY 19, 2003 1000 MST
NATIONAL PREPAREDNESS LEVEL 2**

CURRENT SITUATION:

Initial attack activity was light nationally, with 366 new fires reported for the period of February 14th through February 18th.

COLUMBIA RESPONSE, Federal Emergency Management Agency. A FEMA Emergency Operations Center has been established in Lufkin, Texas. Two Type 1 Incident Management Teams (Martin and McCombs) are assigned in Hemphill and Palestine, Texas. A third Type 1 Incident Management Team (Lohrey) has been ordered for Corsicana, Texas. A Type 2 Incident Management Team (Custer) is assigned in Nacogdoches, Texas. Thirty-three agencies are cooperating in the search and collection of shuttle materials.

NEWCASTLE, Animal and Plant Health Inspection Service, USDA. State and Federal personnel have been mobilized in response to the recent outbreak of the Exotic Newcastle Disease. They are working in support of the USDA APHIS operation under a Unified Command. Support operations are in Arizona, California, Maryland and Nevada.

NORTHERN CALIFORNIA AREA LARGE FIRES:

PANAU IKI, Hawaii Volcanoes National Park. A Type 2 Incident Management Team (Szczepanik) is assigned. This fire is burning in grass and brush. Crews are constructing fireline and mopping up along vegetated perimeter. Crews are hampered by volcanic smog (VOG) and unable to work portions of the fire. High winds are drying fuels.

POWER LINE SAFETY

Operating near or under power lines poses unique hazards, and the following precautions should be followed to reduce potential equipment damage or injury:

- If possible, the power company should deactivate lines in the fire area.
- Don't operate heavy equipment under power lines.
- Don't use right-of-ways as a jump or cargo drop spot.
- Don't drive with long antennas under power lines.
- Don't stand near power lines during retardant drops.
- Don't park under power lines. The magnetic field around energized power lines can induce an electrical charge in ungrounded vehicles or equipment. This charge can shock anyone who touches the vehicle.
- Don't apply straight stream to power lines.
- All personnel should be cautioned that smoke may become charged and conduct the electrical current. Deactivated transmission and distribution lines may continue to pose a hazard due to induction.
- If power lines fall on your vehicle, DON'T leave the vehicle until the power company arrives. If the vehicle is on fire or fire is near, jump clear, don't hang on, keep feet together, and bunny hop away.
