

INCIDENT MANAGEMENT SITUATION REPORT
SUNDAY JUNE 1, 2003 - 0800 MDT
NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Initial attack activity was light nationally, with 91 new fires reported yesterday. No new large fires were reported. Very high to extreme fire indices were reported in Arizona, California, Nevada, New Mexico, and Texas.

ALASKA AREA LARGE FIRES:

TOK RIVER, State of Alaska. A Type 2 Incident Management Team (Reed) is assigned. The fire is burning in black spruce, tundra, and mixed hardwoods five miles southeast of Tok, AK. The southwest end of the fire was very active yesterday afternoon due to strong winds. Today's planned actions include containing any resulting spot fires from yesterday's increase in activity.

NORTHERN CALIFORNIA AREA LARGE FIRES:

DEL PUERTO, California Department of Forestry-Santa Clara Unit. This fire is burning in grass, brush, and scattered timber fifteen miles west of Patterson, CA. Minimal fire activity was observed yesterday. Steep terrain and rolling material are presenting safety concerns. Resources continue to complete control lines. Reduction in acreage is due to more accurate mapping.

LUHI, Hawaii Volcanoes National Park. This fire was started by lava from the Kilauea Volcano. The fire is burning in grass, brush, and rainforest. Work around unburned islands and mopup of perimeter is planned for today.

OUTLOOK:

Weather Discussion: A very long front is draped off the Eastern Seaboard, wrapping around the Gulf Coast states and eventually ending as a stationary front along the front range of Colorado. The front will provide a focus for scattered showers and thunderstorms in north Florida, and in the central United States from Texas northward to eastern Montana. The west will remain dry and start to warm up under the influence of high pressure. In Alaska, the central sections of the state will experience scattered showers and thunderstorms, along with an increase in relative humidity over Saturday's values.
