

INCIDENT MANAGEMENT SITUATION REPORT
WEDNESDAY JULY 2, 2003 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 3

CURRENT SITUATION:

Initial attack activity was moderate in the Northern California, Southern California and Northern Rockies Areas and light elsewhere with 153 new fires reported. Five new large fires were reported, two in the Northwest Area, one in the Rocky Mountain Area, and two in the Northern California Area. Four large fires were contained, two each in the Southern California and Northern California Areas. Very high to extreme fire indices were reported in Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, Oregon, Utah, Washington and Wyoming.

NORTHWEST AREA LARGE FIRES

DAVIS, Deschutes National Forest. A Type 2 Incident Management Team (Hoff) is assigned. This fire is 12 miles west of La Pine, OR. Active fire behavior was observed in lodgepole pine, Douglas fir, white fir and ponderosa pine. Crews made good progress constructing fireline and are conducting burn out operations on the southeast and northwest flanks of the fire.

FAWN PEAK/SWEET GRASS, Okanogan/Wenatchee National Forest. A Type 2 Incident Management Team (Jennings) is assigned. These lightning caused fires are burning in heavy timber and sub-alpine fir, 13 miles north of Winthrop, WA. Direct attack is underway on the Sweet Grass fire, and a plan is being developed for the Fawn Peak. Road closures are in effect in the fire area.

TIMBERLINE, Colville Agency, Bureau of Indian Affairs. This fire is ten miles east of Omak, WA. Torching and spotting were observed in timber and grass. The fire did not increase in size. Crews are constructing handline and mopping up along the perimeter.

SULPHUR CREEK, Western Lane District, Oregon Department of Forestry. This fire is in timber and grass five miles southeast of Mapleton, OR. Crews are constructing fireline and mopping up along the perimeter.

NINE MILE, Northeast, Washington State Department of Forestry. This fire is burning five miles east of Oroville, WA. Crews are holding and improving firelines. No further information was received.

EASTERN GREAT BASIN AREA LARGE FIRES

APEX, Southwest State, Utah Division of Forestry, Fire and State Lands. A Type 2 Incident Management Team (Suwyn) is assigned. This fire is in brush, pinyon pine and juniper, 12 miles west of St. George, UT. Erratic winds caused significant runs and long range spotting. Crews are holding along the south and east flanks, and constructing fireline on the northwest flank.

WOODENSHOE, Manti-LaSal National Forest. A Fire Use Management Team (Bonefeld) is assigned. This fire is in the Dark Canyon Wilderness Area, 25 miles west of Blanding, UT. The fire is being managed with a confine/contain strategy. Occasional torching with short runs and some spotting in mixed conifer was observed.

FIN CANYON, Southeast State, Utah Division of Forestry, Fire and State Lands. This fire is 18 miles west of Price, UT. Some crowning, torching and spotting was observed in mixed conifer and logging slash. Crews are mopping up.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD
APEX	UT	SWS	28,500	35	7/7	517	14	19	5	1	880K
WOODENSHOE	UT	MLF	925	0	UNK	44	1	1	0	0	NR
FIN CANYON	UT	SES	100	80	UNK	108	4	1	2	0	NR

SOUTHWEST AREA LARGE FIRES:

JENNY, Gila National Forest. A Type 2 Incident Management Team (Mullenix) is assigned. This lightning caused fire is in mixed conifer, pinyon pine and oak, 45 miles northwest of Truth or Consequences, NM. Low to moderate fire behavior with isolated torching was observed. Crews made good progress building fireline on the northwest and south flanks.

DRY LAKE COMPLEX, Gila National Forest. A Fire Use Management Team (Duncan) is assigned. This lightning caused Wildland Fire Use complex, comprised of the Dry Lake, Sycamore, Moonshine and Granny fires, is 27 miles northwest of Silver City, NM. The complex is being managed to accomplish multiple resource objectives. Minimal fire behavior was observed in stands of mixed conifer, pinyon pine, juniper, ponderosa pine and grass. Crews continue to patrol and monitor the fires. The increase in acreage is due to more accurate mapping.

ASPEN, Coronado National Forest. A Type 2 Incident Management Team (Kvale) is assigned. This fire is in the Pusch Ridge Wilderness Area, 17 miles northeast of Tucson, AZ. Group torching and short range spotting were observed in mixed conifer, ponderosa pine and brush. Extremely steep slopes, large rock outcrops and rugged ridgelines are hampering containment efforts on the southwest perimeter. Air resources are assisting in containment efforts on the southwest corner of the fire.

POWELL, Grand Canyon National Park. A Fire Use Management Team (Cook) is assigned. This lightning caused Wildland Fire Use fire is burning in ponderosa pine, grass, gambel oak and manzanita, 23 miles northwest of Grand Canyon Village, AZ. The fire is being managed to accomplish resource objectives. The fire spread south and southwest with occasional short, uphill runs in brush on the east and west slopes of the Powell Plateau.

SECO, Gila National Forest. This fire is in the Aldo Leopold Wilderness Area, 15 miles southwest of Winston, NM. The fire is being managed with a confine/contain strategy. No new information was reported.

NORTHERN CALIFORNIA AREA LARGE FIRES:

FRIDAY, Six Rivers National Forest. A Type 2 Incident Management Team (Wendt) is assigned. This fire is on Highway 299, one mile west of Salyer, CA. Active fire behavior was observed in mixed conifer and manzanita. Crews are mopping up and rehabilitating fire line.

FORTY, Sonoma-Lake-Napa Unit, California Department of Forestry and Fire Protection. This fire is burning in chaparral, four miles west of Rumsey, CA. Some spotting was observed at the head of the fire. Crews are monitoring and mopping up.

