

**INCIDENT MANAGEMENT SITUATION REPORT**  
**FRIDAY, FEBRUARY 28, 2003 1000 MST**  
**NATIONAL PREPAREDNESS LEVEL 2**

**CURRENT SITUATION:**

Initial attack activity was light nationally, with 29 new fires reported yesterday.

COLUMBIA RESPONSE, Federal Emergency Management Agency. A FEMA Emergency Operations Center has been established in Lufkin, Texas. Lohrey, Martin and McCombs Type 1 Incident Management Teams are assigned in Corsicana, Hemphill and Palestine, Texas, respectively. A Type 2 Incident Management Team (Custer) is assigned in Nacogdoches, Texas. A Type 2 Incident Management Team (Hildreth) is beginning to set up operations at the Longview, Texas staging area. Thirty-five agencies and a total of 5,405 personnel are cooperating with the search and collection of shuttle materials.

NEWCASTLE, Animal and Plant Health Inspection Service, USDA. State and Federal personnel have been mobilized in response to the outbreak of the Exotic Newcastle Disease. They are working in support of the USDA APHIS operation under a Unified Command. Support operations are being conducted in Arizona, California, Maryland and Nevada.

**NORTHERN CALIFORNIA AREA LARGE FIRES:**

PANAU IKI, Hawaii Volcanoes National Park. This fire, 30 miles southwest of Hilo, HI is burning in grass and brush. Crews continue to be hampered by volcanic smog (VOG), which is being influenced by northeast trade winds. No new information was reported.

**OUTLOOK:**

Low pressure off the Virginia coast will continue to pull away from the coastline today and lingering precipitation in Virginia and North Carolina will end. High pressure will give the region a dry respite until Sunday night or Monday morning when rain is again expected to develop in the Southern Plains. Florida will have rain in the forecast today and Saturday, and Sunday may still be wet across the Florida peninsula. Mainly dry weather and moderating temperatures are expected today and Saturday for the Columbia recovery area. A weak disturbance will bring a small chance for rain today, but it will be widely scattered and very light if it occurs at all. The next wet period begins Sunday and continues into Monday.

### AVIATION WATCH OUT SITUATIONS

As part of risk management, especially during high activity fires, each aviation manager and employee should be asking questions.

- Is the flight necessary?
- Who is in charge?
- Are all hazards identified and have you made them known?
- Should the operation or the flight be stopped due to a change in conditions? Consider the following:
  - Communications
  - Confusion
  - Personnel
  - Weather
  - Turbulence
  - Conflicting priorities
- Is there a better way to do it?
- Are you driven by the task and sense of urgency?
- Can you justify your actions?
- Are there other aircraft in the area?
- Will the pilot accept the mission?
- Are any guidelines being ignored or policies being broken?
- Are communications getting tense?
- Are you deviating from the assigned operation or flight?
