

**INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY, FEBRUARY 26, 2003 1000 MST
NATIONAL PREPAREDNESS LEVEL 2**

CURRENT SITUATION:

Initial attack activity was light nationally, with 27 new fires reported yesterday.

COLUMBIA RESPONSE, Federal Emergency Management Agency. A FEMA Emergency Operations Center has been established in Lufkin, Texas. Three Type 1 Incident Management Teams (Lohrey, Martin and McCombs) are assigned in Corsicana, Hemphill and Palestine, Texas. A Type 2 Incident Management Team (Custer) is assigned in Nacogdoches, Texas. Thirty-five agencies are cooperating in the search and collection of shuttle materials.

NEWCASTLE, Animal and Plant Health Inspection Service, USDA. State and Federal personnel have been mobilized in response to the outbreak of the Exotic Newcastle Disease. They are working in support of the USDA APHIS operation under a Unified Command. Support operations are being conducted in Arizona, California, Maryland and Nevada.

NORTHERN CALIFORNIA AREA LARGE FIRES:

PANAU IKI, Hawaii Volcanoes National Park. This fire, 30 miles southwest of Hilo, HI is burning in grass and brush. Crews are constructing fireline and mopping up along the vegetated perimeter. Crews continue to be hampered by volcanic smog (VOG), which is being influenced by northeast tradewinds.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
PANAU IKI	HI	HVP	2,025	60	NR	76	3	2	1	0	702K

OUTLOOK:

A high pressure over New England combined with a developing low pressure along the Texas Gulf Coast will continue to bring cool air and a wintry mix of precipitation over the southeast today. A band of freezing rain and sleet are expected across Arkansas and western Tennessee. Snow is expected to the north of the band, to the south a significant amount of rain is expected to fall.

CONSTRUCTING LINE WITHOUT A SAFE ANCHOR POINT

When deciding where to build fireline, the following considerations must be weighed:

- Can you hold the line without the fire hooking under/around you? How do you protect against losing the line and ensure your safety if there is a danger of the fire hooking around you?
- Are there adequate safety zones and escape routes? Review what constitutes an adequate safety zone and escape route. Who has the responsibility to designate them and continue to make sure they are adequate?
- Can you develop your starting point into an anchor point? List some good anchor points. Describe how you would develop your starting point into an anchor point.
- Have you posted good lookouts? Where should the lookout(s) be posted? Who can be a lookout?
- Do you have good communications? Who do you need to be in contact with? If the communications are not good, what can you do to improve them?
- To reduce the risks, start the line in another location. Talk about fires where you have had to relocate the line because your anchor point did not hold the fire.
