

INCIDENT MANAGEMENT SITUATION REPORT
MONDAY JUNE 9, 2003 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Initial attack activity was light nationally with 83 new fires reported. One large fire was contained in the Southwest Area. Very high to extreme fire indices were reported in Alaska, Arizona, Colorado, Nevada, New Mexico, Oklahoma, Texas and Utah.

SOUTHWEST AREA LARGE FIRES:

THOMAS, Apache-Sitgreaves National Forest. A Type 2 Incident Management Team (Kvale) is assigned. This fire is burning in ponderosa pine 20 miles south of Alpine, AZ. Active fire behavior with torching was observed yesterday. Crews will continue to construct and improve control lines and burnout indirect lines today. Rugged terrain and heavy fuel loading are hampering containment efforts.

DRY LAKES COMPLEX, Gila National Forest. A Fire Use Management Team (Rath) is assigned. This lightning caused Wildland Fire Use Complex is 27 miles northwest of Silver City, NM and is being managed to accomplish resource objectives. The complex consists of the Dry, Lake, Sycamore and Moonshine fires and is burning in pinyon and ponderosa pine, brush and juniper. The fires continued to back down slope in heavy fuels yesterday. Continued aerial monitoring of the complex is planned for today.

MORMON, Coconino National Forest. The fire is near Padre Canyon, AZ and is burning in pinyon pine. The fire remains in confinement status. Torching and spotting were observed yesterday. Aerial reconnaissance of the fire will continue today.

ABD = Albuquerque Field Office, Bureau of Land Management

NORTHERN CALIFORNIA AREA LARGE FIRES:

LUHI, Hawaii Volcanoes National Park. This fire was started by lava from the Kilauea Volcano and is burning in grass, brush and rainforest on the Island of Hawaii. Minimal fire activity was observed yesterday. Personnel are mopping up and patrolling for hot spots.

EASTERN GREAT BASIN LARGE FIRES:

LONESOME BEAVER, Richfield Field Office, BLM. This fire is burning in pinyon and ponderosa pine, juniper and grass near Hanksville, UT, and is being managed in a confinement strategy. No significant change occurred.

OUTLOOK:

Fire Weather Watch: A fire weather watch has been issued for portions of southwest Utah for winds and low relative humidity.

Weather Discussion: High pressure ridge along the West Coast beginning to weaken as a series of disturbances will drop down out of Canada and swing across Montana and the Dakotas. Limited moisture continues over the Great Basin, Colorado and the Southwest for some thunderstorm activity. In the East, look for rain over the Great Lakes and Northeast due to a storm system moving through the area. Showers will also be scattered throughout Florida. In Alaska, a low pressure system over the Aleutians will bring rain to the southwest corner while much of the interior will see warmer and drier weather as high pressure builds into that area of the state.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
ROCKY MOUNTAIN AREA Isolated to scattered afternoon thunderstorms. Isolated dry lightning in the west.	Mid 70s and 80s, with 60s to lower 70s in the mountains.	Mainly 10%-20%, except 25-40% in the mountains and northern sections.	Westerly 13 to 25 mph in the west, with variable winds in the east.
EASTERN GREAT BASIN AREA Mostly sunny Idaho and Wyoming except isolated thundershowers mountains of eastern Idaho and Wyoming. Isolated dry thunderstorms Utah with scattered thundershowers over the mountains.	60-75 in the mountains, 75-90 in the valleys except 90-100 in the valleys of southern Utah and the Arizona Strip.	Idaho, western Wyoming, and northern Utah 7-20% valleys, 15-30% mountains. 10-30% southern Utah and the Arizona Strip.	SW winds 10-25 mph Utah, SW 10-15 mph southern Idaho and western Wyoming.
SOUTHWEST AREA Partly cloudy. Isolated dry thunderstorms possible mountains of northern AZ and western NM. Widely scattered wet thunderstorms eastern NM and west TX.	Upper 60s to near 80 in the mountains and across northeast NM and the TX panhandle, 80s and 90s most remaining lower elevations.	10-20%, except 20-35% eastern NM and west TX.	SE to S 10-20 mph in west TX, SW 5-15 central NM and northern AZ. SW 10-20 southwest AZ.

SOUTHERN CALIFORNIA Morning low clouds and fog to the lower coastal slopes with local drizzle, otherwise mostly sunny, except a slight chance of thunderstorms over the southern California mountains and deserts east of Cajon Pass and over and east of the Sierra crest.	70-85 Mountains and Coastal basins, Near 90 Central Valley and Upper Deserts and 100-108 lower desert	20-35% Mountains and Inland Valleys 50-70% in Coastal Valleys 10-20% Deserts	SW-NW 10-20 mph mountains, 15-25 mph deserts, and 5-15 mph elsewhere

TAKING A NAP NEAR THE FIRELINE

Firefighting is often exhausting work and firefighters can find themselves needing to sleep while on the fireline. Before pausing to rest, firefighters must weigh the following considerations:

- Are lookouts posted? Discuss who that lookout can be. Can the lookout on the knob across the draw watch over you or does it need to be your partner on the fireline alternating rest times?
- Is the area free of hazards? (Falling snags or rolling materials) Discuss what you need to do to create a safe resting area.
- Are you still within agency work and rest guidelines? Review what these guidelines are.
- Does your crew need a break? Have they been pushed too hard? Talk about situations where you need to simply take yourself and/or your crew off the fire for uninterrupted rest.
- To reduce risks:
 - Keep lookouts posted; rotate lookouts.
 - Communicate crew conditions and status to supervisor or chain-of-command contact. Have firefighters discuss ways that they fine to rest on the fireline and suggestions for methods to to alternate shifts for more effective firefighting.
