

INCIDENT MANAGEMENT SITUATION REPORT
SATURDAY JUNE 14, 2003 - 0800 MDT
NATIONAL PREPAREDNESS LEVEL 2

CURRENT SITUATION:

Initial attack activity was light nationally with 119 new fires reported. Three new large fires were reported two in the Southwest Area and one in the Eastern Great Basin Area. Two large fire were contained, one in the Southwest Area and one in Northern California Area. Very high to extreme fire indices were reported in Alaska, Arizona, Colorado, Nevada, New Mexico, Oklahoma, and Texas.

SOUTHWEST AREA LARGE FIRES:

THOMAS, Apache-Sitgreaves National Forest. A Type 2 Incident Management Team (Kvale) is assigned. This fire is burning in mixed conifer and aspen forest 16 miles south of Alpine, AZ. Active fire behavior was observed. Steep, rugged terrain, inaccessibility and heavy fuels are hampering suppression efforts. Crews will continue to improve indirect fireline, conduct burn out operations, and use minimum impact suppression tactics (MIST) in primitive areas.

DRY LAKES COMPLEX, Gila National Forest. A Fire Use Management Team (Rath) is assigned. This lightning caused Wildland Fire Use complex, comprised of the Dry, Lake, Sycamore and Moonshine fires, is 27 miles northwest of Silver City, NM. The complex is being managed to accomplish resource objectives. Minimal fire activity was observed in pinyon pine, ponderosa pine and grass. Personnel will continue to monitor the complex and support other incidents on the forest.

MORMON, Coconino National Forest. The fire is burning in pinyon pine 19 miles southeast of Flagstaff, AZ. This fire is being managed in a confinement strategy. No new information was reported.

TEN COW, Gila National Forest. This lightning caused Wildland Fire Use fire is burning in ponderosa pine, pinyon pine, juniper and grass 32 miles southeast of Reserve, NM. Resources were suppressing spot fires and monitoring fire spread.

JUNIPER, Prescott National Forest. This lightning caused Wildland Fire Use fire is burning in ponderosa pine 40 miles northwest of Prescott, AZ. Fire behavior observed was creeping and occasional single tree torching.

RIVER, Colorado River Agency, Bureau of Indian Affairs. This human caused fire is burning in mesquite, salt cedar, and arrow weed, ten miles southwest of Bullhead City, AZ. Resources are continuing to mop up and monitor the unburned islands within the fire.

MORGAN, Gila National Forest. This lightning caused fire is burning in ponderosa pine, grass, mixed conifer with heavy dead and down fuels, 34 miles west of Truth or Consequences, NM. Some isolated torching of brush was observed. Resources are continuing to monitor the spread of fire.

CRA = Colorado River Agency, Bureau of Indian Affairs

EASTERN GREAT BASIN LARGE FIRES:

SHEEP, Salt Lake Field Office, Bureau of Land Management. This fire is burning in grass and juniper 30 miles northwest of Grantsville, UT. Resources are constructing fire line and mop up. No further information received.

OUTLOOK:

Weather Discussion: Drier air is pushing into the Great Basin and should keep most showers and thundershowers east of the Rocky Mountains. The intermountain area will see warmer temperatures as high pressure begins to build. Shower activity is expected to continue over the east and southeast states. High pressure will persist over the Alaska interior.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
NORTHERN CALIFORNIA Patchy low clouds and fog along the coast and into some coastal valleys, as well as the southern Sacramento Valley, with partial clearing in the afternoon. Mostly sunny otherwise.	From upper 50s to around 70 near the coast and upper 70s to near 90 inland.	17-25% In the driest inland areas and 50% or higher near the coast.	South to west winds, increasing to 5-10 mph in the afternoon. Local gusts to 20 mph, mainly east of the Cascade/Sierra crest.
SOUTHERN CALIFORNIA Morning low clouds and fog into the coastal valleys, otherwise mostly sunny.	70-90 In the mountains and valleys, 90-100 upper deserts and 100-110 lower deserts.	15-30% In the mountains, 30-45% valleys and 5-15% deserts.	Southwest to northwest 10-20 mph mountains and deserts, otherwise 5-15 mph.
ROCKY MOUNTAIN AREA Dry in the west, with a few afternoon thunderstorms east.	75-85 except up to the lower 90s western Colorado.	10%-20% in western Colorado into central Wyoming, with 26%-37% elsewhere.	Variable at 5 to 15 mph.
SOUTHWEST AREA Mostly sunny west and partly to mostly cloudy east. Scattered thunderstorms in eastern New Mexico and west Texas, with isolated dry thunderstorms possible near the Rio Grande.	70s and 80s In the mountains and 80s and 90s at lower elevations, except near 107 southwest Arizona deserts.	5-15% west, 20-35%+ in the east.	Easterly winds 10-15 mph in eastern New Mexico and west Texas. Upslope/up-valley winds 5 to 15 mph with some higher afternoon gusts elsewhere.
EASTERN GREAT BASIN AREA Mostly sunny region-wide.	64-82 In the mountains, 78-92 in the valleys except 90-101 in the valleys of southern Utah and the Arizona Strip.	Idaho, western Wyoming, and northern Utah 9-28%. Southern Utah and the Arizona Strip 4-14%.	Light in the west, southwest winds 5-15 mph in the east.

WORKING WITH HELICOPTER DROPS

Consider the following questions when you have a helicopter with a bucket working in your area:

- Do you have good communications?
- Does the pilot have a clear understanding of the target?
- Are trees and snags in the drop zone?
- Are ground crews clear of the area?
- What are the winds doing?
- Are other aircraft in the area?
- Are people on the ground aware of the effects of the helicopter's rotorwash?
- Will terrain and obstructions allow the helicopter to attain the proper drop height?
- Be aware that helicopter performance capabilities may be significantly reduced at high altitudes and/or high temperatures.