ROCKY MOUNTAIN AREA

YANKEE GULCH, Western Slope Center, Bureau of Land Management. This lightning caused Wildland Fire Use fire is burning in pinyon pine, juniper and sage, 35 miles southwest of Meeker, CO. The fire is being managed to accomplish multiple resource objectives. Group torching and short crown runs were observed. Continued monitoring of fire size and behavior is planned.

OUTLOOK:

Red Flag Warnings: Red Flag Warning for southwest Utah for winds and low relative humidity.

Fire Weather Watches: Fire Weather Watch for portion of southeast Idaho for winds and low relative humidity.

Weather Discussion: The upper trough that has been off the Northwest coast will move across the Northwest and the Northern Rockies. Elsewhere, a dry southwest flow will continue over the West except for some moisture over New Mexico and eastern Arizona. Rain is expected from the mid-Atlantic coast through the Gulf Coast along with an area of showers over the Dakotas. In Alaska, rain is expected over much of the interior.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
EASTERN AREA Partly cloudy, mild and breezy across northeast Wisconsin and the upper of Michigan	82 to 88	37 to 47%	South to southwest wind increasing to 15 to 20 mph in the afternoon
EASTERN GREAT BASIN AREA Hot and dry. Windy southern Utah and Arizona Strip.	Idaho, Bridger-Teton 60 to 80 mountains, 80 to 92 valleys. Utah and Arizona Strip 73 to 92 mountains, 90 to 106 valleys.	Idaho, Bridger-Teton, northern half Utah 15 to 30% mountains, 8 to 16% valleys. Southern half Utah and Arizona Strip 2 to 15%.	Idaho, Bridger-Teton, northern half Utah west to southwest winds 10 to 25 mph. Southern half Utah, Arizona Strip southwest winds 15 to 25 mph, gusts to 40 mph possible southwest Utah and Arizona Strip.
NORTHERN CALIFORNIA AREA Clear except for night and morning fog and low clouds along the coast and in the coastal valleys.	60s near the coast. Inland 70s and 80s higher elevations and 80s and lower 90s lower elevations.	7 to 14% east of the Sierra Cascade Crest and 14 to 32% west of the crest.	Southwest to west winds 8 to 18 mph in the afternoon with gusts 25 to 30 mph along and east of the Sierra Cascade Crest.
NORTHWEST AREA Partly cloudy western Washington and northwestern Oregon. Mostly sunny eastern Washington and Oregon.	60s and 70s west of Cascades and 70s to lower 80s eastside and extreme southwest Oregon.	Above 40% west side and 15 to 30% eastside except 5 to 15% southeast Oregon.	Northwest to southwest winds 10 to 15 mph with gusts to 25 mph in windier spots east of Cascades.
ROCKY MOUNTAIN AREA Hot and dry, except a few thunderstorms over the northeast plains.	Highs in the upper 80s to mid 90s, with 70s to lower 80s in the mountains.	8 to 18% western sections, except 15 to 25% over the mountains. 25 to 40% in the east.	Northwest winds 15 to 25 mph in the Black Hills area, variable 5 to 17 mph elsewhere.
SOUTHERN CALIFORNIA AREA Areas of morning low clouds and fog coastal areas, otherwise sunny.	75 to 95 mountains. 90 to 105 valleys. 90 to 105 upper deserts. 100 to 115 low deserts.	5 to 15% deserts. 10 to 20% mountains. 15 to 25% valleys.	Southwest to northwest winds 10 to 20 mph.

SOUTHWEST AREA Mostly sunny and dry Arizona. Isolated dry thunderstorms western New Mexico. Partly cloudy with isolated wet thunderstorms higher elevations central New Mexico to west Texas.	80s mountains, 98 to near 110 lower elevations.	5 to 15% Arizona and western New Mexico, 15 to 25% central New Mexico, and 25% or more far eastern New Mexico and west Texas.	Southwest to northwest winds 5 to 15 mph eastern Arizona, New Mexico and west Texas. West to northwest 10 to 20 mph gusting to 25 mph western Arizona.
NORTHERN ROCKIES AREA Partly Cloudy. Isolated Thunderstorms over southwest Montana.	Idaho 70 to 85. Western Montana 75 to 85.	Idaho 20 to 30%. Western Montana 15 to 25%.	Idaho west winds 5 to 15 mph. Western Montana southwest winds 10 to 15 mph.

DOWNHILL FIRELINE CONSTRUCTION CHECKLIST

Downhill fireline construction is hazardous in step terrain, fast-burning fuels, or rapidly changing weather. Downhill fireline construction should not be attempted unless there is no tactical alternative. When building downhill fireline, the following is required:

- Crew supervisor(s) and fireline overhead will discuss assignments prior to committing crew(s). Responsible overhead individual (TFLD or ICT4 qualified or better) will stay with job until completed.
- Decision will be made after proposed fireline has been scouted by supervisor(s) of involved crew(s).
- LCES will be coordinated for all personnel involved.
 - Crew supervisor(s) is in direct contact with lookout who can see the fire.
 - Communication is established between all crews.
 - Ensure rapid access to safety zone(s) in case fire crosses below crew(s).
- Direct attack will be used whenever possible; if not possible, the fireline should be completed between anchor points before being fired out.
- Fireline will not lie in or adjacent to a chute or chimney.
- Starting point will be anchored for crew(s) building fireline down from the top.
- Bottom of the fire will be monitored; if the potential exists for the fire to spread, action will be taken to secure the fire edge.
